COLLEGEVILLE MACHINE WORKS.

The above cut is a faithful representation of one of our local industrial establishments. It is a very important part of the interest in enterprises of this kind in our town. The factory is located at Collegeville, a quaintly-constructed and beautifully situated town at the foot of the beautiful Mount Lebanon, the scenery of which is so picturesque as to make it a favorite resort for tourists.

Mr. Abram Green's Works is the business of Mr. John N. Green, who has been in the business for a number of years, and has steadily increased his establishment.

The works are of an unusually large size, and the machinery is of the most modern and efficient kind. The factory is well equipped, and the work is done to order, the products being of the highest quality.

The factory is constantly increasing in size, and the capacity for production is steadily expanding.

The workers are highly skilled and experienced, and the attention to detail is outstanding.

The products of the factory are highly valued, both for their quality and their durability.

The factory is an example of the success that can be achieved through hard work, persistence, and dedication.

In conclusion, the factory of Mr. John N. Green is a model of efficiency and excellence, and a credit to the community of Collegeville.

Agriculture and Science.

BLOWING CLOVER SEED.

Simplicity and economy are our aim in regard to the above proposition, so much so as to do the work at a cost, that, with our guarantee that the growth will be at least as much as the amount of the seed purchased, will be found no other that will do the work better and cheaper.
