Snyder holds new chair of physics

By C. NITSCHMANN

Dr. Evan S. Snyder, professor of physics and chairperson of the physics department, has recently been named to the Gulliam H. Clamer Chair of Physics, the first physics chair at Ursinus, which is fully funded. Dr. Snyder was invited to apply for the position and was indeed chosen by the college. At the end of five years, he will reapply and a new chair holder will be chosen. An endowment, funded by the Clamer Foundation, accompanies the chair which will allow Dr. Snyder to broaden his physics horizons while he continues to broaden ours. This will ultimately benefit Ursinus in the end. Other chairs in various departments are in the

process of being established.

Dr. Snyder seems to be more than qualified for such an honor. He was the recipient of the Lindback Award for Excellence in Teaching. He has spent a year at Princeton after winning a fellowship from the Natural Science Foundation. One of the men he worked with later went on to receive a Nobel Prize in physics. In addition he also spent seven summers teaching at New Mexico State University.

Dr. Snyder received his bachelor of science in mathematics here at Ursinus. His education was then interrupted by World War II and Uncle Sam, but he was trained as an electronics technician. He was then moved to Los Alamos

where he worked on the top secret "Manhattan Project." After the armed forces, he returned to school at the University of Pennsylvania to get his masters and doctorate while simultaneously teaching physics here at Ursinus. Of course, he eventually settled down to enlighten many physics students who have walked through the halls of Pfahler.

Dr. Snyder is very excited about his new installment and already has some ideas and future projects in mind. He feels that the idea of the chair is a nice concept that allows one to research and expand his present knowledge. Perhaps in a few years Dr. Snyder will be winning a Nobel Prize in physics.

Internships problematic, but necessary

By MARIELLEN DESKINS

Do you want to get a job when you graduate from college? A liberal arts education is an invaluable asset to a student's career. Many employers look for a well-rounded individual — a product of a liberal arts school. However, in order to get the particular flavor of a field of interest, an internship is equally important. In fact, because a liberal arts education is so broad, an internship in the particular field you choose, is essential.

The executive director of the National Society for Internships and Experiential Education stated in October's Ms magazine that one in every five undergraduates are involved in an internship. Ursinus College's statistics certainly do not compare favorably. While the Studio Cottage and Career Planning Offices make an effort, they are up against a tougher administration. Credits for internships are difficult to acquire and the act of securing the internship is still primarily up to the individual.

For instance, I am personally seeking a political internship in Washington, D.C. In order to get credit toward my Ursinus B.A. I have to take a leave of absence, transfer to American University, enroll in their established program, and then wait to see if my credits will transfer back to Ursinus as I seek reentry. All

these steps should not be necessary. The political science department is currently trying to change this policy.

It is rather amusing to note the recruiting films Ursinus uses. They state the advantages U.C. offers in the internship department. Yet, in reality, opportunities only exist if you are willing to transfer to another school or stay here and receive three credit hours for a valuable internship.

A broad liberal arts education is worthwhile but, without on-the-job training and connections, a job is difficult to obtain. Many students are not even sure they know the field of work in which they will be most successful. An internship can only help the decision-making process. College is an anxious time of looking toward the future. Concerns can be eased by experience.

For instance, Rose Wuenschel, a senior English major with a minor in communications recently started an internship with Channel 6 in Philadelphia. She works over 24 hours a week without pay and Ursinus will only give her three credits toward her degree. Why does the administration want to discourage this learning process? Rose believes her self-confidence and communication skills have increased substantially. Through discussion with other employers at Channel 6, Rose has learned the avenues she must travel to

advance her career. She has seen the benefits and the drawbacks in a television career and can now plan her future accordingly.

So how do you personally go about securing your own internship? The Studio Cottage recently had a meeting to discuss job openings. This building next to Corson has many helpful materials available. One of the best ways to find an internship is to talk to your department head. These professors are kept informed of job openings and are always willing to help. To find an internship you may have to have an extremely persistent attitude.

Dan Scholl, a junior Political Science major, currently in the process of looking for an internship said, "The most important quality to have is perseverance." Call, send resumes, call again, and go talk to personnel heads. Companies want a person they know really wants the experience.

Internships are incredibly important in the development of self-confidence and job prospects. Hopefully Ursinus students are bright enough to seek their own opportunities without the aid of our administration. Unfortunately, the benefits will certainly not be found in credits toward your degree. However, they will definitely be found abundantly in the rewards of working in an internship that will greatly benefit your future.

Founder's Day filled with science

By DAVID M. KANE

Nov. 3 marked the Founder's Day Convocation at Ursinus College. The afternoon's ceremonies included: The conferring of degrees in associate business administration, bachelor of business administration, bachelor of arts and bachelor of science, the inauguration of Dr. Snyder to the chair of Physics; and a Founder's Day address by David Ellis, president of Lafayette College.

Dr. Ellis' address dealt with the topic of science and the liberal arts. He defined the sciences as a study of the entire world around us. He further qualified his definition by adding scientific method cause and effect relationships and using reproductive systems to carry on experiments. He went on to define liberal arts as the conglomeration of many fields ranging from history to psychology. Ellis said that there has been a gulf for too long between the sciences and the

humanities and social sciences, and that our job is to bring them closer together.

He explained that the sciences are constantly expanding. In many instances, one field overlaps another as in the cases of physical chemistry and chemical physics. Among the new fields emerging today, neuro science is by far the most rapidly developing.

According to Dr. Ellis, the key drive of science in liberal education is to produce well educated people. This is achieved by bringing young, motivated students with ability together with teachers and having them work toward a mutual goal. The personalized interaction between students and faculty members helps them to share learning about a subject. An effort by both students and faculty to do research also helps. These methods all point to the fact that education is a joint endeavor.

Dr. Ellis ended his talk with a quote from Chaucer that strengthens his view: "Gladly will ye learn, and gladly teach."

The good and bad of security

The Grizzly was founded in 1978, replacing the previous campus newspaper, The Ursinus Weekly. It is published by students twelve weeks each semester. The Grizzly is edited entirely by students and views expressed in the paper are not necessary those held by the administration, faculty, or a consensus of the student body. The staff of The Grizzly invites opinions from the college community and will publish them as time and space permits.

Take advantage of college's opportunities

College is an opportunity that should not be taken for granted. These four years are for growth and development. This is also a chance to gain the most experience possible to insure that the plunge into the real world is successful. Ursinus College offers one of the strongest liberal arts programs on the east coast for schools of similar size. In addition to the nominal academic course loads, which are required to graduate, are a number of opportunities to express opinions and learn about current events in chosen fields of study. To mention a few of these programs there are the weekly open dialogs, forums, workshops offered by Career Planning and Placement, and most recently a symposium on the future of science. A total of five students attended this symposium on science last Sunday on Founder's Day. Almost half the college population is majoring in the science fields, such as Biology and Chemistry and a turnout of over five was certainly expected. CPP functions, such as resume workshops, draw similarly weak numbers. Why so apathetic? Apathy should have been left behind at high school. College prepares you for the rest of your life, so why not take advantage of the knowledge that will make life and career choices that much easier. Sure there is time to have fun by watching television and drinking a few beers, but an hour seminar or half-hour dialog is more than worth the time. Join activities and help yourself as you help the college guide you toward optimum goals.

J.F.P.

TOYS FOR TOTS COLLECTION

Nov. 16 and 17 from 1 - 5 p.m.

Located in the parking lot in front of the tennis courts. Sponsored by (Delta Pi Sigma Fraternity) in conjunction with the U.S. Marine Corps. Old and new toys accepted.

Dear Editor:

I'd like to share with you some recent happenings concerning the Ursinus College Security Staff. While in the Student Union I noticed someone who fit the general description of the assailant who stabbed a student on Main Street. He was sitting alone and acted a little strange. I thought it was the stranger when he approached a female student and pulled her over to him. She responded by leaving the area. When I asked her about the incident, she said, "He doesn't go here. He's kind've flaky; you just better leave him alone." I called security and was dismayed at the haphazard and unprofessional response.

a) He came into the lounge and asked, "Is there a stranger here?" To his surprise no one answered, "Me! I'm the stranger!"

b) After I pressed him to him to return, he got the stranger's name and assured me that he was OK. "I know his parents; he's OK." Well, from my experience, just because you know someone's parents doesn't mean that you know him or what he is capable of.

c) This person was not a student, and was not with anyone (as stated previously). However, when I pressed our security officer he said this person was visiting a friend on campus. But, I didn't see his friend for the hour that I saw him. So I asked a few questions of his supposed friend who was downstairs at the time. (Something security must have forgot to do.) He said, "The guy comes in and says hi to me. I really don't know him or invite

him here. He asks me to tell him where the parties are." First, I wondered why I had to find this out, instead of our "professional security officers." Then I wondered where this persons visitor's pass was, since all visitors are supposed to get one. Why wasn't this checked and if he didn't have one, why was he permitted to remain on campus? (Which he did, until he was taken for questioning by the Collegeville Police Department.)

d) Our security officers asked why this was so important to me. That's not exactly the type of response one would expect of a civic minded student trying to catch a fellow student's attacker, but I did tell him that the victim was my girlfriend. He then informed me that the incident was my fault for letting her walk outside at 3 a.m. I can't deny this, and believe me I relive that decision every time I see the hurt in her eyes. I know that I was wrong but I can't help wondering that if security spent a little more time patrolling Main Street and a little less time passing judgment, whether a crime like this might have been deterred. I've lived on Main street for 1 1/2 years and have yet to see security patrol in a car, or on foot. I know they can't be everywhere, but a little visibility would go a long way towards deterrence. The security guard also mentioned that he was afraid to walk Main Street after dark. If we had security officers that were not afraid, the weirdos might find Main Street too dangerous or risky to try stunts like the one of Oct. 8.

I insisted that I would call the Collegeville Police if he would

not. They were notified and an officer arrived immediately. Showing great interest in the suspect, even asking that an off-duty detective be awakened to question the suspect, as well as possibly photographing him.

Maybe it's a longshot. If I were the assailant I would certainly not come back to Ursinus College, but then again I would never attempt to force someone into a car, nor stab anyone, so I cannot make claims as to what the assailant will do. Remember, so far he has gotten away with it. I can only suggest that we not walk alone at night, and also that we review our security situation before another incident occurs. Maybe I'm suggesting a larger security force, a younger one, and definitely a better trained and equipped one because I know that students will continue to walk alone day and night, to study, to go to evening school, to socialize with friends on campus property, and to go to the 7-11 for some munchies to get us through those all-nighters. Tell your parents, tell alumni, tell the President of the College that you want a security office that works with the students, and is able to and committed to making this campus as safe as possible. Walking in groups is a deterrent, but works 10 times better with a well-equipped, student-oriented, security patrol that makes itself highly visible on all parts of the campus. Enough talk. Let's all make ourselves safer. Let's not settle for mediocrity or insecurity.

Bob

Dear Editor:

I find the lack of faith within the security system rather disturbing. The Ursinus College security force does a fine job in protecting the welfare of the college community for a campus this size. The seven members patrol the campus and the immediate vicinity seven days a week, 24 hours a day. In light of the stabbing incident that took place, we are able to respond quickly and efficiently to emergency situations. Take for example the stabbing incident which occurred last month...

If tigher security measures are what you desire, maybe you would prefer armed details to invade the privacy of residents in order to make periodic inspections of the residence halls to verify the absence of unauthorized visitors and make sure that people's doors are locked. Perhaps, you would enjoy becoming more suspicious of people you encounter. Why not try subjecting each and every individual to the third degree in hopes of obtaining their motives for being here? Perhaps, you would prefer to ban the wild

alcohol parties in the dorms since they are the greatest attraction of unwarranted visitors that you are referring to.

The system does not always run smoothly, but it works reasonably well. I espouse that the fault does not lie within the policies of performance of the staff, but rather with the Ursinus students themselves. I am quite confident that if each person acted as their own security agent, we would have very little need for a full time security patrol.

Sincerely,
Jonathan R. Verlin

LETTER POLICY

Letters must be typed and no more than 300 words. Name and telephone number are required for verification purposes. Letters should be deposited in the Grizzly mail box in Corson Basement by 7 p.m. Monday. The Grizzly reserves the right to edit all letters. Requests for anonymity will be considered by the editorial board.

Thanks Bro

Dear Editor:

The Brothers of Zeta Chi would like to thank the Brothers of Sigma Rho Lambda for their generous contribution this past Saturday night.

Sincerely,
Zeta Chi

CAMPUS MEMO

By RICHARD P. RICHTER

SCIENTIFIC: Alumni and faculty made up most of the audience last Sunday at the symposium of nationally recognized alumni scientists in Wismer Hall. A few enlightened students attended. Where were their classmates?

Those who attended heard what to me was one of the finest programs Ursinus has mounted in many years. There was a common theme in the remarks of our visiting alumni scientists: the

scale and atmosphere of Ursinus enabled them to develop as persons as well as scientists. Students in attendance, I must believe, went away with a tremendous feeling of reinforcement about the program at Ursinus. These outstanding scholars from Harvard, Stanford, Cornell and the National Academy of Science all testified to the help they got from their professors and the chance they had in student government and other activities to grow as

responsible individuals.

Ursinus students often are criticized for having immature priorities. It is indeed easy to think that the science students who stayed away from the symposium in droves were busy doing the wrong thing last Sunday.

SYMBOLIC: Dr. Evan Snyder received a handsome medallion when he was inaugurated in the Gulliam H. Clamer Chair of Physics, the first fully funded professorial chair to be created

at Ursinus College. It was designed by Dr. Theodore R. Schwalm, President Emeritus of the Board of Directors of Ursinus. Dr. Schwalm headed a company that made its mark with a low-cost way to produce watch dials. It became a supplier to Timex when that company revolutionized the time piece industry some decades ago. An outgrowth of Dr. Schwalm's watch dial manufacturing was the designing of specialty medallions.

Dr. Snyder occupies the first fully funded professorial chair, but he did not receive the first Schwalm medallion. At the October faculty meeting, Dr. Roger P. Staiger was awarded the first one. He is the David Laucks Hain Professor of Chemistry, a partially funded professorship that he has held for some years. My guess is that both Dr. Snyder and Dr. Staiger will be happy to show you their symbol of professorial office if you ask them.

In Search of success:

By LIZ YOUNG

Lawrence Jackson is the featured alumnus this week. After several interviews with Ketron, Inc. he was offered a job there early in the second semester of his senior year. He began working there soon after his graduation in May '85 as a programmer/analyst. According to Larry, Ketron is an analytic company that works as a military subcontractor. His job is to help keep the Navy aware of their ability to perform in emergencies.

Larry's position requires him to work with computers —

designing, writing and running programs that will analyze data given to him from the Navy about Naval aircrafts. The Navy must be aware of the readiness and maintenance of their aircrafts at all times. To keep informed, the Navy received necessary data at its main processing center which gathers information from all over the world. In his job, Larry answers questions asked by the Navy and generates reports that clarify the condition of certain aircrafts.

Larry is pleased with his job and plans to stay with Ketron in

his present position. He worked for the same company during his junior year summer and was already familiar with the environment at Ketron before he began his full-time job there in June. "Working there for two months during the summer let me know what it would be like working there day in and day out. I knew what would be expected of me and how strict they would be." Having the summer job experience gave Larry an extra edge over other new employees, but he still had to make adjustments in the new schedule, "It takes a lot to get into the new

routine. The hardest thing for me was getting used to not having afternoons free." He felt "pretty well-prepared" by Ursinus for his job, but still had to learn and adapt to his particular position. "It's different in college than it is when you get out into the world. The company expects to train you on the job and get you familiarized with the environment but you still just have to get used to it."

When asked about the interview process Larry remembered that it was important to be well-prepared in the

background of the company. He was interviewed 15-20 times and found the hardest question for him was, "Why do you want to work for us?" He suggested, "Try to get interviews first semester senior year. It is really important to start looking early."

His last advice to current students was, "Try to get a summer job or internship related to your major in your junior summer. It could lead to a permanent job if you show that you are a good worker with a good attitude like it did in my case."

Parsons adds a touch of Dutch country

By KATIE CYR

Professor Parsons is hardly ever in his office, but can always be found on the third floor of Myrin Library in the Pennsylvania German Archives Room. Prof. Parsons told me that this is where he did extensive research about the Pennsylvania Germans. In addition to this, Parsons has also been designated Visiting Research Scholar at Juniata College in which he is working under a grant to annotate and edit materials from a collection of German-American Imprints.

Prof. Parsons is a long-time member of the Ursinus teaching staff, (currently working on this 39th year of teaching)! He graduated from Ursinus in 1947 and continued on to receive his Ph.D. from University of Pennsylvania in 1955. Throughout his years of teaching at Ursinus he has instructed various subjects

such as French language and culture, Russian and World History, political and social U.S. History.

Pennsylvania German studies is one of Professor Parsons' strong knowledge areas. Ursinus offers a total of 33 credits in the field of Pennsylvania German studies. It is possible to achieve a minor in Pennsylvania German studies here. Ursinus is the only college that offers a minor in this unique area of study.

Among many of his achievements, Professor Parsons has published a text of his own; "The Pennsylvania Dutch: A Persistent Minority." The book, still to this date, remains the only comprehensive, historical accounting of the origin of old world life and American adventure of this persistent American minority group, who originated in Europe. If anyone is interested in reading or pur-

chasing this book, it will be available for sale by Parsons after Jan. 31.

Speaking as a student who has taken some Pennsylvania German classes, I urge others to take advantage of this unique program taught and directed by Professor Parsons. The courses that are offered include: Pennsylvania German History and Folk Culture, Folk Music, Folklife and Folkart. In these classes, you can learn much about the heritage of the Pennsylvania Germans, some of whom have settled in nearby regions. Professor Parsons not only teaches these courses but can speak much of the dialect and writes poetry in the actual dialect.

Thank you Dr. Parsons for your contributions to Ursinus and congratulations on your numerous achievements.

Playing red/gold in recruitment

By RITA WALLACE

"Red and Gold Days" is a quite familiar phrase to the Ursinus community. About three times each semester, 100 extra students come to our beloved campus. This semester, dates were set for Oct. 17 and 18. Still scheduled are Nov. 14 and 15 and Dec. 5 and 6. Being that these extra students

are high school seniors, their hosts take them out to show them a "real good time, college style." U.C. students have a blast, partying with college students on their first night here; then they have to face college realities and wake up the next morning and go through a full days schedule!

Their first night here, they find

out that sure, college is fun, but otherwise, it's all hard work and many responsibilities. The students get a chance to spend a night away from home in a dorm, then the next day attend classes, eat in Wismer, talk to faculty members and coaches and walk around campus. Grant it, you can't put the whole picture of

college life into an overnight portrait, you don't have to. However, U.C. gives it a good shot.

This program is not offered in many colleges. Most high school seniors don't know anything about college except for the stories their friends tell them. Ursinus realized this and put

together this program.

The whole idea of Red and Gold days is to show a student a slice of college campus life. This could help the student decide whether or not U.C. is the place for him or her. Red and Gold days make a statement about Ursinus itself and college life in general.

Outside of Collegeville

S.A.T. DEBATE RAGES ON

David Owen, an active opponent of the Scholastic Aptitude Test, claims SAT has become "little more than a test of whether parents can afford to pay for a coaching course."

Owen and Richard Noeth of the Education Testing Service, the SAT's creator, debated the test's effectiveness at a National Association of College Admissions Counselors meeting in October.

While Noeth admits informal test preparation can increase a student's score, he says claims that coaching can raise scores by 150 points or more are based on nothing more than "anecdotal evidence."

The Princeton Review, a coaching firm currently involved in litigation with the ETS, says it can raise test scores by up to 250.

Home Football Games at the U. of Kansas bring about \$500,000 in business, per game, to local merchants, according to the Lawrence, Kan., chamber of commerce.

Porn Returns to Indiana U —

Just days after officials bragged their new policy of giving the names of those who sponsor porn films on campus to local prosecutors had kept dirty movies off the campus this fall, a student groups called the High Tech Film Series arranged to screen "Fritz the Cat," an x-rated cartoon feature.

Michigan State officials, meanwhile, said they may consider showing porn films on campus a violation of the school's prohibition of sexual harassment.

Film sponsors consequently could face disciplinary action.

Study: Student's Don't Like to Talk About Love Lives — The most forbidding topic of conversation among college couples seems to be the couples' relationships, a survey of undergrads by Lewis and Clark College Prof. Leslie Baxter found.

Baxter thinks it's because mates fear finding out their lovers aren't as committed to the union as they are.

George, North Carolina Battle over Which was First State University — The U. Georgia celebrated being the oldest state school in the land on Oct. 11, but North Carolina-Chapel Hill held a celebration of the same distinction on Oct. 12.

Battling historians point out Georgia got a charter on Oct. 11, 1795, making it the first chartered state campus, but didn't open for classes until much later.

UNC, however, held classes in 1795.

Police Arrest Suspect in San Francisco State Black Studies Bombing — They charged Coy Ray Phelps, who may be tied to Ku Klux Klan and Aryan Nations groups, with bombing a campus classroom used for black studies courses last spring.

San Francisco authorities also charged Phelps with bombing two synagogues.

Full-Time Enrollment Will Fall, and part-time enrollment will climb for the next five years, according to the National Center for Education Statistics.

"Rat Fink" Anger

"Students at Amherst College are protesting a new set of parietal rules, including a so-called 'rat fink' clause which makes all residents in each dormitory responsible for reporting violations of the social code," College Press Service reported on Oct. 5, 1965.

To protest, about 100 students refused to hand in signed honor code cards to the school registrar.

The students also wanted to extend the time by which women were required to leave men's dorms each night.

Two Officers Resigned in Protest from the U. of North Carolina chapter of the conservative Students for America when the national board of directors removed the chapter's vice president and expelled him from SFA over his support of funding for a gay and lesbian student group. The resigning officers said the power to remove officers belongs to the local chapter members, not the national board of directors.

U. OF MINNESOTA PROTESTORS ACCUSE C.I.A. OF ATROCITIES

About 25 demonstrators waved signs and chanted protest slogans when CIA recruits set up shop at UM earlier this month.

The demonstrators demanded the CIA get out of Central America and off the UM campus.

Meanwhile, pro-CIA bystanders heckled the protestors with shouts of "communist pigs" and "pinkos."

Pacific Lutheran Students Object to New Campus Sculpture — "Sunday Morning," newly-erected in a campus cafeteria, is a collage of "things yuppies throw away," explains artist Barbara Minas, who also teaches in PLU's art department.

Minas found the "things" floating in nearby Commencement Bay, and assembled them on a huge metal cross.

Students, however, have complained to the campus food service director that the sculpture is "inappropriate," and should be removed.

Freshman urged to begin career planning

By J. GRIFFITHS

At this point, many of us probably feel that we have plenty of time to plan for a career. After all, 20 to 30 percent of Ursinus seniors wait until four weeks before graduation to start looking for a job. They stroll into Studio Cottage, expecting a decent job to be sent their way. Unfortunately, few jobs are left at that point. They become irate at the center, and the college, feeling as if they have not been properly guided in the areas of career planning.

Carla Rinde, Director of Career Planning and Placement, urges us to start now. Ideally, the freshman year is the best place to begin planning for a career. Without a doubt, job planning is both energy and time consuming. But isn't it worth it, especially when we hear that 5-10 percent of our graduates are unemployed, and 10-20 percent are grossly over-qualified at the job where they are presently employed.

There are usually three basic

reasons why jobs turn out to be unsatisfactory. Unrealistic expectations of what they are capable of is the most popular. In addition little time or thought may have been put into planning ahead, and the student might not have known how to make their undergraduate school work for them.

It is important to understand some fundamental of career planning before you begin looking for a career. Know your own abilities, interests, resources, limitations and aptitudes. Have a basic knowledge of requirements and conditions for success. What's available in the job market? There are over 35 thousand jobs to be found today. Then simply relate the two together.

For those of you who have no idea what you are even interested in try making a list of everything you have done, including courses you've taken, summer jobs and group activities. Check those that

you've enjoyed and decide what was required for them. Some patterns will probably emerge. In addition, take minors in subjects that interest you and try internships to get a broader perspective on careers.

In the Studio Cottage, materials are available for your use. These written materials include research, books and pamphlets. Job titles are listed, along with starting salary, need of workers, working conditions and education needed. There is also an Alumni Career Counseling Group, where an alumni would be willing to talk to you about their job interview and employment experiences. Individual appointments can be made with Carla Rinde if you are interested in starting your search now. It is, however, important to be at a point where you are willing to work. But do start soon, and thus be able to enjoy a satisfying job or even be able to have a choice of jobs.

Key Issues

The Cub and Key Honor Society was established to recognize several senior males who actively participate in campus activities as well as excell academically. Despite maintaining a low profile in previous years, we would like to serve the campus community by addressing pertinent issues that concern all of us at Ursinus. Should anyone have a question we do not address throughout the course of this column, please contact us so that an explanation might be obtained.

Most of us realize that Ursinus has a very prolific premedical committee that assists students wishing to enter schools of the healing arts. This committee assigns recommendations to prospective students, assisting them in their quest for entrance into such schools.

Since this arrangement appears to be very successful, why

haven't other departments followed suit? Certainly the Career Planning and Placement Office has done a commendable job in aiding students wishing to enter the job market, but what about future law or graduate students? Although there is a Pre-Legal Society, couldn't there be a Pre-Law committee that offers recommendations similar to those offered by the premedical committee? The graduate school candidate could also benefit from such an organized set-up.

It is apparent that a group recommendation, compiled in an orderly manner, would carry more weight than individual recommendations from professors. If this type of arrangement could be initiated, it may develop a tradition and prestige similar to that held by the premedical committee.

GRIZZLY BEAR SPORTS

November 8, 1985

Page 5

Booters play the Bridesmaid again

By TOM BROWN

The Brooklyn Dodgers lived by the slogan, "We'll get 'em next year!" For the third straight year, the Ursinus soccer team finds itself echoing the sentiments of those Dodgers' teams. By losing to Swarthmore this Monday, the Bears let another MAC division title slip through their fingers. The playoff game was set up when Ursinus defeated Widener, 4-1, and Swarthmore edged Haverford, 2-1 on Saturday.

Against Widener, the Bears dominated play, but did not demonstrate the skill they possessed. In the first half, John Ackerman got U.C. on the board as he took a pass from Chris Hoover and chipped the ball into the Widener net.

In the second half, Kenny Bull gave Ursinus a 2-0 lead when his

header off a Steve Coulter throw-in eluded the Widener goalkeeper. Widener seemed certain to score when they were awarded a penalty kick, but the shot went wide. Widener did, however, cut the score to 2-1, later. U.C. got their third goal when another Coulter throw-in found the mark. This time it was Ackerman who headed the ball home for his second goal. Freshman Dennis Quinn finished the scoring when he took a through pass from Dan Whitten and tucked it into the back of the net.

The Ursinus victory, coupled with Swarthmore's win over Haverford, set the stage for a playoff to decide which of the teams would claim the division title and advance to the MAC tournament.

The first half ended with the

teams deadlocked at 0-0. Swarthmore seemed to have the better of the play, as the Bears could manage only a single shot on goal in the first 45 minutes.

In the second half, U.C. turned the tide. Ursinus kept the ball in the Swarthmore end for nearly 20 minutes, but could not manage a goal. The domination was total, and it seemed to be only a matter of time, perhaps overtime, until the Bears would score. Then, with one minute to play, Swarthmore finally got the ball across midfield and when a defensive misque left a man open in front of the net, U.C.'s title hopes were dashed.

On Thursday, the Bears closed out the regular season against Trenton State. Saturday, the ECAC playoffs open up as Ursinus takes on Franklin and Marshall in a rematch of an early season matchup which F&M won, 2-1.

EVENING PHOENIX PHOTO

Lady Bears off to ECAC for another time

By JILL THEURER

For the third straight year, the Ursinus women's field hockey team has been invited to play in the Eastern Collegiate Athletic Conference Tournament.

The competition for the ECAC crown begins today as Ursinus, seeded third, is scheduled to face second seeded North Eastern. The winning team will take on the victor of the Lock Haven-Boston College game. These teams are seeded first and fourth, respectively. This final competition will be played tomorrow. At the time of this writing the Bears have compiled a 13-5-1 record while North Eastern stands at 11-2-4.

In 1983, Ursinus captured the crown in its first ECAC competition. However, last year the Bears fell to Boston College in the final game. Items considered in order to receive an ECAC bid include: win/loss record, scores against the top 12 teams in the NCAA, common opponents and strength of schedule as well as several other categories.

In regular season play, Ursinus slid past LaSalle last week by a score of 2-1. Goals were notched by Kelee Whiteley, who was assisted by Pam Braun and Beth Bingaman. The Bears dominated the games as they took 35 shots on goal and defended just nine attempts by LaSalle.

Next, Ursinus hosted St. Joe's on Halloween. The opponents upset the Bears, 2-0, as they scored early in each half. However, Ursinus pounced right back the following day by defeating Villanova by a score of 2-0. Braun and Bingaman each had their ninth goal of the season. Sophomore goalie Kris Karr received playing time as well as Freshmen standouts Suzanne Thomas, Nanci Sarcinello and Sandy Dicton.

The JV squad took on a strong LaSalle team last week losing by a slim margin of 2-1. Their record stands at 5-5.

Bad luck strikes the Grizzlies

By R.P. BREWSTER

Muhlenberg quarterback Chris Giordano scrambled 3 yards for a touchdown with 11 seconds to go and ran for a two-point conversion moments later to give the Mules a dramatic 35-34 victory over the Grizzlies of Ursinus.

Ursinus (2-4) had rallied from a 21-7 deficit and had gone ahead 34-27 with 3:14 remaining on a Brian McCloskey to Bill Scanlan pass, which covered 23 yards for

the score.

McCloskey completed 12 of 19 passes for 206 yards and two touchdowns as U.C. outgained the Mules, 396 yards to 296, in an end to end offensive air show. He also ran for 51 yards and another score, while breaking Craig Walck's school record with his 263rd career completion.

This loss was the Bad Luck Bears third straight heart-breaker and was a near fatal

blow to their battle for a winning season. To finish with a 5-4 record the Bears must win their remaining three games against Washington and Lee, Dickinson and Catholic University:

Bear Scoring:

* with 2:23 left in the half U.C. got on the board on a Russ Perry one yard run (Mules 14, Bears 7),
* on the last play of the half McCloskey went over from the two to cap a 7 pay 72-yard drive.

(Mules 21-Bears 14);

* McCloskey hits Chip Marchand for a 25-yard touchdown on U.C.'s first second half possession. (Mules 24-Bears 20);

* Russ Perry scored from the two to end an 16-play, 64-yard drive. (Bears 27-Mules 24);

* Scanlan caught a would be game winner with 3:19 on the clock from McCloskey for a 23-yard touchdown (Bears 34, Mules 27).

URSINUS MAKES FANS AN OFFER:

PUT YOUR FOOT WHERE YOUR MOUTH IS

Is there a single football fan out there who hasn't booed a placekicker for missing a chip-shot field goal? Of course not.

Well, on Saturday Ursinus College will make the vocal fans an offer: Put your foot where your mouth is.

Ten lucky fans will get a chance to kick a 25-yard field goal at halftime of the Ursinus-Washington & Lee game Nov. 9. And if they make it, they'll win a video-cassette recorder.

Game time is 1:30 p.m. at Ursinus' Patterson Field.

During the second quarter, 10 ticket stubs will be drawn and 10 names announced. At halftime, they'll each get one attempt at a 25-yard field goal — just five yards longer than a measly extra point. If it's good, the kicker will win a new JVC video recorder with four heads and wireless remote control, retailing for around \$500.

If more than one kicker make it, they'll "kick-off" against each other for the prize. Everyone is eligible except members of the Ursinus soccer team.

"I'm not sure what I'm getting myself into," said designated holder Roger Brewster, a junior at Ursinus and the backup quarterback on the 1984 varsity. "I just hope I still have my left hand after Saturday."

Box lacrosse popularity grows

By JOSEPH F. PIRRO

There was one second left, and only time for one more shot, but that was all that was needed for the Canadian box lacrosse team to notch its second consecutive World Cup Championship over the United States.

The score stood at 20-19 with just 16 seconds left in the third period. This score is a computation of the first game's final score and the near three periods of this game. Canada tied the game on a quick shot and knotted the game at 20-20. At this point

there was a mad rush to the exists to beat the concession line crowds in an anticipated intermission period before the overtime session. Unfortunately or fortunately, those fans never got to see the United States fall on the final second shot. This shot buried the U.S. team, and crushed the hopes of the 7,000 plus fans that gathered at the Spectrum on Nov. 2.

Quite a sport this box lacrosse is. Last year when this feature event came to the Spectrum, violence was the key theme. Fights broke out in the stands

between security guards, ushers and the general public provoking police intervention. This time around there were no fights outside the rink and the talent of the lacrosse players was the focal point of an attentive audience.

Box lacrosse is a team sport which is very much like regular men's lacrosse, except the field dimensions are considerably smaller in the ice-rink sized field. Talent is demanded and condition a must. It seems like a sport that will begin, and has already begun to take America by storm.

The Stand

By MARYANN ANTENUCCI

Tomorrow night Ursinus will be invaded by a local rock band known as The Stand. The party will be held at Ritter Utility Gym from 11 p.m. to 2 a.m. It is sponsored by the classes of '86, '87, '88 and '89 and is supported by a number of sororities and campus organizations.

This band is known throughout local clubs for its high energy rock and roll sound that is great for dancing.

The band was formed two years ago. Since then The Stand has performed at approximately 20 clubs and college campuses in Pennsylvania including The Chestnut Cabaret, Grendel's Lair, Penn State Main Campus and Drexel University. The Stand has also performed many times in Delaware, Virginia and New Jersey.

Scott McClatchy is the lead singer who also plays guitar. His commanding stage presence pulls the band together and entices his audience to get into the music as much as the band does.

Scott is backed by Fran Sankey, their masterful lead guitarist, and Dave Harber who plays a mean bass. Rounding out the band is Chris Farnsworth on drums and Carri Agnew with her powerful backing vocals.

The Stand's performance is an impressive combination of original songs along with popular oldies and current rock hits including songs by Springsteen,

UZ, REM, Elvis Costello and John Fogerty. Their first 45 featuring "Heartattack" and "Walk Like a Man" has already gone into a second pressing. Their music will soon be heard on college and commercial radio stations as well.

The basic idea of the party is that it is from everyone for everyone. You don't have to be in a particular fraternity or sorority to feel welcome, by being a part of this campus you are already involved.

The driving force behind this function, and person responsible for keeping the idea alive has been Glenn Scharf. His ideas and enthusiasm stems from a goal of his. He stated, "Before I graduate, I would like to get the whole campus together. I believe in The Stand and I believe that everyone will enjoy the event."

This gathering, however, would not have gotten off the ground without the support of several individuals, including the presidents of each class: Jo Gagliardi, Chris DeSantis, Tony Fiore, and Brian Finger, as well as help from Mike Grant and Ann Salchow.

Although all of the above mentioned people have been instrumental in putting together this event, it will not be a success without the support of the entire campus. So Saturday night from 11 to 2 you are all invited to come on down and meet The Stand!

Successful search for liberal arts students

By HEATHER CAMP

The latest in the series of Career Planning Workshops was held Tuesday night, and a surprising number of students braved the rainy trek over to Studio Cottage. Entitled "Job Search Strategies for Liberal Arts Students," the discussion was focused primarily on how an effective job search is vital for liberal arts students. As Dean Rinde, U.C.'s Career Planning and Placement Counselor, pointed out, graduates with engineering degrees are easily marketable, but liberal arts graduates whose field of study is less concrete must work harder to draw the attention of employers. Before Dean Rinde acquainted the group with various job search approaches, she was careful to stress the three fundamental principles necessary to help us find our first job. Not only must we start early (seniors this means now!) and have the desire to persevere through the research and rejections, but we must also be realistic in our goals.

Dean Rinde broke down job search strategies into two categories. Familiar to most students is the traditional ap-

proach whereby the job seeker relies on college sources, newspaper want ads, employment agencies, professional and trade associations and/or the direct contact approach. Yet, according to Dean Rinde, only 20% of all available jobs are actually advertised. This suggests the traditional approach is not the most effective. For this reason, Dean Rinde recommends students use a non-traditional job search approach. While this approach is more time-consuming, it connects job-seekers with that other 80% of unadvertised available jobs. Gathering information about your field of interest, interviewing, and networking (using all your personal contacts to zero in on the person you really need to talk to) are the three tactics involved in the non-traditional approach.

These approaches seem clear-cut, but the actual application is often a harrowing experience. Dean Rinde encourages seniors to meet with her and to take advantage of the resources in Studio Cottage. And for all those students not yet facing the real world, it's never too early to start researching for your future!

Athlete of the Week:

Senior quarterback Brian McCloskey has been named Ursinus College Athlete of the Week after breaking the school record for career completions Saturday in a 35-34 loss to Muhlenberg.

McCloskey, a four-year starter from Penn Charter and Philadelphia's Fishtown neighborhood, broke the mark of 262 completions held by Craig Walck (1977-80). He now has 273 for his career.

It was the third record of Walck's to be snapped by McCloskey in the past 12 months. Last year he erased the school marks for touchdown passes in a game (with five against Lebanon Valley) and in a season (15).

McCloskey is closing in on two

other records held by Walck. He needs just three more touchdown passes in Ursinus' three remaining games to break the current mark of 32 in a career. And he needs 523 passing yards to break Walck's career record of 4,261.

Against Muhlenberg, the 5-9 McCloskey hit on 12 of 19 passes for 206 yards and two touchdowns. He also ran for 51 yards and a third score.

With 3:16 left in the game, he connected with wideout Bill Scanlan for a 23-yard touchdown, giving the Bears, a 34-27 lead. But Muhlenberg came back to win on a touchdown and two-point conversion with 11 seconds to go, leaving the Bears 2-4 on the year.

Education department offers teaching internship

By BETH MORRIS

Ursinus College is now offering a Teaching Intern program which allows teachers with bachelor's degrees to earn teaching certificates while working in the education field.

The Intern program is perfect for those people who are working in their field of study and who want to enter in the teaching profession. Dominic O'Brien said that the program is ideal, so people can remain employed while becoming certified.

The Evening School plans to offer Education 202 and Psychology 100 in the spring semester and additional education courses will be added. People working in another field or those who are interested in education can take courses in Evening school.

In 1972, a general shortage of teachers in Pennsylvania

prompted the Pennsylvania Department of Education to begin offering teaching internships. The idea behind the internship is to make it more convenient for college graduates to earn teaching certificates. The program has never been well-known among the general public. Teaching internships allow teachers to teach before being certified, whereas previously a person could not become a teacher without being certified first.

The program at Ursinus is available in many teaching areas: biology, chemistry, English, French, general science, health and physical education, Latin, mathematics, physics, physics-mathematics, social studies and Spanish. The governor of Pennsylvania is encouraging all colleges to offer this program and follow our

footsteps.

Dr. O'Brien sees the program as a very beneficial one. "We read so much about teachers leaving the profession to go into business and industry," Dr. O'Brien noted. "But the reverse is also true. There are people who want to leave business and industry to go into teaching. The beauty of this program is that they can start working in the field right away, and get paid for it while taking courses at night or during the summer."

Linda Long, assistant director of the Evening School agreed. "We have always had students of a non-traditional age, who have taken a years leave from their jobs in order to take education courses during the day, to earn teaching certificates," she added. "Now they can take the courses at night. So far, eight

prospective interns have been interviewed for the program.

In order to be accepted into the program, the College reviews the candidate's academic record, communication skills and personality. Once accepted, a candidate must receive a letter from the PDE and then he or she must find a teaching position in an area school district.

When the candidate has found a job, the PDE issues a teaching intern certificate, which allows the person to hold a full-time teaching job. The intern has three years in which to complete the required course work which includes educational psychology and methods and foundations of education. When the intern completes all requirements, he or she is issued an instructional teaching certificate by the Pennsylvania Department of

Education.

"The teaching intern now begins teaching and completing educational course requirements simultaneously, Dr. O'Brien said. The teaching interns will have more freedom and responsibility than our student teachers," he added.

"The Ursinus program can accommodate two dozen interns," Dr. O'Brien said. "It is important that interested persons begin the application process soon, so they may receive their letters from the PDE and begin looking for positions in time for the start of the spring semester or in January," O'Brien added. He and his associates are available during evening hours to consult with potential candidates. For more information, interested persons may call 489-4111, ext. 2274.

Personals

F.A.G.— Congratulations — I knew you could it. Keep up the hard work and you'll come out on top. You deserve the best. Let's hope you have the opportunity to take the top prize. Good luck.

S.S.

Dear SEE & Company

Did you clean the kitchen floor, yet — and what about the utensils. Basically one could say, to put it in a nutshell, cleanliness is next to godliness.

M.J.

To Mrs. H.

So sorry about the intrusion on your guilt and bedspread private party. I should have been formally invited. But — there's always next time.

M.A.K.

Mr. Right:

Sorry about the other afternoon. My shoulder was a little cold. This weekend I promise I'll wear warmer clothes and take some no-doze. Sound fair?

M.E.

Any personals can be slipped under the Publication room door — second floor of the Union. Make sure they are in a sealed envelope labeled 'Grizzly Personals.'

Musicians! A real live rock band is trying to get started on campus! Contact either Kurt Richter or Simon Stokes ASAP! at 489-9918. (Yes, you're good enough. Audition anyway!)

Place Your Bets: Get ready to gamble the night away on Saturday, Nov. 9 from 7 to 11 p.m. in the College Union Lounge. The Campus Activities Board will present a Casino Night featuring blackjack tables, roulette wheels, and dice games set up by a professional company. A predetermined amount of money chips will be given each player upon entrance to the Casino. At the end of the night players may redeem chips for raffle tickets. Two hundreds dollars in merchandise will be raffled off. See if lady luck is with you! Refreshments will be served throughout the most exciting night ever - Casino '85.

Casino Dealers Needed: Are you interested in learning how to deal blackjack? Would you like to work other games of fortune? Dealers are needed for the Casino Night on Saturday, Nov. 9, between 7 and 11 p.m. Please let the College Union Office know you are interested. Dealers are required to wear black pants or skirt and a white shirt. They must attend a workshop at 6 p.m. on Saturday, Nov. 9, in the Union Lounge. Several shifts will be available. More information is available in the Union Office.

Attention Seniors: Please come to the Registrar's Office to let us know how you want your name on your diploma.

Noted Careers Author to Speak: Tom Jackson, lecturer and author of "Guerilla Tactics in the Job Market," "The Hidden Job Market," "The Perfect Resume," and "Get the Job You Want in 28 Days," will be speaking on Monday, Nov. 18 at 12:30 p.m. in the Main Auditorium of the Community College of Philadelphia. Mr. Jackson will be speaking on Guerilla Tactics in the Job Market. The Ursinus Community has been invited to this special presentation. The Community College of Philadelphia is located at 1700 Spring Garden Street, Philadelphia. For more information, call 751-8000.

Faculty and Staff Badminton: Badminton instruction and play will be held in Gym III, Helfferich Hall, on Mondays and Wednesdays from 12:15 to 12:45 p.m. beginning Nov. 4 and ending Nov. 29. This Wellness Activity is sponsored by a grant from the United Church of Christ.

Pre-dental students: If you are interested in volunteer experience at Temple University Dental School, see Dr. Clouser as soon as possible.

TYPISTS: \$500 weekly at home! Write: P.O. Box 975, Elizabeth, N.J. 07207.

Lost: Glasses, please return to SAO OR CU.

LOST: Women's gold watch at Founder's Day ceremony, if found please return to Dean's Office.

LOST: Blue gloves, if found please return to Student Activities Office.

FOUND: Calculator, lt. blue jacket, purple raincoat, gray and burgundy knit jacket and navy jacket. Can claim in Student Activities office.

"Captivating Casino Night" Tired of going to the same parties every weekend? Well for a change come to Casino Night on Saturday, Nov. 9 between 7 and 11 p.m. This promises to captivate you into a night full of excitement and challenge. Try out your luck and skill at black jack or take a chance with the roulette wheel. Sensational prizes, including a TV, walkman, records, wine glasses, to celebrate your success afterwards and many more, will be raffled off. So pass the word, Casino Night in the Union Lounge is the place to be on Saturday, Nov. 9.

ALL ABOARD THE BIG APPLE!!! The Campus Activities Board is sponsoring a bus trip to New York City on Saturday, Nov. 16. The bus will be leaving Ursinus at 8 a.m. in front of the College Union and will leave NY City at 8 p.m. Tickets will be sold in Wismer Lobby and in the College Union Office. The cost for this trip is \$5 for UC students and \$15 for non-UC students. The bus will drop off students at The Rockefeller Plaza. So why not spend an enjoyable day in the Big Apple!!!

The American Society of Women Accountants is holding their annual Student Night on Monday, Nov. 11 at the Marriott Hotel at City Line and Monument roads in Bala Cynwyd. Wine and hors d'oeuvres will be served at 6 p.m. The cost is \$20 for members and \$5 for students.

ASWA Student Night provides a good opportunity for college senior women to meet with their soon-to-be colleagues in the accounting field and discuss their aspirations and their concerns in an informal setting. The meeting should be of particular interest to college senior women who are now interviewing and are faced with major career decisions. The panel will answer questions from the audience. Anyone interested in attending should contact Sharon Greenberg at (215) 564-1300.
