Ursinus College Bulletin

Fall 1979

Profiling the alumni

Choosing a
pragmatic course

Predicting at
Lake Placid

Bringing culture
to the campus

The Achievement
Report 1978-79

Cover photo by Ted Anderson

On the Cover - *By the time Nancy Anderson, '82, graduates, she will probably take at least one course in the Economics and Business Administration Department. Read about the increased interest in this practical course of study and what it means to the College and the Department on page 6. The world will be watching the Winter Olympics at Lake Placid this February. Find out what one alumnus forecasts for that competition on page 8. Ursinus provides a free Forum for the campus and the community at least a dozen times a year. Feel free to attend these programs described on page 10.*

Ursinus College Bulletin - Volume LXXVII, No. 4, Fall 1979. Second Class postage paid at Collegeville, Pa. 19426. The *Ursinus College Bulletin* is published quarterly. Entered as second class matter at the Post Office, Collegeville, Pa., under the Act of August 24, 1912. Editor—Andrea Vaughan Detterline, '72. (USPS 653-760)

Being an alumnus— it's an active role

The following remarks to graduates were made by Richard P. Richter, President of Ursinus College, at the Founders' Day Convocation held in Bomberger Hall on November 4, 1979. The College honored the following alumni at the convocation: Joan Deacon Aikens, '50, and Joseph A. Citta, '30, Doctor of Laws; Thomas G. Davis, '52, and John W. DeWire, '38, Doctor of Science. Dr. Davis delivered an address dealing with corporate responsibility in a changing world.

"The College today has called back to campus four graduates who have made a mark on the world. We have asked one of them to share his insights with us—insights that are penetrating and for which we are very grateful. At the same time we have issued degrees to a new group of graduates, who now are equipped to go in search of challenge and accomplishment anew. And we have done this on a day given to the remembrance of the founders of this institution of higher learning. In essence, then, this is quintessentially an Ursinus College day.

"Let us think of it as a day of recognizing and giving thanks for the actions and thoughts—for the lives—of our alumni, those 8,000 or so living men and women who share in common an experience at this place and the ownership of an Ursinus diploma.

"For nearly 15 years as a member of the College staff, I have studied the relationships between the institution and its graduates and have pondered what it means to be an alumnus of a college, and

particularly an alumnus of Ursinus College. (Latin teachers will forgive me, I hope, for using the masculine form, *alumnus*, to denote both men and women graduates.)

"For some persons, of course, being an alumnus can mean very little. Indeed, every alumni director or president of any college can show letters in which alumni disavow their connections forever. I have received a few in my time. Some of them tend to be a bit silly, but all are mainly sad—for the authors of those letters choose to cut out a part of themselves, of their life's experience, whether it was good or bad.

"But such declarations of self-amputation fortunately are very few. Nearly all alumni seem to

harbor some sense of the worth of their years on campus and, to some degree, see value in remembering them.

"This admittedly can degenerate into nostalgia resembling tapioca pudding. Or it can place undue importance on some single remembered activity in class or on playing fields which consumes the total imagination and distorts the reality of the College past as well as the College present.

"In its healthier form, alumni nostalgia reflects a respect for oneself, for the influences that shaped one's knowledge and values, for the rootedness of one's existence. It allows a person to remember and revisit his or her past, reshaping it, perhaps, but

Dr. John W. DeWire, '38, professor of physics and associate director, Laboratory of Nuclear Studies at Cornell University, received the Honorary Doctor of Science degree from President Richard P. Richter at Founders Day ceremonies on October 4, 1979.

fitting it and refitting it into a sensible pattern that becomes increasingly visible as years go by.

"Is *that* all there is? A *healthy* form of nostalgia?"

"One hopes for more and surely there is more. To be an alumnus is to be the practitioner of a particular way of dealing with problems, of a style of living. It is easy to overstate this. There is a great danger of romanticizing, of attributing to a given alumni body qualities that would be hard to verify in a significant sample of alumni. Yet common sense suggests that if young people sit in classrooms on the same campus for four years with teachers chosen according to the same criteria, sharing whatever institutional traditions there may be, those people will take with them some similar patterns of behavior that will persist.

"There is some objective evidence of this phenomenon in the work of Douglas Heath, head of the psychology department at neighboring Haverford College. Professor Heath has studied the habits and values of Haverford alumni for more than 20 years and has found that Haverfordians display certain predictable qualities that are traced to their college experience.

"We have no similar in-depth study of Ursinus alumni and cannot make broad, substantiated generalizations about their values or their behavior. We do know, of

Dr. DeWire (right) and Joan Deacon Aikens, '50, (left) applaud Joseph A. Citta, '30, (center), who received the Doctor of Laws degree. Mr. Citta, an attorney from Tom's River, N.J., was recognized for his many civic activities. Dr. Aikens, member and immediate past chairman of the Federal Election Commission, also received the Honorary Doctor of Laws degree.

course, many individual men and women who are graduates of Ursinus. And based upon the scores of examples that come to mind, one feels somewhat certain in making *some* assertions. For example, many alumni value highly a sense of community. They have confidence in their personal identity and integrity amidst the hyperbolic absurdities of contemporary urban living. They learned how to work

hard as students toward a preconceived goal and remember and apply that lesson. They distrust exaggeration and see through bombast. They manipulate complex concepts with a certain simplicity of style. They care what happens around them and they function effectively in a variety of settings. Whether these are the norms, one does not know—but one hopes so.

"At their best the Ursinus alumni not only possess a nostalgic picture of the past on campus, not only manifest certain specific standards of intellect and character, but also maintain an active relationship with the College throughout adult life.

"Here too it is easy to overstate or misrepresent the case. Maintaining an active relationship of course means for most people certain clear-cut actions: making a generous annual gift to keep the College strong; keeping in touch with key professors; visiting the campus; taking office in the Alumni Association or gathering with fellow graduates at regional meetings;

The faculty processional

serving as alumni counsellors to students; helping recruit new students; being a resource person for academic departments.

"But there is more to it than that, or at least there should be. A. Whitney Griswold captured the extra meaning, I think, some years ago when as president of Yale University he spoke of the alumnus as a "patron of learning". Mr. Griswold suggested that to be a patron of learning in the best sense, an alumnus should "keep on educating himself" in addition to all those other activities. He should remain in contact in his own style of life with the essential function of his alma mater—learning. He should stay alive intellectually, thus serving himself and demonstrating to the world the high quality of the institution to which he gives allegiance and which claims him as one of its own.

"(And I am sure that, later, when Yale went coed, Mr. Griswold would have set the same high expectation for the women as well as the men of Yale.)

"In essence, what President Griswold said—and what I would hope to emphasize today—is that the graduate of a college should remain in direct touch not only with the institution itself but, equally important, with the sources of greatness with which he or she became familiar during student years—books, lectures, teachers, arguments wherein goals become clarified and life's purpose solidified.

"To be ideal alumni, then, graduates must look not only backward but forward, not only outward but inward. Their obligation is to raise the standards around them, to sharpen the tools of inquiry, above all, to reconcile, to harmonize, to bring the scattered pieces of experience into some meaningful whole, to complete the picture, to add the light touch of the creative individual to the lumpish mass of collective life.

"Such alumni Ursinus has, and I submit as evidence the honored

Thomas G. Davis, M.D., '52, vice president and medical director for worldwide medical affairs for Smith Kline & French Laboratories, was the featured speaker at the convocation. He discussed the responsibilities of business in today's world.

persons on the platform today—persons who in medicine, business, law, government and scholarship, and in the wholeness of their lives, demonstrate the qualities we hold high. There are many more like them.

"Let the Ursinus College community, on this Founders' Day, be grateful for such persons. Let the College community rejoice that learning is patronized by those who studied here. Let us be thankful for the generous share of wisdom and wealth and work that the alumni of Ursinus College bring back to their alma mater.

"In closing, I encourage the new graduates here today to carve your own role as a patron of learning at Ursinus College. Please take with you from this convocation the very best wishes of the College community for your personal happiness and for the fulfillment that comes of meeting great challenges with grace and with skill. All of us wish you Godspeed."

Economics

It really means business

Dr. John D. Pilgrim, associate professor of economics and chairman of the Economics and Business Administration Department, is a graduate of Grinnell College and holds a Ph.D. from Vanderbilt University. Dr. Pilgrim was a co-recipient of the 1979 Lindback Award for excellence in teaching.

Students are coming to college with different interests and expectations than they did a decade ago. Today's students are more likely to be career-oriented and are less likely to be convinced of the value of education for its own sake; they are more likely to be planning on going to work immediately after graduation and less likely to be planning on attending graduate or professional school; and they are more likely to be interested in careers in the field of business rather than the professions that Ursinus students have traditionally sought (medicine, law, and teaching). While Ursinus continues to attract a large number of highly qualified students and continues to be successful in maintaining a stable enrollment, the distribution of the enrollment and the interests of our students have changed in some very important ways.

Our changing student mix has had a significant impact on the college and will continue to do so in the years ahead. The changing mix challenges the college to redirect its efforts and offers it an opportunity to strengthen existing programs and build strength in some new areas.

One effect of our changing student population is seen in the enrollment patterns in the college. Traditionally, Ursinus has been dominated by the science students, both in number and in impact on the college. The science students, combined with students planning on professional careers in law or teaching, heavily outweighed other interests on campus. This helped us to maintain our well-deserved reputation as an excellent training ground for students interested in medicine, law, and teaching. While we continue to attract a large number of highly qualified students into our pre-professional programs, we are also attracting a larger number of students who are interested in business administration. The economics and business administration department now teaches the largest number of

students on campus—it has the largest number of majors, the largest total enrollment in courses, and the largest number of graduating seniors.

The sharp increase in the total enrollment in our area has been a source of satisfaction as well as challenge. Clearly, it is satisfying to have students share one's interest in an area. And I like to think (although perhaps it's self-delusion) that part of the attraction results from the quality of the program that we offer and the quality of the faculty in our department. But the change also poses a challenge: to meet these needs, the department's faculty resources have to be expanded, the quality of the existing faculty must continually be upgraded, and our program must be regularly examined and improved. Also, there is always the long-term danger that when one area dominates in terms of enrollment, other areas of the college suffer.

Changing student interests have also prompted a re-examination of the college's academic program. As part of the regular self-study prior to the re-accreditation review last spring, the faculty examined our curriculum and sought ways to improve it. To my mind, one of the best outcomes of the curriculum study was to re-affirm the value of a liberal education, thereby resisting the trend toward vocationalism prevalent at many colleges. But we also realized that we needed to respond to the legitimate needs of our students who seek to be prepared for careers after they graduate from Ursinus. To do this, we realized that our students needed to be able to improve their marketability in the business world which often is skeptical of a liberal arts education.

One specific change to help improve the quality of our students' education was to introduce minor concentrations. Minors are sets of courses that are related in subject, discipline, or career-direction. They usually consist of 15-18 semester hours of coursework, and

they are usually elected by students during their junior and senior years. Our intention was to help students choose their electives by offering them packages of related courses that might either respond to their interests or help them prepare for a career. In particular, minors should help liberal arts graduates with majors in the humanities, social sciences, and sciences combine a liberal arts education with some career-oriented preparation.

As might be expected, the greatest interest has been in minors that will help prepare liberal arts students for careers in business. The economics and business administration department has created four business-oriented minors—accounting, business administration, finance, and management science—along with a minor in economics. Student response to these minors has been immediate and sizeable. Partly as a result of the introduction of minors this year, total enrollment in economics and business administration courses is up about 40% over its level one year ago. While this growth is exceptionally large, continued growth is expected over the next few years as more students become aware of the advantage of combining a liberal arts education with a minor in a business-oriented area.

The increased interest of Ursinus students in business administration has led to staff and curriculum changes in the department. We have been fortunate in being able to attract new faculty who combine an academic background with business experience, thereby enhancing the quality of our business offerings. I hope and expect that this trend will continue with the addition of more experienced faculty in the business administration area in the coming year. In addition to faculty, we are also altering our curriculum in order to prepare our students better for entry into business careers. We are making more extensive use of the case study approach to learning.

We are strengthening the quantitative components of our program and looking to integrate the use of the computer as a tool for business decision-making. And finally, we are hoping to introduce a new course in business policy that would help students synthesize their education in business administration, give them experience in handling business policy questions that they are likely to face, and bring them into contact with area business executives who regularly confront similar types of problems.

This is an exciting time for the College. We have an opportunity to create a strong program in business administration and add another reason for students to come to Ursinus. I am proud of our accomplishment to date, and I look forward to the future growth and development of our business program. And I am particularly proud of the fact that, unlike so many other colleges, we retain our commitment to a broad-based liberal education while still meeting the career needs of our students. I remain convinced that a solid liberal education in the humanities, social sciences, and natural sciences, combined with a foundation in the business administration areas, provides students with the type of education that will best serve their own needs and those of society as well.

by Dr. John D. Pilgrim

A first in forecasting

Gordon Tait, '53, will trade the comforts of his office at the National Weather Service in Philadelphia for six weeks of ice and snow in Lake Placid this winter.

The official news release from the U.S. Department of Commerce describes him as "an accomplished amateur skier." Gordon Tait, '53, describes himself as "an old guy on skis." Regardless of his schussing talents, Tait's forecasting form must be nearly flawless because he has been selected to head a special weather team to support the U.S. Winter Olympic Committee activities at Lake Placid, New York.

Tait, a native of St. Clair Shores, Michigan, has been a lead forecaster with the National Weather Service Forecast Office in Philadelphia since 1970. Prior to that, he was a meteorologist with the Department of Defense for ten

years, a research meteorologist with Lockheed Aircraft Corporation, and an Air Force weather officer stationed in Korea. He explained that while he had always had an interest in natural sciences, it was Dr. Frank L. Manning, professor of mathematics at Ursinus, who steered him towards a career in weather forecasting. "Professor Manning urged me to apply for the program at Oklahoma A & M University. I did and was accepted," said Tait, "I've always been grateful for that direction."

Tait feels that he entered meteorology at just the right time. "Today there aren't as many opportunities for individuals graduating with degrees in meteorology," Tait stated. "The development of labor-saving forecasting equipment has cut down on the need for people," he explained, "The time has come for meteorologists to sell the public and the government on the need for more specialized forecasting services."

According to Tait, the 1980 Olympiad may be the vehicle to do just that. When the International Olympic Committee selected Lake Placid as the site of the 1980 Games, the Lake Placid officials contacted the National Weather Service Station in Albany, N.Y. requesting their support. The Albany Forecast Office passed the request on to their headquarters, the National Oceanic and Atmospheric Administration (NOAA). NOAA responded by conducting a search for qualified forecasters from among its personnel in the forecasting offices located in key cities throughout the northeastern United States. Tait, who is a winter sports enthusiast and has had experience in mountain weather forecasting, was selected to head the team of four forecasters, three from NOAA and one from the New York State Department of Environment Conservation.

For six weeks last winter Tait and his team operated from a temporary office in Lake Placid. The office, via four teletypes and a

facsimile machine, was hooked up to the National Weather Service headquarters in Suitland, Md., a suburb of Washington, D.C. Working twelve hour shifts, the forecasters interpreted the incoming information, checked their own instruments, and received reports from volunteers who regularly checked the many instruments strategically placed around the 150-square-mile Olympic site. From all this information, the special team provided a morning and evening forecast tailored to the Lake Placid community containing all the information the world class competitors, local traffic officials, and thousands of spectators required. This February, the process will be repeated.

"The World Cup Games were a dry run for our team as well as for the Lake Placid facilities," Tait explained. The International Olympic Committee requires that all facilities to be used in the Olympic Games must be utilized in a world class competition at least a year in advance of the sports world's biggest event.

Tait admitted that his team encountered a few difficulties in last February's World Cup Games. "We placed a wind velocity instrument next to the speed skating rink and discovered that the snow plows had buried it by the following day," Tait laughed, "But, once we taught the volunteers not to breathe on the instruments while they took the readings, we were on our way."

The people of Lake Placid were amazed by the usefulness of the NOAA forecasts. In previous world class competitions, each team brought its own weather specialist; never before was such detailed information as that of the NOAA satellite office available to the athletes and their coaches. Twice each day a member of the forecasting team addressed a meeting of the directors of competition from the participating countries. The weather briefings and resultant question and answer sessions were

then translated into French and German. Some teams wanted extremely detailed information, according to Tait. "Some ski jumpers feel that they can improve their distances by adjusting their skis according to the buoyancy of the air," Tait explained, "In general, ski jumpers are interested in the direction and velocity of the wind at the take-off point. Downhill and slalom skiers are worried about icing conditions and visibility. Cross County skiers want to know snow temperatures to determine the kind of wax to use; they are also particularly concerned with the wind-chill factor and the danger of frostbite."

With temperatures that dip to 30 degrees below zero (Fahrenheit), frostbite is a real danger for the 300,000 or more spectators who are expected to attend the Olympic Games. While the Lake Placid officials are well prepared for the light snow that falls constantly in the resort community, they are concerned about the safety hazards that an extreme snowfall

or, worse, a thawing and refreezing would create. In February they will be relying on Tait and his team for advance warning on potential problems.

With all these responsibilities, Tait and his associates saw few of the World Cup events last winter and anticipate seeing less of this year's Olympic competitions. "Our equipment is not exactly where the action is," mourns Tait. "Nevertheless it is a tremendous honor to serve the Olympic Committee."

Even though he missed the actual event last year, Tait did have the opportunity to try out the men's Olympic downhill course. From February 13 to the 24th, 1980, athletes who have invested a lifetime in training for their moment on the icy slope of Whiteface will be negotiating those treacherous angles and exposed rocks in less than two minutes. While it took Gordon Tait, that "old guy on skis", more than twenty minutes to descend the course, he is just as proud of his part in the 1980 Olympics.

Gordon Tait (far right) and his associates, Jack May, Steve Harned, and Richard Taylor, will return to Lake Placid for the 1980 Olympics.

A liberal arts education cannot be obtained solely in the classroom or from a textbook. Ursinus has accepted, as part of its mission, the task of exposing its students to art, culture, and the latest in political and moral issues. The responsibility for providing an enriching program of events on the Ursinus campus falls to Dean of Students Ruth Rothenberger Harris, '36. Aided by her committee of nine students and eight faculty members, she ar-

ranges six varied and interesting Forum programs each semester. All students are required to attend at least two of these programs for six of the semesters they spend at the College.

The Forums are staggered throughout the semester with both day and evening times provided to insure that every student will have an event that is convenient for his or her schedule.

The first Forum of the fall semester featured an alumnus, Lt. General Raymond B. Furlong, '46, former commander of Air University, Maxwell Air Force Base, Alabama. General Furlong addressed a packed Wismer Auditorium on the subject, "If I had known then what I know now." In his hour-long program, General Furlong urged all students, regardless of major, to learn to read and write well and to become involved in extracurricular activities. According to the General, "Perhaps the most valuable knowledge I gained at Ursinus College was that of how to work with and for others . . . I learned how to be accepted in an organization, how to detect whether I was being motivated or manipulated, the satisfaction of being part of a group or in directing a group in the accomplishment of a common and proved objective." General Furlong also

Cynthia Raim gave a workshop in Bomberger Auditorium preceding her concert appearance at Ursinus.

urged the students to "recognize and give attention to the development of values." He pointed out that arriving at a set of personal values is a different task for today's youth, but emphasized that Ursinus advanced values and ethics worthy of the students' consideration.

The subject of ethics was central to Forum speaker Tabitha M. Powledge's discussion of "Moral and Political Dilemmas in the New Genetics." Ms. Powledge, who is associate for Biosocial Studies at the Hastings Center Institute of Society, Ethics, and the Life Sciences in Hastings-on-Hudson, New York, delved into the subject of genetic research, touching on such issues of clinical ethics as the potential uses of amniocentesis, the question of sex selection, and the possibilities of DNA recombination.

Other fall Forum speakers included William (Bill) Giles, executive vice president of the Philadelphia Phillies professional baseball team, who gave the campus community a glimpse "Behind the Scenes in Professional Sports."

Tom Key, author, director, and actor, presented "C. S. Lewis on Stage" in Bomberger Auditorium. The one-man show took the audience to the study of the celebrated author of books on religion and fiction. Mr. Key's professional credits include leading roles in *Oedipus*, *The Fantasticks*, *Carnival*, and *The Bloodknot* both in New York and in regional theatres. In addition to authoring a play based on John Bunyan's *The Pilgrim's Progress*, which has enjoyed two successful productions, Mr. Key directed the Birmingham Children's Theatre's 28th season.

Through a grant from the Presser Foundation of Bryn Mawr, Pa., and through the courtesy of Jim McClelland, Director of the Concert Division of the Academy of Vocal Arts, Ursinus is able to bring the Young Artists Series to the College campus. Three Forum

Lt. Gen. Raymond Furlong, '46, fielded questions from students at a coffee break held following the first Forum of the year.

productions each year are entries from this organization. Ursinus was particularly fortunate to host pianist Cynthia Raim in concert on November 1. Miss Raim, who was a soloist with the Pittsburgh Symphony, won The Clara Haskil Piano Competition in Switzerland in October. In doing so, Miss Raim became only the second American to win the prestigious biennial prize. Before her 8 p.m. concert appearance, Miss Raim conducted

a workshop for interested students.

Dane Anderson, a cellist who performs regularly with the Philadelphia Opera Company, the Young Audience Quartet, the Philadelphia New Music Group, and the Pennsylvania Chamber Ensemble, is also scheduled for a workshop/concert appearance at the College on November 28.

All Forum programs are free and open to the public.

Glenn Zweygardt, outdoor sculptor, will appear at Ursinus in February.

Diana Zweygardt

Church-College Colloquium

Briefs

President Richter was one participant in a meeting between members of the faculty and staff of Ursinus and pastors of the Pennsylvania Southeast Conference, United Church of Christ. The Church-College Colloquium, which took place on campus on October 6, 1979, was called to examine the common mission and purposes of the College and the Church and to determine what services or actions the two organizations can provide for one another.

Something new has been added

A new program, "Applied Mathematics/Economics," is being offered as a major at Ursinus College for students planning on a business career.

The announcement reported that, in the past few years, there has been an increasing demand in the business job market for students interested in business who have a solid mathematical background.

Applied Mathematics/Economics is a response to this trend. It is designed to satisfy the needs of the math-oriented student who wants to go

either directly into the business world or take graduate business training.

This new program is an interdisciplinary major offered jointly by the department of mathematical sciences and the department of economics and business administration.

It consists of a core of courses in calculus, linear algebra, computer science, statistics and economics principles.

Beyond this core, a student will take a seminar in mathematical economics and advanced courses in two of

three areas: mathematics, computer science, and economics and business administration.

Ursinus professors Peter Jessup and John Pilgrim, who are responsible for the new major, said that although it is a new program, Ursinus graduates in the past with similar training have taken positions as systems analysts, market analysts or management trainees, and some have gone on for the master of business administration degree at institutions such as the Wharton School or Lehigh University.

Continuing education continues to grow

The Continuing Education Department, created last year, continues to expand its services. A new facility in Pfahler Hall will include an Evening School Lounge and private office space for professional counselors, who will be on hand four nights a week to provide information and advice to current and prospective students.

Dr. Erlis Glass, director of special programs and visiting professor of German, has been involved in establishing continuing education programs with special appeal to women. One

such program, "An Autumn Experience: Architecture and Interior Furnishing in Collegeville" was held during the month of October. Art instructor Theodore Xaras utilized lectures, slides, and field trips to explore historic homes in the Collegeville area during the four-part mini series.

Another special entry on the Continuing Education Calendar was "Investment Planning: Securities and Real Estate", conducted in cooperation with the investment firm of Butcher & Singer, Inc. On November 10, Claire

Longden, a certified financial planner and a vice president with Butcher & Singer's New York office, and Stephanie Landau, city planner in the firm's Philadelphia office, presented an overview of personal financial planning and investing. Their program, prepared primarily for the female investor, focused on such topics as evaluating one's financial position, anticipating future needs, investing for tax savings, and evaluating insurance programs and estate planning.

College gets valuable volume

Under the terms of the will of Jacob Foose '32, Ursinus College made first selection of books from his estate. Mr. Foose, a native of York, Pennsylvania, worked as an editor for the International Correspondence School in Scranton, Pennsylvania.

The most unusual item in the collection is a devotional by saint Bonaventure, *Dieta Salutis*, printed in

Venice, by Petrus Johannes, in 1497-98. The book is highly valued as an incunabulum, dating from the infancy of printing.

A lexicographer by avocation, Mr. Foose collected dictionaries for his personal library. In this collection were the second and fourth folio editions of Samuel Johnson's *Dictionary of the English Language* (published in 1756

and 1773). An almost complete collection of Noah Webster's dictionaries includes the first edition in 1828.

There are many standard editions of contemporary literary works and fine arts folios in the collection. Over 200 volumes will be added to the library due to Mr. Foose's thoughtfulness and generosity.

East meets West

The visiting students adopted traditional Ursinus garb for the barbecue they shared with their homestay hosts.

This August, for the seventh consecutive year, Ursinus hosted students from its sister institution, Tohoku-Gakuin University in Sendai, Japan. Thirty-six students, the largest exchange ever to visit the Ursinus campus, participated in the three-week American Studies course, which was directed by Dr. Joyce Henry, associate professor of English, and Dr. S. Ross Doughty, assistant professor of history.

The course, which included trips to Valley Forge and Independence Hall in Philadelphia, was sponsored by the Council on International Education Exchange on the United Nations. The students, who were all college juniors at Tohoku-Gakuin University, began saving for their trips to America as freshmen.

While their coast-to-coast tour of the States included visits to many major cities and stops at numerous historic sites, the weekend "homestays" with Colledgeville families was the favorite item on the tour agenda, according to Tsutomu Suzuki, program coordinator.

Tohoku-Gakuin University was founded in the late 1800's by missionaries from Lancaster, Pa.; it has now reached an enrollment of approximately 22,000 students. Dr. Philip Williams, former adjunct professor of English at Ursinus, now serves on the faculty of Tohoku-Gakuin and was instrumental in establishing the exchange program.

Eilts honored

Herman F. Eilts, '43, who served as U.S. ambassador to Egypt from 1973 until 1979 and ambassador to Saudi Arabia from 1965 until 1970, received the 1979 Joseph C. Wilson Award for Achievement in International Affairs. The award is given to the American citizen whose sustained contribution to international understanding and quality of life includes recent achievement of unusual and lasting significance. Ambassador Eilts retired from the Foreign Service earlier this year to join the faculty of Boston University, where he is now a University Professor of international relations and research professor of history and political science.

News notes will next appear in the Spring 1980 issue of the Ursinus College Bulletin. Send your news in today.

Fall Board meeting report

Meeting for the first time under the new leadership of Dr. John H. Ware, III, the Ursinus College Board of Directors met on October 28, 1979, in the Board Room in Corson Hall for its regular fall meeting. The Board approved new rates for tuition and room and board for 1980-81 and took other significant actions.

The rate for tuition in 1980-81 was set at \$4,000 and for room and board at \$1,750, up from \$3,600 and \$1,550, respectively, in 1979-80. While keeping up with the increased cost of operation created by inflation, the new rates will continue to be in the lower range among those of comparable independent colleges in Pennsylvania.

Also approved were increases in Evening School rates from \$55 to \$62 per semester hour, in room deposits from \$10 to \$50, and in the late fee from \$10 to \$20.

President Richard P. Richter commented that the Student Financial Aid Director, Richard W. McQuillan, will work closely with students and their families to assure that those with

need are able to enroll in 1980-81.

"The College Board of Directors took action early," Richter said, "so that families will be able to meet next year's application deadlines for state and federal aid programs.

"The long lead time also will enable the College to lay plans for increasing its own funds." Many colleges do not announce charges until late spring or summer.

In other actions, the Board of Directors —approved the reopening of the Hall of Fame for Athletes, with a target date for induction of Founders' Day, 1980. A new procedure will base final selections on the balloting of alumni.

—approved a policy statement calling for the expansion of computer facilities. The Board approved a proposal to the National Science Foundation for funding expansion provided that expenses projected beyond the grant period are predictable and manageable from College sources.

—received a development report that more than \$3,940,000 in gifts and

pledges were credited to the four-year fund-raising program, ADVANCE URSINUS 76/80. The Board recognized that the goal of \$4.4 million set in 1976 ought to be surpassed as much as possible to make up for inflation.

—approved aid grants up to one-half of tuition for special students in their first 15 semester hours of credit. The grant provision is intended to encourage the return to enrollment of adult students, particularly women.

—approved the designation of 785 Main Street as the Marjorie D. Elliott House in memory of the late wife of Board member William Elliott. The President and family reside at this address.

—ratified the purchase of 26 West 6th Avenue, the former home of the late Professor Russell Sturgis.

—received information that, through conservation efforts, the College cut consumption of #6 fuel oil from 478,000 in 1977-78 to 428,000 gallons in 1978-79. The cost, however, rose by 10 per cent.

Mark your calendar for The All-New Alumni Weekend May 16 - May 18, 1980

The weekend will include:

Friday -
Golf match
All-Alumni reception
Dinner

Saturday -
All Association Annual
Meeting and Luncheon

Sunday -
Memorial Chapel Service

Plus -
Reunions for
1930 1936-41
1935 1945

You'll receive details and your reservation form in the mail.

Homecoming

October 27, 1979

Cameramen crowded around Pam Roediger, '80, **top right** an English major from Rydal, Pa., who was named the 1979 Homecoming queen. Pam represented Zeta Chi fraternity. Marge Johnston Watson, '52, **top left** was the co-recipient of this year's Bruin's Club Award. **Left** Dave Garner, '81, led the pack for the entire distance to break his own cross country course record as Ursinus scored victories over Moravian and Albright. Quarterback Craig Walck, '81, threw for two touchdowns and ran for another as Ursinus defeated Lebanon Valley in football by a score of 36-13. Nick Sabia, '82, safety, received the Walker trophy as outstanding player of the game. **At left** Bruins Club President Norm Callahan, '42, (left) presented former head Bruin Ben Maliken, '54, with a special award for his years of service to that organization. **Bottom left** Jim Moyer of the College staff, co-recipient of the 1979 Bruin's Club Award waits to congratulate John Curley, '80, a biology major from Holland, Pa., who was named as the first winner of the Bruin's Club Scholarship for an outstanding scholar-athlete. Gina Buggy, '81, received the Linda S. McIntyre Award. **Bottom right** Reunions followed the day's activities. Patti Russell Earhart, '67, John Gabel, '68 (center), and Joe Hagy, '67, seemed to have a good time at the special reunion held for the classes of 1966-71.

News Notes

1918 Gilbert A. Deitz and his wife, the former **Anna Beddow**, '20, celebrated their fifty-fifth wedding anniversary on July 26, 1979. Mr. and Mrs. Deitz are residents of the Homewood Retirement Center in Hagerstown, Md.

1923 Irene R. Jones has moved to Suncoast Manor, a retirement community in St. Petersburg, Fla., where she resides with her sister.

1926 Chester L. Brachman is serving as interim pastor of First United Church of Christ in Greensburg, Pa.

1927 Naomi Brong Werkheiser, who spent many years helping her husband, The Reverend Bertram Werkheiser, and twenty-five years teaching in the Philadelphia Public Schools, has retired and is now living in Rydal Park, a retirement community in Rydal, Pa.

1928 Cora Gulick Hedrick sent the following notes on her classmates: **Paul Felton** and his wife, Peg, have traveled extensively; their travels have included trips to Alaska, Ecuador and the Galapagos Islands. Last summer they visited one of their sons and his family, who make their home in Kailua Beach, Hawaii. Paul and Peg go square dancing once or twice a week whether they are staying at their Pittsburgh home or living at their Jensen Beach, Florida address. Paul also plays golf several times a week, weather permitting. Cora adds that many members of the class have sent gifts to the college for

the purpose of beautifying the campus with the addition of flowering trees and shrubs. She thanks all those in the class who have participated in this project.

1938 Elizabeth Ware Toner reports that her husband, Harry, died on February 4, 1979.

1942 Dr. Frederick M. Binder, president of Juniata College, has published a book review in the July 1979 issue of *The Pennsylvania Magazine of History and Biography*. Dr. Binder, who is a published expert in the field of coal and its impact on Pennsylvania, reviewed H. Benjamin Powell's book, *Philadelphia's First Fuel Crisis: Jacob Cist and the Developing Market for Pennsylvania Anthracite*.

1943 Leon L. North M. D. has been appointed clinical associate professor of psychiatry and human behavior at Jefferson Medical College.

1946 Dr. Irene Suflas Jameson has been named as desegregation information specialist for the School District of Philadelphia.

1948 Jerome M. Cotler, M. D. and his son, Howard, made history during Class Day exercises at Thomas Jefferson University when both father and son were awarded citations in the same field—orthopedic surgery. Dr. Jerome Cotler, a clinical professor of orthopedic surgery at that institution, was awarded the Christian R. and Mary F. Lindbach Award for Distinguished Teaching. Dr. Howard Cotler, who attended Ursinus from 1971-1973, received the degree of doctor of medicine during the school's commencement exercises, graduating with an honorable mention prize in orthopedic surgery.

1949 James J. Lorimer, CPCU, has been elected vice president of government relations for the Columbus, Ohio-based Nationwide Insurance Company. He was formerly government affairs officer with that firm. Mr. Lorimer holds a law degree and has served as a special FBI agent. He is also serving his sixth term as mayor of Worthington, Ohio, a suburb of Columbus.

1950 Elizabeth Haney Picker, painter and poet, was one of the featured artists in the *Public Access*

to the Arts program which was sponsored by the Camden County (N. J.) Cultural and Heritage Commission in July. Mrs. Picker studied at Drexel University, Pennsylvania Academy of Fine Arts, and the Barnes Foundation. She has participated in many exhibits and her awards include one from the 1973 Drexel Alumni Art Show, one from the 1975 Pinelands Art Show, and the Albert N. Lalli Memorial Prize at the 1979 Davinci Art Alliance.

Francis X. Pirazzini received an Honorary Doctor of Divinity degree at Eden Theological Seminary, Webster Groves, Mo., at Commencement exercises held on May 25, 1979.

Joseph W. Simpson, M. D., suffered a myocardial infarction last July and faces possible bypass surgery later this year. Despite his health problems, he remains optimistic about the future.

1951 William H. Braun, a mathematics supervisor at Three Village schools, Setauket, N.Y., and an adjunct associate professor of Mathematics at Suffolk County Community College in Secden, N. Y., is also an executive member of the board of Suffolk County Association of Math Teachers.

Marjorie Taylor Coleman, the recipient of a Master's degree from George Washington University in 1974, is currently teaching Social Studies in grades five through eight at Our Ladies of the Woods Academy in Bethesda, Md.

James J. Duncan has been appointed director of Personnel for Newcomb Hospital in Vineland, N. J., where he will be responsible for the development and administration of a human resource program.

1953 Donald and Elsie Gruber Devonshire have recently moved to Waukesha, Wis. Don was recently promoted into the Commercial Equipment Builders' Department of Mobil Oil Corporation, and has obtained his Professional Engineer's License from the State of Wisconsin. Elsie is actively engaged in the musical education of children and in the publication of books of poetry. Don and Elsie enjoy an occasional get-together with **Dr. John and Joan Higgins Popowich, '54**, who reside in Minneapolis.

Dr. John R. Lovett, vice president for research for Air Products and Chemicals, Inc., addressed a symposium at the American Chemical Society meeting in Washington recently.

James J. Lorimer, '49

1954 Floyd G. Fellows, Jr. has retired from teaching in the schools in New York State and will be teaching in a private school in Sarasota, Fla. He is writing another series of books on the subjects of handwriting, mathematics, and reading.

Edward G. Sella, life insurance specialist, has been appointed manager of a Mutual of New York (MONY) Agency in Baltimore, Md. He was formerly associate manager of the Baltimore-Stern Agency.

Thelma Mellnik Wesner is working as a legislative assistant for the National Credit Union Administration in Washington, D. C.

1955 Marilyn Freeman Lamb has returned to teaching health and physical education. Her son is a senior at Albright College, and her daughter is a sophomore at Slippery Rock State College. Marilyn's daughter, who is majoring in health and physical education, qualified for the swimming nationals in her freshman year at Slippery Rock.

1956 Arlin D. Lapp was elected president of the Indian Valley (Pa.) Chamber of Commerce for the 1978-79 year.

1958 Anne McKey Batchelder is now a casting director for BCI Casting in New York and Los Angeles. She has already worked on commercials for Schmidt's Lite and Fedder's Air Conditioners.

Edmond G. DeLuca, the recipient of a Master's degree and a Ph.D., has been nominated to receive the Valley Forge Teacher's Medal. He has also been promoted recently.

1959 Carolyn Carpenter Clarke entered Andover-Newton Seminary in September to prepare for the Christian ministry. She will relocate in Newton, Mass., with her husband and their three children while she attends the Seminary.

Dr. Carol Williamson has been appointed associate dean of students' affairs at Salisbury State College, Salisbury, Md. Dr. Williamson received her Master's degree from the University of Pennsylvania and her Ph.D. from Syracuse University.

Cherrie L. Soper, an associate professor of speech at Indiana State University, plans to travel in South America during a sabbatical leave in the spring semester of 1980.

The Editor regrets that the Summer 1979 issue of the Bulletin inaccurately stated that the late Alice Irwin Young was employed

as a legislative assistant for the National Credit Union Administration. Mrs. Young died on August 3, 1979, following a long illness. Prior to her illness, she had served as a part-time instructor of physical education at the Holton Arms School.

1961 John B. Gartner has been upgraded to the rank of captain for Continental Airlines. He and his wife, Sheila, make their home in Del Mar, just north of San Diego, Calif.

Sharyn Sands Seasholtz has been appointed full-time instructor of chemistry at Framingham State College for the 1979-80 academic year.

1962 Georgia Billger taught at the third annual Seashore Hockey Day Camp last August. She was one of the organizers of the successful camp.

James A. Minnich and his wife, Barbara, took a trip to Hawaii last fall and treated their daughters, Sara and Helen, to a tour of Disney World last spring.

1963 Susan Highley Bray, M. D. is a member of the staff at Chestnut Hill Hospital where she handles cases in nephrology and internal medicine. She is also clinical assistant professor of medicine at the Medical College of Pennsylvania (MCP) and is also co-director of a hypertension center there. Dr. Bray is past president of the alumni association of MCP and serves on MCP's board of corporators.

Clifford C. Kuhn, M.D. and his wife, **Constance Laughlin Kuhn, '65**, are living on a farm, trying the country life. Dr. Kuhn is the director of residency training for the University of Louisville Medical School.

1964 Paul C. Sparks, M. D. opened an office in South Boston, Va. for the practice of orthopedic surgery in September, 1979.

1965 Gary Boens is vice president and account supervisor for Wyse Advertising in New York City.

Dr. Jerry B. Duvall was one of two new vice chairmen named to the board of trustees of Montgomery College in Damascus, Md. Dr. Duvall is an economist with the Federal Communications Commission. Prior to joining the FCC he was assistant professor and chairman of the department of business administration and economics at Montgomery College.

Valerie Moritz Smith has just returned from living in England for one year where her husband, Jay,

was an exchange teacher through the Fulbright program of the Department of HEW. She reports that they had a wonderful time and had an opportunity to tour seven countries.

1966 Ruth Heft Griffith is working as a systems analyst for National Steel and Shipbuilding Co. in San Diego. She received the Bachelor of Science degree in computer science from Coleman College, San Diego, Calif. in August, 1979.

1967 Harold "Bud" Krum has been named as head basketball coach at Perkomen Valley High School in Graterford, Pa. He previously served as J. V. basketball coach at the same school.

Dr. Harriet Taylor, assistant professor of chemistry, has been named as coordinator of sciences and mathematics at the Hamilton Campus of Miami University.

Susan Hartenstine Wolf holds a Master's degree in deaf education from Gallaudet College and is a certified interpreter for the deaf. She is currently teaching in a public high school program for the hearing impaired in Staten Island, N. Y. where she lives with her husband and two children, ages three and six.

1968 Charles R. Parker received the Master of Arts degree from Rutgers, State University (of New Jersey) on May 24, 1979.

Robert E. Steward, Jr., M. D. has joined the Moshannon Valley Medical Center and the Phillips State Hospital, Phillipsburg, Pa. Dr. Steward was certified by the American Board of Surgery, Inc. on January 15, 1979. He was an officer in the U. S. Army Reserve and is a member of the Association of Military Surgeons of the U. S.

1969 Perry Benson, Jr. is employed by the architectural firm of Dagit/Saylor in Philadelphia, Pa.

John Corbin is a staff psychologist at the FDR Veterans Administration Hospital in Montrose, N. Y. and adjunct lecturer in psychiatry at New York Medical College in Valhalla, N. Y.

Diana Krusen Kaplan has left her post as children's librarian at Pottstown (Pa.) Public Library to begin a career in Montessori education at the Montessori Academy in Boyertown, Pa. Mrs. Kaplan planned and designed the children's department of the Pottstown Library and created a program of regular activities for her youthful clients. In recognition of her activities, she was

named 1975 Outstanding Young Woman of the Year by the Pottstown Jayceettes.

Sharon Thomas Safford was reassigned as a 1st lieutenant USAF Reserves to the 544th Intelligence Wing at Offutt AFB, Nebr.

1970 Terrance H. Jones, M. D., who completed his residency in family practice at Lancaster General Hospital (LGH) last summer, has joined the staff of that hospital; he has also entered family practice at the Family Health Center in Manheim with colleague Eugene K. Engle, M. D. Dr. Jones received a Master's degree from Rutgers University in 1972 and his Medical degree from Rutgers Medical School in 1976.

Frederick L. Kreamer has been named general manager of the American Parts System distribution center in Harrisburg, Pa.

Michael H. Wojtanowski, M. D. is entering his last year of residency in plastic and reconstructive surgery at Case Western Reserve University Hospitals in Cleveland, Ohio. He also completed his general surgery residency at University Hospitals of Cleveland.

1971 R. William Taylor, M.D. has joined Dr. Joseph A. LaCavera, Jr. and Dr. Richard A. LaCavera in the practice of family medicine in Elmer, N. J. Dr. Taylor completed his medical education at Philadelphia College of Osteopathic Medicine and did his internship at the United State Public Health Service Hospital in New Orleans, La. He completed his first-year residency program at Wilmington Medical Center last summer.

Ellen Francis Wemark has been promoted to engineering aide in the drilling department with Sohio-BP Alaska Production Division of Sohio.

James A. Williams spent several weeks last winter working with a team of five Egyptian secondary school teachers on a course in American history. As the American consultant and advisor, Mr. Williams prepared a course outline. The course is scheduled for incorporation into the Egyptian secondary school curriculum. The Egyptians' working visit was funded by the U. S. State Department as part of a program to improve relations with Egypt. The project was directed by the Bucks County organization of Intercultural Advancement.

1972 Nicholas Roush was awarded a Master's degree in social work and

criminal justice by the University of Pennsylvania in May 1979.

Barbara Dando Snavelly is supervisor for the program for education of gifted/talented students in Manheim Township High School in Lancaster, Pa.

1973 Beth Anders was a member of the United States Women's Field Hockey Team that went to Vancouver, British Columbia, for the World Cup Games last August.

1947 James S. Weaver died October 5, 1979.

1949 Paul V. Jones died April 13, 1979.

1959 Alice Irwin Young died August 3, 1979.

1967 John C. Mathers died July 24, 1979.

Ursinus College Bulletin

Collegeville, PA 19426

Address Correction Requested

It costs more to fill it up.

For almost four years you have read about **ADVANCE URSINUS 76/80** and the \$4,400,000 goal that must be met to implement the physical plant improvements, to support faculty salaries, to increase student scholarships, and to supplement the College's operating income. Since that goal was set in 1976, inflation has spiralled. To carry out all the programs the College has outlined, your continued support is needed. To keep student costs within reason and to provide scholarship assistance to deserving students, to insure that the College's faculty will keep pace with their counterparts, and to maintain the beauty and facilities of the campus, the \$4,400,000 goal will have to be met and exceeded. With more than \$3,958,967 reported in gifts and pledges by November 1, 1979, there is still time, before June 30, 1980, to top-off **ADVANCE URSINUS 76/80** with your gift.
