College Union Reveals Plans

By BOB SWARR

On Thursday, February 10, the College Union Pilot Committee met with President William S. Pettit to discuss the progress on the plans for the College Union. The members of the Pilot Committee are: President John L. Koseoglu, Virginia Johnson, Leon Smith, Judy Freelin and Dave Adamowski.

The planning for the College Union has run into several problems. The student 어신 submitted to the school exceeded the budgeted amount of $500,000. The administration had allocated $500,000 for the renovation of the old library; the architect's original plans would have cost $710,000 to carry out. So the plans were resubmitted to the architect. The complicated process of deciding on the courses and what to retain in the revised plans took much time.

Despite the problems encountered in the planning of the College Union, there is optimism about the future of the College Union. The administration is pushing for completion of the College Union as soon as possible. The administration has set an operational budget for the College Union of $180,000 a year. Much of this money will go towards payment of the mortgage and the operation of the building, however, approximately $10,000 would be available for students to spend on College Union facilities. Ms. Lena R. Lemoine said, "the operating budget will vary from year to year and is based on the size of Ursinus and they're giving us a good deal of money to use as they see fit." In the future, there will be increased funds available. The survey of student preferences for the renovation of the College Union has been used as much as possible in the planning of the College Union out of the total of $626,700.

The survey of student preferences for the renovation of the College Union has been used as much as possible in the planning of the College Union. The survey is the first of its kind in the area.

The Lanthorn is sponsoring a creative writing contest open to any Ursinus College student. There are no rules, but please type your entry. So that each entry may be judged impartially, do not identify yourself on any page (including the title page) of the manuscript. Poster and seed catalogs which are your real name, a pseudonym if desired, your campus (or home) address and phone number which are all held together with a paper clip. Entries must be submitted by 1 P.M. Friday, March 10, 1972. The contest winner will receive the newest book in the first floor lounge area of the Myrin Library, a free year's membership in the literary committee of interested students. Three prizes will be awarded—one ten dollar prize for the best entry, one for the best remaining group entry, one for the best remaining prose entry. (Three prizes will be awarded if ten entries are submitted, ten dollars will be paid in each case.) If less than ten entries are submitted, one ten-dollar prize only will be awarded. All three winning entries will be featured throughout the remaining months of the 1972 issue of The Lanthorn.

The following students have been named to fall semester Dean’s List:

We suffered a great loss in the death of Dr. John Heilemann. He was a man who was loved by those who knew him well, and admired and liked by those with whom he had contact. We would be foolish to try to claim that we could lessen the hurt his loss has caused; his life touched all of the Ursinus community, the students, the faculty, the administration, and the alumni.

Those of us who have heard him lecture are indeed fortunate. We are most certainly the better for it, for he had a way of lecturing that communicated his love of life to the students. It is truly a shame that more students did not see him. Fortunately his lectures were not restricted to physics classes, but rather, he lectured in a variety of classes.

By CAROL BARENBLIT

Dr. John J. Heilemann was born in Philadelphia in its "civilized days." He went to high school at what was then Northeast High at 8th Street and Lehigh Avenue, an area much more pleasant than it is now. After high school, he went on to the University of Pennsylvania, where he worked for eight years as a lecture assistant.

When those eight years ended in February of 1921, John Heilemann received his undergraduate degree from the University of Pennsylvania, and on the same day, he took that long walk to the altar and married. He received a fellowship from Penn for three years, during which time he worked toward graduate degrees. It was during those eleven years at Penn that Dr. Heilemann developed his desire to "take every course he could lay his hands on."

Fascinated by languages and etymology, he studied French, German, Spanish, and Greek. After his eight years of listening to under-graduate physics lectures, he knew his physics backwards, but today he says he "couldn't tell the difference between backwards and forwards." He still reads French, German, Spanish, and Greek.

All the years of observing physics lectures taught him as much how not to teach as how to teach. He feels that the most important step in a teacher's education is learning negative features as well as positive ones.

In 1927, he received his master's degree from Penn, and in 1938, he received his Ph.D. through his thesis on languages and his advisor, Alfred Lord. Voltage Helium Spectrum was published just one month after the degree was conferred.

Dr. Heilemann, who had become famous for his skill in speaking four languages, joined Princeton in 1927 and feels that personal relationships with professors are extremely important and valuable, taught at Penn for three years after Princeton, and then joined Lehigh University's schools of engineering and liberal arts.

In 1941, he left Penn to become the second director of the Institute of Advanced Study at Princeton, where he remained as director of the Institute until 1968. His belief is that the important thing in teaching is to try to develop an attitude in your students rather than merely to teach them facts.

Professor of the College

Dr. Heilemann was well-known as a guest-speaker until he stepped down from his chairmanship of the physics department. At that time, he was made Professor of the College, a designation theoretically supposed to make him independent of any department. Officially, he is considered to be part of the physics, history, and education department, and he lectures in the philosophy department. However, still considered himself a part of the physics department.

And, Mr. and Mrs. Heilemann have two sons and two grandchildren. They live in Collegeville in a lovely home close to campus.

**Passion for Music**

One of Dr. Heilemann's major passions is music. He is especially fond of Haydn and Bach, and he has quite a collection of magnificent classical music. He claims that, for him, music is an obsession.

One of his major arguments with his students was the Augustus conversation with Rembrandt. He also talks about how advertising can play a role in advertising, and he has always been interested in this field.

**Maya Angelou**

Angelou, author, educator, singer, and poet, is known for her contributions to American society. She was born on April 4, 1928, in St. Louis, Missouri. She spent most of her childhood in Arkansas and then moved to California, where she attended the San Francisco Conservatory of Music. She pursued her professional debut as a singer.

She sang the role of Ruby in the Broadway musical "Porgy and Bess," organized by the United States Department of Justice, and was also involved in the production of "Porgy and Bess," which was listed on the list of New York's longest-running Broadway shows.

Born in St. Louis, Missouri, she is the daughter of two railroad employees. She studied in New York City at the Juilliard School of Music and in San Francisco. She graduated from the University of San Francisco, and in 1954, she was awarded a degree in music education and became a teacher.

Angelou became known as a writer in the 1950s, and she was the first African-American woman to win a Pulitzer Prize for her autobiography, "I Know Why the Caged Bird Sings." She was also elected to the National Institute of Arts and Letters in 1955.

Angelou has been honored with many awards, including the National Medal of Arts, the National Book Award, and the National Humanities Medal. She has been a professor at several universities, including Yale University, and has written many books and plays.

Good Season For UC Bears

The University of Cincinnati Basketball team has enjoyed a successful season so far. With a 19-4 overall record, the team has shown remarkable improvements from last season. The Bearcats have been particularly strong in conference play, finishing with a 7-1 record in the M.A.C. which has placed them fourth in the conference.

The Bearcats have not only improved overall but have also shown consistency. In January, they managed to go 5-1, which is a testament to their ability to perform throughout the season. This has been attributed to the team’s ability to improve game by game, as each player has contributed to their success.

When it comes to individual performances, the team has a few standout players. Herb Good, a senior forward, has been the key to the team’s success, leading the team in scoring and rebounds. Gary Schaal, a junior, is another player to watch out for. He has been a consistent scorer, averaging 13.9 points per game, and has also been a solid presence on the boards,抓ting 9 rebounds per game.

The team’s balance and teamwork have been crucial to their success. They have improved their bench and have shown that anyone can step up when needed.

The Bearcats are looking forward to the remainder of the season, hoping to continue their winning streak and make a run for the conference championship.
