Lizzie, tient to the freshman class. Modeled after into action, a prize is being offered. The student-faculty lounge will be a source of immense competition considering the alternative of injecting "mannas from Wisner." Entries should include your professional name, number, and title. A majority, if not all, will have their in the Parents Lounge, Wisner Hall, by 11:00 p.m. Monday, November 20. They will be notified on Thursday, December 2.

So get those entries coming in. Don’t forget, you too can be the first on your block to cash in a free meal at the College Inn.

President Presents Ronnie Hollyman

A master of the softly sung ballad, Ronnie Hollyman will present a program in the Wisner dining room on Monday, November 19, on the Ursinus college campus.

Hollyman is a native of London, England, where, at the age of 10, he received a scholarship from his submaster. Two years later, armed with a guitar and a promise of a voice, he made his professional debut at London’s famed Adelphi Orchestra. He was featured in both the Saratoga Festival and in Philadelphia. Among many awards and scholarships, Miss Godfrey was the first winner of the Metropolitan's Lorenzini Berti scholarship. She has sung under the batons of Leonard Bernstein, Eugene Ormandy, and Pierre Monteux.

Ronnie Hollyman

Helicopter Comes To U.C., Nightlights Installed

It sounded like a hundred power mowers warming up for a Great Lawn Race, but actually it was a group of 50 scouts warming up for a Great Lawn Race, but actually it was one of the tallest and most powerful helicopters ever to be seen on campus.

The show featured a variety of singers, guitarists, a pianist, and a comedy exit. The music ranged from folk to Broadway musicals. The show finished with a lively sing-along which included most of the audience.

At 8:00 p.m. the caravan departed after a hurried exchange of addresses, a few bars of a requested song, and the promise to return again, soon.

Education Office Offers New Plan

Starting the second semester this year, freshmen and juniors who wish to teach will have an opportunity to gain experience in the Pottstown and Perkiomen Valley School Districts. This new department for future teachers is being developed by the Department of Education, in cooperation with these two school districts. It will allow students to gain additional training and employment opportunities, including physical education. The other participating school district, Pottstown, has opened every aspect of its curriculum to interested future teachers.

Dr. Herman M. Wessel is making arrangements now, and would like to hear from interested students by November 19. The major requirement is that students have at least one full afternoon or one morning free each week, and that they have a means of transportation. Additional information is available on bulletin boards and in the Education Office.
Many years ago, a group of wise men were discussing the nature of words. Their final conclusion was that words were like arrows, for once they were sent out, their damage was done, and could not be repaired.

Such is the way of rumors, for the damage done by rumors is often felt deeply, and their effects are with us, even though the original rumors are long forgotten. Of course, we realize that rumors are perhaps one of the most effective weapons of this world, for once they are spread, their effects are with us, even though we may not always realize it.

The nature of words. Their final conclusion was that words were like arrows, for once they were sent out, their damage was done, and could not be repaired.

The nature of words is so manifest that their effects are with us, even though we may not always realize it.

Nothing in the English language can command such intense attention in so many of today’s words as can this short phrase. The viciousness of those among us who gossip (so joyfully) is incredible. Even when rumors are “based on facts” they usually wind up almost contrary to the original truth. There are many reasons for this growth and alteration. One such reason is the need for some people to tell ‘suspicious’ tales. Another reason is that some people are not satisfied with the truth. Stories that are not quite as true as they are told become so popular.

Perhaps the greatest damage is done by rumors, for the damage done by rumors is often felt deeply, and their effects are with us, even though we may not always realize it.

THE KITCHEN CYNIC

"The Science of Setback"

By JANE SIEGEL

The exact diameter of the credibility gap, at its widest point, is directly proportional to the square of the degree to which the right hand realizes what the left hand is doing. Contingently, the ability to correctly predict the rational effect of any given theoretical proposition is inversely proportional to the number of second-hand sources of information involved. It, then, necessarily follows that modulation of the frequency of certain, pre-mediated outbursts is directly dependent upon the amount of real, delegated authority.

Thusly, we have established the scientific models which are pre-requisites to the rational discourse that is supposed to result in the making of minds. Something, however, is askew since discourse here is about as successful as the tower of Babel. Let us explore the difficulty by using our new track facility, which isn't, as a functional proof of the validity of modern number one. To begin with, is so happened that in the one hand was all the money; that made it the right one. On the other hand just happened to be all the people who knew nothing about building, maintaining (including drainage) and running on, a track. They got left.

Therefore, since the right hand didn't bother to grab the activities of the left, the track facility and guns in the $40,000 track increased. Thus, as the centrifugal force of money continues to separate these two, from those that make decisions, the credibility gap will ultimately reach its limit. This point will be attained when one of the only men's teams that ever wins around here, the track team, has no track to run on. (Of course there's always the good old green grass.)

From the second hypothetical construct, the scientific equivalent of the old adage: "Construction is the result of our representation," can be derived. This theorem seeks to explain the Board's Constant. Simplified, Board's Constant is that factor which consistently yields universal and indefinable decisions which are 100% off-base and irrelevant to the present or instances. However, these un-informed, unequal and opposite reactions would be impossible without the non-independent or non-constant, misrepresenting situations which would make everything into what the college is really like.

It is significant that the so-called student representatives to the Board not only aren't known to the students; they don't even know the party to whom they are speaking. Certified with huge doses of second-hand information, and stimulated by the atypical and artificial conservation radium by these catalysts, Board's Constant never fails. The unfortunate by-products of these various misguided solutions is the mounting pressure resultant upon forcing square pegs into round holes.

In relentlessly logical form, the third postulate flows in natural order from the second. Sudden modulations in the temperament of the student body are caused by heat. Outbursts of heat, as previously established, may develop because students share under the rules and constants that are not of their own creation. A Davinci cooperative process whereby the participants have an interest in its maintenance because they had a vested interest in its origin. Explanations cannot be avoided by threats.

But an answer does exist. For a start, the right hand needs to attach itself to the left one in a configuration vaguely resembling a handshake. Then a solution, rationalization of the développed. Representatives must represent. Direct communication is the 'next best thing to being there.' And finally, some authority must be faced with the current situation which is not ruled soon or the precipitate may fall with a boom!

By CAROL SEIFRIT

Mr. Taras Zakydalsky, a doctoral student of Philosophy at Drayton Mawbe University, joined the faculty of the Department of Philosophy last year. He and his wife, Oksana, a doctoral candidate of the London School of Economics and Political Science, came to this country from Canada, where they received undergraduate degrees from the University of To-...
Bears Close Season With 4-4 Record

By DON McAVNEY

The Ursinus College football team closed out its 1971 season with a 21-9 victory over Haverford College at Patterson Field on Saturday, November 14. Although the Bears had their problems early in the season, they jelled after their upset victory over Muhlenberg and won four of their last five games to finish with a 4-4 record. The credit for their final win must rest with the defensive line. Haverford may have one of the best passing combinations in Dave Parham and Doug Nichols that the Bears have seen all season. Parham, however, was pressured constantly into hurried his passes, and was forced out of the pocket on numerous occasions by the hard rush of Ursinus. Greg Paulison, Rich Bookall, Gary Greenberg, and Art Hanacek, who also defended the defensive line, were the key to the Bears victory on Saturday.

Ursinus Scores First

The Bear offense put their first score on the board early in the first quarter. With the early momentum Ursinus moved 71 yards in seven plays. John Sahatich capped the drive with a 37 yard run. Sahatich broke several tackles and lunged into the end zone after being hit hard on the five. The P.A.T. was good and Ursinus led 7-0. The Fords, however, came back right back to notch their only touchdown of the afternoon. Todd Williams intercepted a Larsen pass late in the first period. Six plays later Parham hit Doug Nichols on a pattern pattern to make the score Td Ursinus.

Capitalizing on a short punt which gave the Bears excellent field position, quarterback Don Jarson moved the team in for their second score. John Stewart plunged over from the two-yard line to give Ursinus a 14-0 lead at the half.

Ursinus took the second half kickoff, but could not move. After a bad punt Haverford put the ball in play inside the Bear 40. The Ursinus defense, however, rallied to halt the drive at the 25 yard line. The Fords were forced to settle for a 35 yard field goal to cut the gap to 14-3.

Fumbles and interceptions continued to plague the Ursinus offense throughout the second half. The defensive unit did an outstanding job in containing the Fords, and consistently turned the ball over to the offense. The final Ursinus TD came on a one yard plunge by Rich Bookall. Al Auerbach scored on a 40 yard passing strike from Larsen to Mark Montgomery. But the game out of reach and iced the Bears a .500 season.

THE UR.SinUS

Ursinus Hoopla

By DOUG HUNTER

On October 18, Coach Warren Fry opened practice for the Ursinus College basketball team with the goal ahead a berth in the M.A.C. playoffs. Coach Fry has three concrete reasons for this optimism: the return of Farley Catell from a leg injury; a lineup of last year's starting five; and one of the strongest benches in recent years. Catell broke his leg after the Bear second game last season after leading the M.A.C. Southern Division in rebounding during his freshman year. At 6'6", he will be counted on to regain that board-sweeping form, and fill the center position. The Bears will have last year's captain, Gary School, filling the same capacity this season. Last year School was forced to take over the center position due to Catell's injury, but this year will return to a more familiar forward position. The 6'7" senior averaged 13 points per game, was the team's M.V.P. and made Honorable Mention on the All-Conference team.

Salvation through the union of reason and technology, it is far more concerned with the world as it is now, than with the world subsequently to the utopian.

Fyodorov viewed history as the progressive accumulation of man's efforts to achieve immortality both for himself and his ancestors. For example, man was able to provide for the aged food which was easily chewed when he discovered fire. He was thus able to offer to them a longer life than was commonly possible prior to that discovery.

Man, then, is to achieve dominion and to become immortal. In the utopia, all men are to be closely united, yeved toward the future. Any activity following the resurrection will then be the result of the collective will of men to create from the super-abundance of existence.

**Kilt Klad’s Comment: Snellbelles Undefeated**

By RUTHANN CONNELL

A victory over Trenton State last Tuesday capped an excellent season for our Ursinus Hockey Team. The score was 2-1, as the team encountered the usual ice conditions of their own backyard, the field hockey field, the fairway of the course, and the tennis courts. Despite these factors, the Bearinites did not appear as usual overwhelming selves, but they did win and the victory topped off a 5-2 season. Our offensive line scored an impressive 27 goals while our defense held the opposing team to only 2 goals during the schedule. The Junior Varsity fought to a scoreless tie against Trenton State. They played well and should have scored more. So did the Soph, Miss Boyd’s team wound up their season with a 4-1-1 record.

Some highlights of the season included: West Chester’s Sally (Boomer) Anderson using her head, the Glasshouse goal (1), the Gettysburg J.V. game, spice wars, Ann Paul’s penalty bully, Kilt’s conscience at Geisinger apple cider, the J.V.’s wreking the Rams, Jeremy officials, Red Wine, Goodness, the Bloom-Boomer affair, and the preliminary All-College North Tournament (not your heart E-Burg!).

The Sectional and National Tournament will be two events to be held concerning the hockey circuit this season, and it appears that Ursinus may well show up favorably in these categories. Hang in there, you Bears!

With the end of the hockey season we move on to the winter sports scene. Already the Ursinus Gun has taken to the water and their swim team began practice this past week. The Water Wizards will be led by co-captains Trudy Schwenkler and Harriet Reynolds and coached by Mr. Van Horn.

Those favoring the Badminton Set will soon set up the nets and commence practicing under the competent coaching of Miss Adele Boyd. The Birdie Belting Bearinites hope to regain the undefeated image that they lost last year.

Practice begins next week for the B-ball facet of winter sports. Miss Stoll should have plenty of freshmen and upperclassmen to look at when selecting a hopefully strong team. Robin Cash will be commanding the Dorming Raisins this season. Good luck to all the winter sports teams!

---

**By MICHAEL REDMOND**

The past two weeks were not good times for the Bears. The fault lies mainly with the Team. The Bears have allowed themselves to be out of shape and therefore are very prone to injury. Soccer is made for the fit, when a team is no longer fit it shows up in their playing; no longer do the passes reach their intended receiver, no longer is the player able to beat his opponent to the ball, no longer can a team dominate the play. I’ve been on the team for four years, and each year I’ve seen the same thing happen. As the season gets under way the team works hard, but then it slackens off, members stop coming to practice because of “laba,” “more music,” or “too much work.” Those who do work hard suffer at the expense of a few. A team consists of eleven players, if one of these players is in a critical position is injured, misses a game, or goes off, the team is hurt.

On November 3, Haverford came to Patterson Field. Field conditions were very poor; the ground was sogging wet and quickly turned into mud. Ball control was almost impossible. Haverford was lucky, they scored in the first quarter even though Ursinus dominated the play that period. The rest of the game saw the Bears doing very little. Haverford won, 1-0. Luck seemed to be against us; there were many close goals for both teams. Considering the poor weather, the spectators came in force.

November 6, La Salle came to Ursinus and beat the Bears 5-1. Danny Spencer scored for Ursinus off a pass from Paul Knottler. Danny is still hampered by that knee injury he received in the Muhlenberg game.

The day the Bears went to Moravian proved to be a bad day for the Bears in more than one way. First off there was a mix-up over which uniforms to take, which helped to make the Bears late for the game. The weather was very cold and Moravian was up for the game. One minute and 19 seconds into the game saw Moravian score. The Bears fought back and tied the score at 2:14 in the same period. (Steve Kleszewski made a beautiful hit into the goal.) At 17:54 a Bear touched the ball with his hand in the penalty zone. Moravian scored. In the second quarter Moravian scored two more. The second half found the Bears press Moravian but fast losing its strength. The final score was 6-0. Back in the locker room the Bears discovered that their wallets had been emptied during the game. (The room and the building were locked.) All in all, it was a bad day. The only bright spot was the presence of six Ursinus co-eds.

The last game to report was a runaway. Lafayette on November 13 (their field) put the Bears to rout. During this game the Bears lost five players to injuries. The last few minutes of the game almost saw the Bears play with only ten players, but one of the injured managed to get off the bench. The final score was 7-6.

Our last game is this Saturday (November 20) against Franklin and Marshall. How the Bears will do depends on how bad their injuries are. Let’s all give the Bears our support in this last game by coming out and seeing it. They need it.

**Ursinus Wrestlers Are Bears**

By JOE VAN WYK

Trivia: What Ursinus team turned a one win, nine loss record into an eight win two loss record in the course of only one season?

Answer: The 1970-71 Wrestling team.

Right now you avid sports fans are probably asking yourselves, "What could possibly top such a phenomenal performance?"

"Winning—except the 1971-72 squad in action. You regular people are probably asking, "What is this article about?" Well, for you people, all I can say is that this is the dawn of a new wrestling season, and possibly a new era of wrestling history at Ursinus College.

Skeptics and our opponents are inquiring, "What could possibly make your team such an effective machine?" The answer is in like A.M. Terry, Ron Go-Cart, Dave the Mower, Bruce Mat-Man, Kevin the Ake-maker, Poo the Greek Bear, and of course the uncompromising Slinger. These seasoned veterans will be returning this year along with many other good men, including four outstanding freshman recruits. Renee Carney, Ed Winner, Ed Morgan, (24), and Steve Smith (24 Delaware State). Dashing and dapper man, the V.C. will also be using his wire-tapping and peeping-ton team in an effort to coach another successful season. The only thing I want to know is who the monster that climbed out of Loch Ness last spring just to go into training to wrestle at U.C. this year.

Now, fans, if this article has you on edge, and if you cannot wait to find out the fate of our motley crew, there will be following reports in future Weekly issues. Don’t forget the first home meet is December 8, at 8:00 p.m., in the gym. If you are successful in defending its seven win streak against Delaware Valley.
