Richter Hails USGA Proposal As "Primary Document"

Ursinus faculty members belonging to Phi Beta Kappa, the national honorary fraternity, comprise a group known as The Chapter. Each spring the Chapter selects those seniors whom they feel would be qualified to join Phi Beta Kappa. The students upon whom this honor is conferred are awarded the title of "Chapter Scholars." They are chosen on the basis of having demonstrated depth and breadth of scholarship, intellectual attainment and academic interest. The following seniors have been chosen as this year's Chapter Scholars:

Alan Stotler is an English major from Spring Glen, N.Y. who was the editor of the Weekly this past year, took part in the pro Theatre spring musical and will enter St. John's Law School in the fall.

Tyler Miller, who majored in the Classics, plans to attend Drexel University next year and continue his studies in History. He is a member of the Men's Campus Council.
Is This Any Way to Run a School

Comment ... Ann Weibezahl

An editorial by Stephen Lange in the last issue of the Ursinus Weekly made the point that students have very little input into curricular decisions. According to information which has come into my possession, it appears that the faculty of the college does not have all that much input, either.

A proposal now on paper, one of whose self-proclaimed purposes is the evaluating and restructuring of significant portions of the college curriculum. Curiously enough, almost no mention of this proposal has been officially made to the faculty, even though the proposal itself has existed on paper for almost a month. This proposal would first of all require all seniors to take the course Civitas and Civitas in order to graduate. In addition, a new freshman course, combining English, History, and Language, would be reaped of all incoming students. Such a program would account for four-fifths of the credit earned by a freshman at Ursinus. The proposal anticipates that course selections in the sophomore year must be decided by a broad consultation between faculty and students. It is almost no mention of this proposal that would revamp the curriculum has been given. The truth is that the proposal is a failure because it has come into my possession, it appears that the faculty of the college does not have all that much input, either.

To the Editor,

I am writing this letter to object to the protests over the "inherent" portrayal of the crucifixion of Jesus Christ at this years commencement. According to the constitution of the United States, people have freedom of religion, freedom of speech, and the right to assemble peacefully. Freedom of religion means that you can believe in whatever you want and the right to believe in something else. The reasoning behind this is that the truth is hard to determine and people inevitably have different opinions. Freedom of religion doesn't mean you have to give due respect as Christianity, the crucifixion. There is nothing wrong with believing Christ was who we felt were either historical or delusions of grandeur, after all there was more than one person running around claiming to be Christ, we don't even know if they crucified the right one, if indeed there was a right one. Freedom of religion means that any person has the right to say what they want to say without being punished for doing so. Anything may be discussed, economics, politics, even religion without fear of loss of life, liberty, or property.

The right to peacefully assemble means any group of people who wish to exercise their beliefs or exercise their right to free speech. The letters protesting the strike on the crucifixion of Jesus Christ are essence argue against these freedoms. They seem to take the idea that our freedom of speech is over with them as long as nobody practises a belief they disagree with. Freedom means a person is free to choose the ideas and beliefs that he or she believes is best and has free access to the latest analysis of MAB paint, we believe. Anything else presumes that even the discussion of what is good and bad, right or wrong, is bad to some extent. It is also denial that our knowledge is ever increasing and that the conclusions cannot be drawn from it change. Mark W. Ford

Letter: Delta Pi

To David Rowe and all other offended critics:

We, the brothers of Delta Pi (that most sacrilegious and tasteless fraternity), have recently come under considerable attack for our behavior in this year's Songfest. So, may we say to those of you who feel we were either hauting or delusions of grandeur, after all there was more than one person running around claiming to be Christ, we don't even know if they crucified the right one, if indeed there was a right one. Freedom of religion means that any person has the right to say what they want to say without being punished for doing so. Anything may be discussed, economics, politics, even religion without fear of loss of life, liberty, or property.

We did not enter Songfest nor perform the Crucifixion scene with intention to slight any person, anyone, the scene as it was performed is open to con grudges. However, we are not apologizing for the nature of our act, nor are we going to clean it up in the near future.

We did not enter Songfest nor perform the Crucifixion scene with intention to slight any person, anyone, the scene as it was performed is open to con grudges. However, we are not apologizing for the nature of our act, nor are we going to clean it up in the near future.

Delta Pi

Letter: Robert Morrison

To the Editor:

There has been occasion during my first year at Ursinus College when I have surmised a strong demand for an effective editorial page for the editorial page of the Ursinus Weekly. I now feel that time has come to put my opinions concerning what I consider to be the major shortcomings of the operation and administration of the college. At this time, there is nothing that could be more important to this college than a meaningful revision of our present discipline system as outlined in The Rules and Customs. For such a revision to be meaningful, it must be formulated by a body which equally represents the students, the faculty, and the administration.

Many of the rules in The Rules and Customs cannot be effectively enforced for obvious reasons. An excellent example of an unenforceable rule can be found on page eight of The Rules and Customs, and it reads as follows: 10-13 o'clock, Alcohol, possession, or use on campus. There is no way that you can convince me that the administration isn't knowledgeable of the problem. There is at least one keg party going on somewhere on campus just about every weekend. Dean Whaley and Dean Harris must realize that there is no earthly means to enforce the students from drinking. Last year, an attempt to affix the blame on several students from drinking in the NMD 200 met stand stuich possibility of punishing to find anyone from drinking there.
To the Editor:

There has been a considerable amount of interest on campus recently in the status of students leaving Ursinus College. Various elements of the college community seem to feel that there is a trend for students leaving Ursinus. Many of them feel that Ursinus is a place for students who are looking for a change, and that the college community does not have the same influence on students as it once did. There is also a feeling that the administration is not doing enough to retain students.

To obtain my information, I used a survey of students who had left Ursinus College for the years 1973-74 and 1974-75. I counted the number of students listed as members of the class of 1973 in the 1974-75 directory, and compared this to the number of students listed as members of the class of 1974 in the 1975-76 directory. In addition, I contacted a number of students who are now seniors who were listed as students in the 1973-74 directory, and the number of people in my class who said that they would leave.

Of the graduating class of 1973, 187 out of 242 people (or 77.5%) would have liked to stay at Ursinus College. Of the 242, 39 people (or 16.1%) would have liked to stay but were unable to. Of the 187, 11 people (or 6.0%) would have liked to stay but were unable to.

There are many reasons why students would like to stay at Ursinus College, but they are generally based on the fact that they want to continue their education at the same institution. They also feel that they can continue to develop their skills and knowledge, and that they can continue to be involved in extracurricular activities.

There are a number of reasons why students would like to leave Ursinus College, but they are generally based on the fact that they want to change their environment, and that they want to have more opportunities to develop their skills and knowledge. They also feel that they can continue to be involved in extracurricular activities.

In conclusion, I feel that there is a trend for students leaving Ursinus College. There are many reasons why students would like to stay, and there are many reasons why students would like to leave. It is important for the administration to do more to retain students, and to make the college community a more attractive place for students to stay.
Dames at Sea

by Thomas J. Glorioso

Students immersed in schoolwork often find it beneficial if they take time off from their hectic schedule to see something entertaining. Dames At Sea, written by John Haim-elson and Robert Miller with music by Jim Wise was, in general, an entertaining experience because it was very funny musical, but it could have been even more entertaining if better attention had been given to casting. The musical, which was produced by Linda Marie Bell and directed by Joyce Henry, does not have much of a plot. It is basically a story about a sugar-coated, flaky, but innocent young songstress named Ruby and a semi-talented but ambitious young song-writer named Dick trying to climb that ladder to fame and fortune. Conflict arises from Mona Kent, a prima donna who is envious of Ruby and tries to take Dick away.

Allison Rogers with her sweet voice, face, and mannerisms portrayed a good Ruby just as Joyce Henry acting with all the opposite qualities played a good Mona Kent. Joan, who was every bit as tough as Mona Kent but was a prot, essess of Ruby, was acted with by Claire Maker. So one could say that the female cast was very good, however, the male cast left much to be desired.

A most unfavorable performance was given by John Wickersham who portrayed Hennesey and the Captain, and Dr. Henry should have realized before casting him that in a musical one should at least be able to carry a tune. Wickersham could not carry a tune in a Chewy van. His acting was also poor because he said his lines too obviously with no imagination or expression. Dan Caccia, who played Dick, and Bob Shuman, who played Lucky, had singing voices not much better than Wickersham, but their acting was brilliant. Still it is unforivable that not more thatation was given to the music.

The text in most of the songs was written in verse, but it was not heard when the audience came when they were done straight-faced and seriously.

Musical Notes: Meistersingers Tour

by B.A. Vincent

When the Schuykill Valley Lines bus pulled up in front of the bookstore on Friday, April 30, Monsignor Frank Goldone was ready to go for their five-day, four state tour. Armed with baggage and copies of the tour guide for the church, and for, some crusts, the choir clambered aboard the bus and headed for Somerville, New Jersey, then up to New York City and, for some crusts, the choir clambered aboard the bus and headed for Somerville, New Jersey, and for, some crusts, the choir clambered aboard the bus and headed for Somerville, New Jersey, and for, some crusts, the choir clambered aboard the bus and headed for Somerville, New Jersey, and for, some crusts, the choir clambered aboard the bus and headed for Somerville, New Jersey.

Last night, after eating dinner at the homes of the host families, the choir compared notes on their hosts, the cocktails, dinner, and exotic deserts. Such comparing of stories and sharing of experiences became an important part of each day on tour. Saturday morning dawned cold and damp, but Meistersingers have not been known to let a little rain spoil their plans, so they made a beeline to their Somerville hosts, leaving them with memories of a good concert, and headed north to Coventry, Connecticut, to view the first concert at Monsignor Bechold’s home church. During the five hour bus ride, chocolate chip cookies (baked by known mothers) came out along with playing cards, Physics books, and a few pillows.

When they arrived in the sleepy little town of Coventry, some Meistersingers stayed at the church to study or rest while others invaded a nearby shopping mall and bowling alley. After an exciting evening concert in the simple but lovely Little Church of New England Congregational sanctuary, Meistersingers divided up for a variety of warm hospitality and good times with their Coventry host families. After a Sunday morning service where biretaryed Meisters sang hymns with the Coventry Congregation, the choir headed north to Bloomfield.

In the chilly dampness of an April rainstorm the Meisters arrived at the Sacred Heart Church in Bloomfield, Mass. The majestic sanctuary, complete with stained glass windows and a huge pipe organ, was presided over that evening by Father Joseph Hipler, himself a Meistersingers alumnus, and pastor of a nearby Episcopal parish. That evening, after the concert, Meisters were entertained by some real Bostonians who “p-a-a-kid” their “-e-e-a-” and were, for the most part, devotee Bruins fans.

Monday morning, bright and early, 32 Meisters piled off the bus bound from Natick and found themselves in the heart of the city of Boston, with five hours of free time. Some spent the day exploring Pubs and Taverns, others went to the Aquarium, or the old market, the Common, or out to lunch at Boston’s famous Pier 4 Restaurant. The choir was sold on Boston as a very exciting city and was reluctant to leave.

But leave they did! An hour and a half behind schedule, they barreled down the highway at Boston to longitudinally effective 8:30 PM in the New London, Connecticut. When the choir finally arrived, they were greeted by an anxious choir director, Mr. Derq Howlett, and the congregation. Somehow, the Meisters managed to walk down a long hall, unload the bus, and change into their outfits, prac-

tise, and start another enjoyable concert exactly on time.

Pi No

Pi Nu epsilon, the National Honorary Music Fraternity, held its convention and Golden Jubilee on the campus of the University of New Hampshire. A business meeting was held in the morning, during which Barb Yoder was installed as the National President for next year.

After lunch, at 2:00, a reception for members and alumni of Phi Beta Kappa and Sigma Chi was held in the Shippensburg Union. At 3:00, entertainment was featured in the Bolleranger Auditorium.

This included the Drexel Colonial Ensemble, the Ship-
pena Jazz Band, and the University Jazz Band.

In the evening, members and alumni enjoyed a cocktail hour and dinner dance, held at the Tower Restaurant.

The day was an enjoyable one. Best of luck to Barb Yoder in her capacity as president next year.

Tuesday morning the choir left for a trip to Mount Desert Island, a charming little community and headed south, in their way to Jeff Stafford’s and Pattie Williams’ church in Bar Harbor, Maine. They stopped in New York City just long enough to eat lunch at the World Trade Center, and sing theirTheme song “Cantate Domino” in a surprising but appreciated luncheon crowd.

Parsons Hill was the last concert on tour. The band of friendship and togetherness built up over the previous five days expressed itself in the teary eyes of many Meisters. For Mr. Howlett, Carrie Bechold, and the seniors, Parsons Hill was their last tour concert ever with Meistersingers. For the choir members who were staying on at Ursinus for the realization of how much these Meisters would be missed was caused a sentimental sadness not often seen expressed in a group of high schoolers. But time to be missed for those people who are in the choir, it holds a special meaning to the group of Meistersingers who were brought into one very special college of good times, good music, and a unique kind of love.

Parsen’s Book of Music

by George Geisit

Who is the Ursinus faculty staff member whose book headed a recent publication’s “Review List of Outstanding Publications”?

Answer: Dr. William T. Parsons, History Department. Everybody’s favorite Pennsylvania Dutch author, Dr. Parsons, has been honored by recent reviews.

Comment ...

(Continued from Page 2)

fundamentally wants to be a student that he/she should postpone any major study of the sciences until his/her sophomore year? What about the problems of the freshman science major at Ursinus who transfers to another school with only six credits of science? These, and other weighty questions, must be considered carefully because, like it or not, science students account for a substantial portion of the revenues of the college.

I should hope that no attempt to approve such a drastic change in the college curriculum will be made before the end of this academic year. At present, there is only one opportunity for any discussion remotely resembling a general consultation between faculty and students, and that is President Richter’s “broadly representative meeting” on May 31.

The President’s avowed intention to “review the general mission of the college” has an ominous ring with regard to this proposal, especially when one considers that the deadline for proposals to be funded by the National Endowment for the Humanities for the academic year 1979-1970 is this coming August 1st. An idea for such a sweeping change in the academic life of the college should be subjected to the same stringent “Long-Term Planning” schedule that the President evidently envisions for the review of student life and rules reform.
Presidential Memo
by George Geist

Prior to pre-registration, the Department of Philosophy and Religion provided students a "philosophy orientation" for those majoring in or considering the majoring in the Department of Philosophy and Religion.** This guide informed students about the orientation, the Seccata Club, and departmental course offerings. In addition, it included an important note: "What is ‘philosophy?’ Why study it?"

(Continued from Page 2)  

In order to achieve the goals of the Philosophy Department, the Philosophy and Religion Department conducted a survey to determine the effectiveness of the philosophy curriculum. The survey revealed that the majority of students feel that the philosophy curriculum is effective in achieving the stated goals. The survey also indicated that there is a need for improvement in some areas, such as the integration of philosophy with other disciplines. The Philosophy Department is working on developing a new curriculum that will address these issues and better prepare students for the future.

Doctorates

Three persons, distinguished for national and world-wide recognition, have been awarded the Doctoral degree from Ursinus College. The commencement exercises took place on May 29.

Ron Nessen, press secretary for President Johnson and host of the nationally syndicated television Journal, will receive the honorary degree of Doctor of Letters for his distinguished career in journalism.

The Rev. Dr. Robert J. Lamont, former president of the Presbyterian Minister’s Fund and baccalaureate speaker at a number of commencement services, will receive the honorary Doctor of Laws degree.
From the Cluttered Desk of the USGA President

Calendar Priorities

By Stephanie Dent

The vast majority of students surveyed by the USGA indicated that a shorter spring semester, ending second semester earlier in the Spring, was their uppermost preference. In addition, students would like to begin Fall Semester earlier. USGA submitted the results from this survey to Dr. James P. Craft, Executive Assistant to the USGA, for his recommendations. The USGA administration has indicated a support of a change in the school calendar for the year 1978-79, it is hoped that the USGA’s survey will be used as a primary tool in drafting possible calendars.

Survey findings indicated that most students are opposed to having a shorter spring break, and that they have no strong preferences about having separate Easter and Spring vacations. A three-week break between semesters was preferred over a four week break when it was noted that a longer break would be deferred to a later commencement date.

Several problems were encountered as the USGA committee tried to draw up possible calendars. Since Labor Day can fall as late as September 7th and early as August 31st, a date two weeks before the fall semester, exams could potentially fall on either Christmas or Easter. Spring finals are usually held during the last week before finals, and one month before Spring break.

Students favored the USGA’s proposal even though it might be difficult to implement. The alternative proposal, which they preferred was the one with the shorter break and resultant final exams in the fall.

Most of the Ursinus community is therefore backing a reform of the calendar. It is now up to the USGA to draft some concrete proposals and to have the Board of Directors to act upon them. Change is in the offing.

Richard Hais

(Continued from Page 1)

3:30 P.M., Corson Hall, Craft and Dalaker.

Craft submits proposal to President Richard Richter to review and discuss it, then report to the faculty at large.

10:40 P.M., Call and set up a meeting between Dean to be appeased with this proposal on Rules Committee.

Meeting between Dean Craft to be appeased with this proposal on Rules Committee.

The answer is yes, the USGA is by no means dead. It’s a vital organization dedicated to continuing the quality of student life and it’s task is to make Ursinus better for all students who come here and call Corson hall their home. We continue our work through the summer months, and we ask each individual student to return to campus a new person.

Enjoy the summer!

a Phi Alpha Psi sister a member of the orchestra and a member of Pi Nu Epilson.

Samuel Laucks is a Biology major from York, Pa., and plans to attend Jefferson Medical College next fall. He was president of Pi Nu Epilson, vice-president of the college band and a member of both Sigma Xi and Cub and Key Society.

Debra Weiler hails from Wyncote, Pa., and is a Psychology major who plans to enter graduate school. She is a member of the women’s swimming team as well as Sigma Xi, Pi Gamma Mu and Psi Chi, the national psychology honor society.

Dan Reid, a Chemistry major from Norristown, Pa., plans to attend graduate school. He conducted research in various intramurals, as well as Beardwood Chemical Society and Brownback-Anders Pre-Medical Society. He will attend Medical College of Philadelphia in the fall.

George Bause from Anchorage, Alaska, majored in Biophysics and was a St. Andrews Scholar to Scotland in his junior year. He conducted research in computer languages and prosthetics design and will enter Johns Hopkins University School of Medicine upon graduation.

Mary Aristaco is a Classics major living in Boyertown, Pa. She plans to travel in Europe this summer and then work to support her husband in law school.

Don Whitaker, an English and Economics major from North Wales, Pa., plans to enter law school upon graduation. He is a staff member of the Weekly, as well as a member of Pi Gamma Mu and Omicron Delta Epilson, the national economics honor society. Don is also manager of the greenhouse.

Cynthia Shelmsire, an English major from Richboro, Pa., is active in Ursinus Bible Fellowship and the college choir. She is a member of Pi Nu Epilson and a Weekly staff member and hopes to enter the publishing field.

Bob Simon, a Chemistry major from Ambler, Pa., will enter the Graduate School of Chemistry at MIT after graduation. He was president of the Newman Society and of the Beardwood Chemical Society and Chairman of SPARC.

Cheryl Miller, an American Studies major, comes from Springfield, Pa. She will be getting married and plans to work following graduation. She is active in proTheatre, WRUC, Alpha Sigma Tau and in the library technology services dept.

Linda Springer is a Mathematics major who is planning an academic career. She is from Haddonfield, N.J., vice-president of the Math club and member of Phi Epsilon and the Messiah orchestra.

The Chapter Scholars were honored at an annual dinner on Tuesday, May 10th, which was followed by a lecture on matriculation by Prof. Harold W. Breyt of Penn State University.

---

A long time ago in a galaxy far, far away...

**Placement Office Offers Services**

Citing “increased sophistication of Ursinus students,” Dr. Robert V. Cogger, director of the Placement Office commented on the “fine sign of awareness and better selection of opportunity” by the 112 seniors registered in the Placement Office this year. According to Cogger, approximately two-thirds of these seniors are interested in business, industrial or governmental posts and the remaining one-third are seeking teaching positions.

The Ursinus College Placement Bureau offers its services to all students and alumni at no cost. Information about all types of employment is available to help students in career planning and in their search for summer employment.

During this spring semester, the office scheduled 19 recruiters which included IBM, Proctor and Gamble, American Bank, Firestone Tire Co., Action-Peace Corps, and the Quakertown School District.

Cogger cited keen competition in the job market as a reason for increased career counseling contacts with students in all four graduating classes. “We’ve had full schedules with all our recruiters and, in addition, we’ve had waiting lists for several. Students with this increased awareness are also taking interviews in more than one area,” Cogger added.

**New Admitted to Med Schools**

Fourteen students at Ursinus College have received acceptances so far from numerous medical and dental schools for fall, according to Dr. A. C. Allen, chairman of the Biology Department and premedical advisor.

He said the figure of fourteen signifies the high caliber of students at Ursinus, again pushing the College’s record of placement well above the national average.

+ + +

Students and their acceptances are:

- George S. Bause, Elmendorf, Alaska
- Donald A. Campbell, Plymouth Meeting, Pa.
- Robert W. Carthy, Bordentown, N.J.
- Robert J. Fieldman, Old Bridge, N.J.
- Victor R. Frankel, Cinnaminson, N.J.
- Glenn C. Freas, Haverstown, Pa.
- Christian Gilbert, Yorktown Fts., N.Y.
- Samuel S. Laucks, York, Pa.
- Daniel W. Reid, Norristown, Pa.
- Christine C. Desjardins, Haverstown, Pa.
- William E. Gray, Jr., Cinnaminson, N.J.
- Scott Pickering, Unadilla, N.Y.
The Urisinus baseball team is winding down a season that can be best described as frustrating. The Bears have a record of 8 wins and 9 losses although they would probably be in first place in the M.A.C. South if they had fulfilled their potential. Two examples of the tremendous talent that the Ursinus team possesses were displayed against the last two opponents the Bears have faced. On May 3, Ursinus played one of its best hitting games to date as they trounced Albright by a score of 11-2 for Coach Carson Thompson's 50th baseball victory. The team was consistent in driving the ball in the seventh inning as they scored what proved to be the winning runs.

The Albright and Moravian games both featured come-from-behind rallies. The other common characteristic of both games is that the Bears came up with the clutch hit or good defense when it was needed. Ursinus has come up in the last inning of one game four times and lost another in extra innings.

One must wonder why the Bears have been unable to take advantage of the fact that they did well against Albright. The whole season an important reason that comes to mind is that the baseball team has had trouble hitting pitchers who do not rely on the fastball. The Bears have more success against pitchers who have excellent stuff than against the hurlers who seem to have no velocity. The two Bears who hit the ball the best this year have been more successful against the hurlers who throw hard and have a good curve but seem to have no velocity. The two Ursinus batters who pitch have been more successful against the hurlers who throw hard and have a good curve but seem to have no velocity. The two Ursinus batters who pitch have been more successful against the hurlers who throw hard and have a good curve but seem to have no velocity. The two Ursinus batters who pitch have been more successful against the hurlers who throw hard and have a good curve but seem to have no velocity.
