WOMEN'S HOURS ABOLISHED
Board Votes Rule Change For Next Fall

Special to the Weekly from President Pettit

President Pettit has announced that the new rules of the College including students, professors, and other staff members that there will be a new set of rules for women students. This new rule will be effective from the beginning of the next academic year. The rule is designed to provide greater freedom for the individual student and security for all students and faculty. The new rule represents a major change in the policies of the College, as it has been formulated and discussed extensively with the board of directors.

1. There will be no difference in the regulations for men and women students.
2. All students may enter and leave their dormitories at any time, day or night, unless specifically prohibited by the board.
3. Students who plan to be absent from their assigned dormitories between sunrise and sunset within the time frame of the new rules will be required to provide a written note to the dormitory manager. This note will be kept on file for reference.

When President Pettit was asked how these changes will be received by the faculty and students, he replied, "I believe that this new rule will be well received by the faculty and the students. I have been in touch with several members of the faculty and students who have expressed their support for the new rule. I believe that the new rule will bring to campus with them.

Will Rates Go Up?

The "play's the thing" has become the motto for this Ursinus senior who is writing her first piece of dramatic literature. Elsie Van Wagoner, an English major, has found the theme of being a woman now is the basis of her senior year. She is working on a comedy, entitled "Half a Dime, Diner Roles." The title reflects the fact that the play is a comedy and that the comedy is entitled their own skits. The end product is a little more enjoyable for everyone.

Marsteller To Publish Constellation Slides

Written by Ruth von Kummer

Mr. Walter Marsteller, an associate professor of Physics at Ursinus, is having a set of one hundred and two slides published, and he expects it will be out this year. They are concerned with the constellations of the Northern and Southern Hemispheres. The one hundred and two slides are comprised of eighty-eight constellations. Accompanying each slide is a constellation chart which includes all the pertinent information on the side.

The work entitled A World of Stars differs from most star jour-nals because his slides present various parts of the sky at the same time. He is planning to make more slides in the future. Because of his new interest in astronomy, he is planning to make more slides in the future.

New Special Students To Take Part in Upcoming Summer Session School

Beginning with the upcoming Summer Session, Ursinus will add high school juniors and seniors and adults age 62 and older as special students.

"By starting in summer, a student can take courses for an average of 8 bill each, compared to the $126 normally charged in the regular day session," said Dr. Charles (Continued on Page 4, Col. 3)
THE GHOST OF URUSINUS PAST

By JANE SIGEEL

In those thrilling days of yesteryear, when the world revolved around the Azia's frustrated white knight, the Internet had not yet been invented, and there was no law to appear. Similarly, just after the Great Depression, with the form and still kind of void, over which Bush's 800 billion dollar stimulus did nothing, there was no doubt that some long-haired, hippie freak would show up right wrongs and save bush. But even before he could walk away from the unlative dictatorship, there was no doubt that he would fly, and to whom one should start sacrificing beautiful maidens with his flying fickle finger of fate. Zap!

...only were there recognized fearless chief of the Weekly, president of the International Relations Club at studies, and in 1936 he received his submarine chaser along the way he worked in some...
**THE ZODIAC EARTH SIGNS: Taurus, Virgo, Capricorn**

**By ED KNOWLES**

The earth signs are the signs of the zodiac that signify a practical orientation toward life. In each of the three earth signs this orientation is expressed differently. The key descriptive expression for Taurus is possessiveness, determination, and practicality. The words most descriptive of Virgo are discrimination, methodicalness, and service. For Capricorn the words ambition, conservatism, concentration, facilitation and organization aptly describe the mode of practical expression. In nodal evolution, the earth signs follow fire signs and therefore the emphasis in life is on control and security as opposed to the impulsive and transformational risk and change with preceding fire signs. Following are more in-depth descriptions of the earth signs:

**TAURUS**

Taurus are often fond of the good things in life and often direct their lives toward acquiring material wealth and security. To get what they desire they remain determined and purposeful. Love of comfort, satisfaction and pleasure characterize people born under this sign. Whatever they devote their time to will benefit them, and they are the possessors of a unique, a dominant and controlling role. Their inner motives, their inner passion, their inner drive are the essence of the extravehant queen.

Many faculty members were worth-while characters and first-rate actors. Mr. Stalshak, Mr. Solenberger, Mr. Sharp, Dr. Saydray, Dr. Reimer, Dr. Sally van and Dr. Wickerharn all turned out to be capable and trustworthy. The Taurus actors have a high sense of responsibility and are genuinely impressed by other's achievement. They are often intensely competitive, but sometimes a Taurian will turn on a graduate in their class; when they are annoyed with him or her. They usually rise by themselves, but sometimes a Taurian will turn on a graduate in their class; when they are annoyed with him or her. They usually rise by themselves, but sometimes a Taurian will turn on a graduate in their class; when they are annoyed with him or her. They usually rise by themselves, but sometimes a Taurian will turn on a graduate in their class; when they are annoyed with him or her. They usually rise by themselves, but sometimes a Taurian will turn on a graduate in their class; when they are annoyed with him or her. They usually rise by themselves, but sometimes a Taurian will turn on a graduate in their class; when they are annoyed with him or her. They usually rise by themselves, but sometimes a Taurian will turn on a graduate in their class.
KILT KLAAD’S COMMENT:
Seasons Are Near End

By "THE GANG"

The Varsity and JV lacrosse teams traveled to Towson, Maryland on Saturday, May 4th. Both teams came home triumphantly enough.

Three hours on the road was time because, about a mile from West Chester, unfortunately for U.C., West Chester happened to score more goals than the Ursinus Beavers.

The Varsity score was 14-1 and the JV score was 11-5. Last Thursday, the Beavers traveled to "Trenton-um" (this time by car), only to find that we would not be playing on a normal lacrosse field but on a New Jersey cow pasture. The Varsity team proceeded to shoot out Trentum with a score of 20-6. The JV team was scheduled to play. However, with ten minutes to go in the Varsity game, the rain began, and the second game was cancelled. Standing in pouring rain is always the best way to spend a Thursday afternoon.

The last game of the 1974 lacrosse season is scheduled for Tuesday, May 11th at East Havardia, West Chester. We are confident that both teams will finish the season on a positive note. Good luck and a positive note. Good luck and a positive note. Good luck and a positive note.
