It is well known that,
“Mr. Warden!” flashed out Carrie.
And her glass, she was perfectly satisfied
This is a lesson which will
It is well known that,
An Indian Massacre.

Carlton's Command cut up at the Horse-Drawn Station, and the Men Killed—A Terrible TRAGEDY—A Full Account of the Battle.

Major Loring, (with special correspondence of the Grand Trunk Line,) stationed at the Horse Drawn Station, 25 miles below the Little Horn, had his camp attacked by a body of Indians early on the morning of July 25. Major Taylor, a ward in the military service, with Mrs. Taylor, his wife, and a small child, was on a visit to the great depot at Bozeman, when the news reached them that the party was attacked, and the Major himself had been killed. Mrs. Taylor and her child are safe. This is one of the most terrible wars in the history of the United States.

In the early morning of the 25th, Major Loring received a report from his scouts that a large body of Indians was approaching his camp. He ordered his men to be prepared for action. A few minutes later, the Indians charged upon the camp, and a fierce battle ensued. The Major himself was killed, and the camp was set on fire. The survivors made their way to the Bozeman depot, where they found the bodies of the Major and his wife. The Indians had killed all the men in the camp, and burned the house and tents.

The capture of the Grand Trunk Line station is a blow to the United States, and a great loss to the government. The station is situated on the Bozeman road, and is the only one on the line between the Great Salt Lake and the Black Hills. It is a valuable property, and is of great importance to the government. The Indians have destroyed the station, and have taken possession of it. The government will have to send a force to repossess the property, and to prevent further trouble.

The Indians have been fighting in this region for some time, and have caused much damage to the government. They have destroyed several stations, and have killed many of the soldiers. The government is determined to put down the Indian war, and to protect its property.

The United States public debt was reduced by $2,000,000,000 during the past year to the complete satisfaction of the most conservative financial experts. Mr. Blaine, in his annual message, recommends the immediate payment of all the interest due on the public debt, and the extension of the experiment of the Washington Bonds. The report was agreed to without further discussion.

The following resolution was adopted by the house of representatives:

"Resolved, that a committee be appointed to inquire into the expediency of establishing a national bank, and to report the best means of organizing such a bank."
