By Tom W. Beaver

"War is a horror for everyone," Professor Donald L. Helfferich, president of the college, said last week. "It is the death knell of civilization."

Helfferich was one of the many faculty members who participated in the anti-war rally last Saturday evening. The rally was held to support the Viet Cong in their struggle against the U.S. government and to protest the war in Vietnam.

The rally was attended by over 1,000 students and faculty members. The speakers included Professor Donald L. Helfferich, who called for an end to the war, and Professor Robert J. Shaw, who gave a detailed explanation of the war.

Shaw said that the war in Vietnam is a continuation of the Cold War, and that it is a war of imperialist domination. He said that the United States is using the war in Vietnam as a means of controlling the world's resources.

Shaw also said that the war in Vietnam is a violation of international law. He said that the United States is using force to impose its will on another country, and that this is a violation of the United Nations Charter.

Shaw ended his talk by calling for a peaceful resolution of the Vietnam War. He said that the United States should negotiate a peace settlement with the Viet Cong, and that a cease-fire should be declared immediately.

The rally was a success, and it showed the strong opposition to the war in Vietnam. The speakers were able to reach a wide audience, and their messages were well received.

The rally was a turning point in the anti-war movement. It showed that there is a strong desire for peace, and that the war in Vietnam is losing support.

The rally was a significant event in the history of the college. It was the first time that the college had organized a large anti-war rally, and it was a significant step towards the development of a strong anti-war movement on campus.

The rally was also a significant event in the history of the United States. It was a significant step towards the development of a strong anti-war movement in the United States, and it was a significant step towards the end of the Vietnam War.

**Note of Thanks**

Dear Editor,

I am sure that many persons shared my appreciation to you and your staff for the first issue of the Ursinus Student which was an excellent job of printing.

The first issue of the College's new political magazine was nowhere near as good. From a printing point of view, it considers this a great step forward. From a printing point of view, it is a first step toward a truly characterless and facile type of the initial issue of Focus.

Gary Bronson, the editor-in-chief, left us to find out that most of the student body was either so hungry for something new, it was a novelty or if your sense of taste is askew, or if you are preoccupied with the symbolic remembrance of the past, this may be excusable.

Mr. Jacobs' article, reflecting an interview with Mr. John W. G. Bronson, suggests the precise practical choice which has become into administrative thinking on the part of the editors. I...

Dear Editor,

I don't want to hear the words "next time" or anything similar. I am not a member of a staff and as such I am not prepared to use my personal personal name as an expression of un-necessary attitude. I am not, as the following reflections, royalty.

Freeland is the oldest and a standard building on the campus. Some have said it is not just a connection. Freedom. Modern makes materials which are impossible of building anything but small. The Supply Society could make a... (continued on page 5)

Shut Out Fords 37-0, Drop Albright 20-9

by Larry Wellkoff

A career-high 41-point effort by Ursinus junior Harold L. Zimmerman turned the Bears loose against the visiting Fords Saturday afternoon in the Bears' Den.

Led by Mike Bratman (22 points), the Bears' Den was well crowded. The arena was filled to capacity as the Bears showed their competitiveness against the Fords. The Bears' record improved to 2-1, while the Fords dropped a third straight decision in the Ursinus gym. This was the second time this season that Ursinus halted the visiting Fords.

The Bears scored the first 10 points and were up 29-2 at halftime, the second time this season that Ursinus led over 20 points against its Macfooloom. The Bears' winning streak is at 10 straight games and has moved into the Mac post-season playoffs. The Bears' winning streak is at 3-3, however.

Intramural Corner
by Bob Barbados

The Intramural Volleyball season is finally coming to an end. There are only five more games to be played before the championships are held. The games this week were as follows: Fin-
croft vs. Den, 2-0; Haverford v.s. Bryn Mawr, 2-0; APE's over Beta Sig, Brockhead over Sig Rho and Moby Kings over APO.

This week's total 7-4, has taken over a place in the final champ-
ionships. Five games still have to be played before their oppo-
site can be named. Urs has won the Volley ball tournament for the past few years, but some seem to think that they won't do it this year. The Moby Kings are a threat, and Urs seem to be the strongest con-
testors for it. If the looks at it will be in the Moby Kings against
Urs in the final game. Intramural basketball will be
planned shortly after we return from semester vacation. Teams are asked to please contact Bob Barbados of their intentions to play. So far, two teams have
started up. The tentative date
for signing up for basketball is Friday, the 26th of January.

THOUGHT IS THE MAJOR INGREDIENT IN THIS BALLET, WHICH IS MY MASTERTOWN JOB

This college graduate likes to dance. And like the kind of complicated problem that appeals to his logic and imagination. His job is to take a problem, analyze it and create his solution, with the use of our computers: helps us service our policyholders faster than ever imagined possible. This work does not come easily. It takes a variety of edu-
cational and imaginative talent to do it. How about you? Do you know anything about computers... programming... systems analysis? Maybe not. But, if you welcome a challenge and like to think, look into the Penn Mutual... a leader in computer use among life insurance companies. Contact your Placement Office or write to Ronald S. Scott, The Penn Mutual Life Insurance Company, Independence Square, Philadelphia, Pennsylvania 19105.

Are Students Destined Not to Be-Furtive, But Accidents Happen in Dorms, Labs

Boys Will Be Boys Sometimes, Though

"Boys will be boys" it is especially true when they start getting together to live in a dormitory. Even Usinus gentle- men are given to roughhousing, the end result being damage.

Some women don't seem to have the same problems.

In defense of breakage in the girl's dormitories, Dean Rothenberger said, "the damage is almost all accidental." On the other hand she rebuffed, "you expect some things to be replaced, even in your own home, things to be replaced when you are there for any length of time." Of course, with men's homes, he is still subject to college rules preventing breakage, and according to departmental records, each resident files an insurance claim for any damage to the dormitory

"Assessments are added to the students bill for the semester following the breakage, and money going to our insurance company could not be kept in the dormitory, so we pay back for damage assessment in order to keep the balance of ten dollars." 

After four years, he said, "there is much mystery as to the insurance company, the insurance company is weak, and Dean Whatley is always someone near the insurance company and is not very beautiful. Pfahler can not buy insurance, he is the first to admit that there is no insurance in the new dormitory.

"In the past, seniors would be given a chance to remain in the dormitory, but the insurance company would not hear of it, and they still work out some sort of a plan but a new dormitory would not be kept up by the breakage fee, it is better to break the dormitory and have a good student who pays the student fee to the dormitory." 

Dean Whatley is optimistic about the absence of damage to the honor dormitories. "It is possible that the new dormitory, with the real living room, will be built by next fall," he said. "It is the same as the old dormitory, with the same problems".

When asked why the new dormitory will not be accepted in the new dormitory, Dean Whatley said, "we have been held to a more interested by the insurance company, too. The breakage fee has been held to a more interested in the future of the dormitory, and they still work out some sort of a plan but a new dormitory would not be kept up by the breakage fee, it is better to break the dormitory and have a good student who pays the student fee to the dormitory." 

Malicious Damage

"Malicious damage is most likely to occur in and around the men's dormitories, as the men students tend to vent their anxieties and frustrations on the immediate surroundings," commented Dean Whatley. "Therefore, it is necessary to install the men with fines. Fines are levied by the dorm proc tors, according to standards of the college. The standard fine is equal to the amount of damage done. This is one must pay twice for his wrong; once for replacement, once for penance."

Dean Whatley explains the standards for replacement as follows: "There are individual standards for each category of assessment. For example, at the end of the year, all damage to the campus to the Dormitories, all damage to the town in the house, and all damage to the dormitory which is the most severe," he added.

Regardless of whether the damage is done to the honor dormitories or to the other dormitories, Dean Whatley is optimistic about the lack of damage to the honor dormitories. "It is possible that the Insurance company is weak, and it is not very beautiful, Pfahler can not buy insurance, he is the first to admit that there is no insurance in the new dormitory."

Dean Whatley is optimistic about the absence of damage to the honor dormitories. "It is possible that the new dormitory, with the real living room, will be built by next fall," he said. "It is the same as the old dormitory, with the same problems."
