**Joint U.S. Canadian Move Sought To Construct Mackenzie Pipeline**

Reprinted by Permission of Toronto Globe and Mail By H. R. K. Irving, Globe and Mail Reporter

OTTAWA — Energy Minister C. W. Gordon Macdonald announced last week that a joint U.S.-Canadian pipeline from the Mackenzie River valley to the U.S. market would be built. The announcement was made at a press conference following discussions with Canadian officials.

The pipeline will be a 1,000-mile-long line, running from the Mackenzie River system to a terminal on the west coast. It will allow for the transportation of natural gas from Canada to the United States.

The move is seen as a major step in the development of the Mackenzie region, which has vast oil and gas reserves. The pipeline will provide a strategic advantage for Canada in the energy market, and it is expected to boost the economy of the northwestern provinces.

The pipeline is estimated to cost $1 billion and will be built over a period of six years. It is expected to begin operations in 2022.

**Poll Shows Canadians Want Clean Environment**

By LESA SPACE

Washington, D. C. — Although only one-third of the American public agrees that pollution is a problem, a recent poll suggests that people are beginning to care more about the environment. The poll, conducted by the National Opinion Research Center, indicates that 55 percent of the respondents believe that the government should take action to protect the environment.

The survey also shows that more people are willing to pay higher taxes to address pollution issues. In fact, 42 percent of the respondents said they would be willing to pay more in taxes to protect the environment.

**CCC Members Selected; Orientation Plans Made**

By DAVID MCCOMERY

At a meeting held on Thursday, April 6, the members of the CCC (Cultural Club of Cornell) were selected and plans for the upcoming year were discussed.

The club, which is open to all students, aims to promote cultural awareness and appreciation. Members are selected based on their interest in different cultures and their willingness to participate in club activities.

**Women Exhibit At UC, Sculpture & Watercolors**

Two women artists are exhibiting their work at the University of California, Los Angeles. The exhibition, titled "Sculpture & Watercolors," features sculptures and watercolor paintings by Cheryl R. R. D., and Barbara Zuckier, Delphi Road, Schenckville.

The exhibition is being held in the art gallery at the university, and it will continue until April 15.

**Ashley Montagu Named Commencement Speaker**

Ashley Montagu, internationally acclaimed anthropologist who has written extensively on human behavior, will be the commencement speaker at the University of California, Los Angeles, on June 15.

Montagu's work has focused on the study of human adaptation and evolution, and he is known for his contributions to the understanding of biological and cultural determinants of human behavior.

**PROPOSED OIL ROUTES**

Jeanne Hayes

WASHINGTON, D.C. — The U.S. government is considering several proposals for the construction of new oil pipelines. One of the proposals involves routing the pipeline through the Rocky Mountains.

The proposal has been met with opposition from environmental groups and Native American tribes, who argue that the pipeline would harm the environment and violate their rights.

The government is expected to make a decision on the proposal by the end of the year.

Do Something!

BY GEORGE HIGGINS

The first stereotype of an administrator is that he is always straitjacketed, not topically unavailable, but Dr. Craft does people. Dr. James P. Craft is the Assistant Dean of our college. Because of his involvement in many committees, he has seven committee assignments. He has chaired the Committees of Political Analysis and International Relations—and one occasionally. Dr. Craft's main job is academic for it involves the study of Humanities, he feels he belongs to numerous political science association. The study of Humanities, he helps the student understand man and his values. Natural Science studies are important factors in the natural world. Political Science, he says, is trying to show how society solves its problems. The study of Humanities, he believes, is very important part of any person's life, and Dr. Craft does relax. Golf was the first activity he mentioned with cooking running a close second. If his description of his roast beef, turn...
FACULTY PORTRAIT:
Mr. Richard Fidler

By LESA SPACER

During his long and illustrious musical career, Mr. Richard Fidler has made a significant impact on the world of music. His contributions to the field are multifaceted, spanning from his role as a musician to his role as an educator and advocate. Despite his busy schedule, he always makes time to mentor young talent and share his knowledge with the next generation.

Fidler, a masterful guitarist and composer, has been a key figure in the development of the blues genre. His unique style and innovative approach to music have inspired countless musicians around the world. His work has been recognized with numerous awards and accolades, including a Grammy Award for his contributions to world music.

In addition to his work as a performer, Fidler is also a dedicated teacher. He has taught at several prestigious institutions, including the University of Illinois at Urbana-Champaign, where he currently serves as a professor of music.

Fidler's passion for teaching and his commitment to fostering the next generation of musicians is evident in his approach to his work. He believes that music has the power to bring people together and that it is a powerful tool for personal growth and development.

Through his teachings, Fidler aims to instill in his students a love for music and a desire to explore its limitless possibilities. He encourages his students to think creatively and to approach music from a variety of perspectives, whether it be through composition, performance, or research.

In conclusion, Mr. Richard Fidler is a true icon in the world of music. His contributions to the field will be remembered for generations to come, and his dedication to teaching will continue to inspire and mentor the next generation of musicians.
New Gym Named Helfferich Hall

The new $3.75 million physical education facility on the Ursinus campus, scheduled for use in September 1972, was named yesterday by that title. Donald L. Helfferich Hall of Health and Physical Education is named in honor of the immediate past president of the College.

In addition, the collegiate-sized swimming pool will be known as the Effie Bryant Memorial Pool, in honor of an outstanding benefactor of the athletic program. Mr. Elliott, chairman of the Athletic Gifts Committee of Ursinus Life Insurance Company, has been president of the Ursinus Board of Directors since 1945. He was also a co-founder of the Athletics Board of Directors in 1964.

The main floor of Helfferich Hall also includes a completely padded wrestling room and regulation squash courts which can also be used for tennis. There are also offices for the entire physical education department.

The gymnasium holds two classrooms and a dance studio which can be converted to two classrooms. In the lower level, team rooms for both men and women will be located. The all-men's locker room will have space for 500 students at one time.

Two complete training rooms and medical examination facilities are provided.

Included among movable sports equipment are cross bars, parallel bars, and drum and bell bars, an ultra-sonic stimulator, generator, and dia- phragm pump. A closed circuit television system is also being installed.

Mr. Elliott, whose primary interest in Helfferich Hall necessitates the demolition of the College Gym, a World War II-era building no longer known to many as the "new gymnasium," said that he would not have permitted it to be demolished.

The Thompson-Gay Gymnasium will remain, and will be used for dance, tumbling, and physical education. The Thompson-Gay will serve in the near future.

Besides the new facility will be completely revamped athletic fields, including eight all-weather tennis courts, new baseball, football, hockey, and soccer fields. The track will be replaced with a complete lane, and a new tennis court will be installed around Patterson Field, the football grid, with new high jump, broad jump, and discuss areas added.

CHAPTER SCHOLARS
(Continued from Page 3, Col. 3) Technology. At Rohn and Raas he was a research assistant in the Laboratories of Microbial Science, Laboratory Head, Research Division. He has also been a fellow at the Center for Research. A key man in the classic effort to synthesize antibiotics involved in polynomials, films, pesticides and pharmaceuticals.

The efforts of the late Professor Elliott will be "Pesticides and the Environment."
