Mr. Jones had come home to his family, who were finding very cordial and kind. His wife and the children had been looking forward to his coming and were very much pleased. He had brought with him a few small gifts for the family and they all sat down to a hearty meal in the evening. Mr. Jones had been working for some time and was looking tired, but he seemed to enjoy the company of his family. He sat for some time conversing with his wife and children before he retired to bed.

The next morning, Mr. Jones arose early and went to work. He had a lot to do and was determined to be as efficient as possible. He was a man of considerable energy and determination, and he was always able to get a lot done. He had a large number of clients to see that day, and he was determined to see to it that he did his best.

As Mr. Jones was walking through the city, he saw a man who looked very much like his old friend, Mr. Smith. He decided to go up and speak to him, and he did so. Mr. Smith was surprised to see him, but he was pleased to catch up with an old acquaintance. They spent some time catching up and discussing the news.

Mr. Jones was then on his way to the office, and he was looking forward to the day's work. He was determined to make the most of his time and to get as much done as possible. He was a hard worker and was always able to get a lot accomplished.
It is a well-known fact that the number of people who have been killed by dynamite is much larger than the number of people who have been killed by other explosives. This is because dynamite is used in so many different ways, from mining to引爆爆炸, that it is difficult to keep track of all the incidents where it has been used. In every case, the use of dynamite has been a source of great danger, and it is a constant reminder of the need for caution and care when handling this dangerous substance.

The use of dynamite in mining is particularly dangerous, as it is often used to blast through rock. This can be a very hazardous process, as the rock may not behave as expected and can cause the dynamite to explode in unexpected ways. In addition, the sound of the explosion can be very frightening, as it can cause panic and chaos among those nearby.

The use of dynamite in warfare is also particularly dangerous, as it is often used to destroy buildings and infrastructure. This can be a very dangerous process, as the dynamite may not behave as expected and can cause the building to collapse in unexpected ways. In addition, the sound of the explosion can be very frightening, as it can cause panic and chaos among those nearby.

The use of dynamite in agriculture is also dangerous, as it is often used to clear land and create new fields. This can be a very dangerous process, as the dynamite may not behave as expected and can cause the land to collapse in unexpected ways. In addition, the sound of the explosion can be very frightening, as it can cause panic and chaos among those nearby.

In all cases, the use of dynamite is a source of great danger, and it is a constant reminder of the need for caution and care when handling this dangerous substance. It is important to always follow the proper procedures when using dynamite, and to always be aware of the potential dangers involved.
The funeral of Mrs. Phoebe Kellar, of this city, took place yesterday afternoon, the services being conducted in St. Andrews' Church. The funeral train will start at 12 o'clock to-day and proceed to Reading, where Mrs. Kellar will be buried in St. James' Church, in that city. The body will be brought here in a few weeks and will be interred in the family lot.

To the Editor of the Independent:

A regular meeting of the Lyceum of this city will be held in the Providence Hall School, near this place, on Friday evening, which members are requested to attend.

J. H. SLAVEY.

Perkiomen Railroad.

The bridge will be closed from six o'clock Tuesday morning of this week, to Thursday morning of the same week, for repairs. The service of the train will be interrupted at that time. The repair work will be done by the Perkiomen Railroad Company, and will be attended to by the men of that company.

The necessity of this repair work is due to the fact that the bridge has been in a state of decay for some time, and it is considered necessary to make it safe for the use of the public.

C. A. F. E. MILES.

Classified Advertisements.

A copy of "Local History" on the first page, first edition, was sent to the office of the Independent by a subscriber. This looks a little inconsistent with the rest of the page, but it is possible that it may belong to a separate issue. The subscriber is thanked for the information.

The funeral of the six-year old son of Mr. and Mrs. J. G. Gotwals, to-day, will remove to his home in the country.

The price of butter is seven cents per pound, in the Philadelphia market.
