When you go out in the world, it is best to hold hands and stick together.

According to the recommendations of nationally renowned mathematicians and computer scientists, the Department of Mathematics and Computer Science has streamlined and simplified its two majors. Several former requirements were made recommendations, and all advanced three-credit courses were increased to four credits to allow for more in-depth study. These changes will increase the flexibility of the programs and allow students to pursue their own interests both inside and outside the department.
