Meistersingers - More Than Music

By BILL LEAVER

On Friday, April 13, forty-seven Ursinus students carrying suitcases, suitcases, suitcases, and suitcases entered the campus to start the annual spring tour. The tour included a bus for a five-day musical excursion to the New York area, leaving on an annual spring tour.

This year’s touring singers’ list included: Mary Janes, Port Campus, and York City. Traveling was the highlight of the tour, as people who had been in a group and home cooked meals were provided for by members of the congregation.

The concert program varied in style; music ranged from classics such as Bach’s Choral to a modern day melody from the musical “Guys and Dolls.” The associate music director led the students to savor the diverse tastes and penetrate the emotions of the audience. The tour group was together for the first time in over a week, during their journey, the tour group received its approval with applause that demanded the group to continue and invite all students to join.

The tour ended on the sixteenth day, but the Meistersingers will not forget their trip with the young people on the improbable tour, putting its first record this May. A record may be purchased for $1.00 to benefit the tour of the college will be presented at the spring concert of the Student Concert Band of the New York City Center.

The Meistersingers also had fun with hard work. Numerous side activities were planned for the tour, but in the end with candid camera photography, prior preparations for the traditional Meister’s wedding included a bridal shower and a bachelor’s party; the ceremony was held in the Ursinus Chapel.

Two key members of the tour were David Spoko and Nina Finn. The conductor and assistant director of the tour were both in the singer’s heart, and was accompanied by a glistening emotion in their eyes. Special feeling also came across their voices, for the group conveyed their dedication and enthusiasm in every note they sang. Special recognition should be given to President and Student-Coordinator David Spoko for his ability to generate this emotion from the group not only when he performed, but throughout four years of Meistersingers.

Meistersingers will experience this tour each year and with each tour, the group will become more aware of fire procedures, especially in light of the growing fire conscious community.

The tour was a unifying experience where different people learned to live together and perform as a group. A special bond which only women’s choruses are able to experience is found in the singer’s heart, and was accompanied by a glistening emotion in their eyes. Special feeling also came across their voices, for the group conveyed their dedication and enthusiasm in every note they sang. Special recognition should be given to President and Student-Coordinator David Spoko for his ability to generate this emotion from the group not only when he performed, but throughout four years of Meistersingers.

Editorial

Disgust—By The Students:

Of The Students!

The time of year we are presently experiencing is one of triumph and of change. After what has seemed a long academic struggle, students are again confronted with the most difficult part of a semester, when pressures and anxieties come close to overstressing the students. Students cannot work hard enough, study long enough. Many students are drained of any substance or energy previously at their disposal. While attempting to output, minds and bodies find themselves in a continually prepared state. The amount of energy they are trying to output and the effect on them can only be designated as a disgrace. Other responsible demands as much, if not more, time and attention.

There is a tendency to select the paper since it has many appropriate examples, which never seem to be resolved. Last week's issues, consisting of only two pages, was riddled by some, because of the effort to cut down to a more reasonable amount. Few people can contribute will compensate for the apathy and unjustifiable criticism of most other students, who merely live to know whether the editor requires another issue.

The point is that we will not publish more for a certain week than we feel is worthwhile, and we certainly cannot publish any more than we have. We are taking many steps to improve the paper, but we are still facing less problems regarding unfamiliarity. Therefore, criticism by those who are more unfamiliar and do nothing but criticize will not save us from the apathy and unjustifiable criticism of most other students, who merely live to know whether the editor requires another issue.

Letters to the Editor remain a problem. People seem to be utilizing it as a mode of expression for any grievances they may have. In some respects, this is its position. However, an almost constant stream of letters is received to the effect that we have not published, or have not published in a timely manner, the requested articles. This follows the general policy of anyone who effectively seeks change. Responsibility must be acknowledged before a work is significant enough to merit the time and respect of others.

I am in no other group of people trying to provide others with a service deserves a little more consideration than many Ursinus organizations do. The Weekly is one of many, and we are thinking of them as well as ourselves. Any person or group of persons trying to provide others with a service deserves a little more consideration than many Ursinus organizations do. The Weekly is one of many, and we are thinking of them as well as ourselves.

Actors' Comment

By ALAN K. STELTER

Along with the numerous students involved in the ProTheatre Project, the administration was interested in having staff of Ursinus join in the business without really trying. The theatre, or administrative units, in which the students reside, and the quality of the wardrobe and the staff of Ursinus, a list in the business. The large number of students and staff that were involved in the project had created a problem for the administration. The students were not interested in the business, but had been rather frightened. The administration had found a way to deal with this problem. So-called "conflicts" are regular and necessary, and the students are not to be blamed. The administration has a responsibility to plan the program. And the administration will make sure the students have an opportunity to plan the program. As the administration will make sure the students have an opportunity to plan the program.

Q. How satisfied are you of the sports programs at Ursinus?

A. There should be changes in the administration of men's track, and baseball, money is needed for the first year of the varsity sports on campus. There is obviously a need to improve the facilities, as well as the bad points of the U.S. administration. There are things about this program that are not good for us.
