**Ursinus Receives Mobil Oil Aid Through FIC**

Ursinus is one of forty-three Pennsylvania schools which will benefit from Mobil Corporation's Mobil Oil Company in 1963 through the FIC Program of the National Federation of Independent Colleges. The FIC Program is a college-wide fund-raising movement with mobil oil as its principal commodity.

Dr. Arthur F. Martin, Hockessin, Delaware, chairman of the Board of Directors of the Mobil Oil Company, presented a check for $12,000 to Dr. John W. Clawson, dean emeritus of the College, with the Alumni Award. The award, presented to Dr. Clawson at the Alumni Day observance, was the gift of a desk-and-chair set given by the late Mr. and Mrs. Donald L. Heffernan in his honor.

The gift of $12,000 was presented by Edward F. Pettit, Mr. Walter Haman, Mr. John T. Smith, Jr., Mr. John B. Wharton, and Mr. Earnest K. MEAVER, members of the Board of Directors of the Mobil Oil Company.

UC Receives Gift of $10,000 to Endow Scholarship

Ursinus College has just received a gift of $10,000 to endow a scholarship fund. The gift was made by the late Mr. Maynard F. Brown, a benefactor of Ursinus.

Why is the 1963 Race so Exciting?

The 1963 Race is exciting because the students are giving the school a good book to read. The book is "The Race," by William J. Kiefer, Conn, 1962. One of the best in the country, the book is a study of the outstanding quality and service of the Ursinus College baseball team. The book is delivered to the race committee and printed in the magazine of the race.

The race committee sends the final copy to the school book store in 1963.

**HELP!**

The 1963 RUBY needs your money and support. With costs of at least $6,000, more than $6,000 more than any other yearbook at Ursinus, the funds of the 1963 RUBY are now more than $1,000 behind the budget.

**Boys Ranch Sends Thanks**

The Weekly has recently learned that in a letter to Dean John R. Crawford, the Boys Ranch for Boys, Bradford, Pennsylvania, thanked the college for its financial support of the ranch.

**Summer School to Open June 10**

A 12-week summer school will be held at Ursinus College, Collegeville, June 10, 1963. Students will be offered in courses in accounting, economics, and business management.

The Rev. Frank Reynolds who presided over the first commencement exercises at Ursinus College last year, was named the president of the University of Pennsylvania. He is the first president of a university in Pennsylvania to serve on the board of trustees of a major university in the United States.

The prize was awarded for the best book of the year, "The Race," by William J. Kiefer, Conn, 1962. The book is a study of the outstanding quality and service of the Ursinus College baseball team. The book is delivered to the race committee and printed in the magazine of the race.

The race committee sends the final copy to the school book store in 1963.
Bolivia and the United States
As far back as the year 1800 the ideals of the American Constitution were being discussed at the Universalad
San Xavier de Chuquisaca, now one of the leading univer-
sities in South America.
Every four years a revolution in democracy was an inspiration for the people of the Bolivian Republic. After the
first revolution created by Simon Bolivar on Aug-
ust 6, 1810, there have been several other revolu-
tions in the history of the Bolivian Republic. The
most recent of these revolutions was the one that
led the War of Independ-
dence against Spanish rule. This was also a political
revolution, as well as a social and economic one.
The ideas of Bolivian revolution could not be trans-
ferred to another South American country with the
same success as they were in Bolivia. The people of
Bolivia, who were fighting for their independence,
were fully supported by their government and the
people of the United States.

The author, Mr. A. E. M. C. B. M., has a long way to go before it is possible to write a definitive book about
Bolivia. It is on the way, and considering the
success of the author, there is a good chance that
it will be completed in the near future and pub-
lished at the University of Buenos Aires.

Mr. A. E. M. C. B. M. has written a book about
Bolivia, which lists the winners of the Ursinus graduat-
ing class. The class has had its leaders, its followers, its
innovators, and its success. What they have done is as
important as that written about any other Ursinus graduat-
ing class. It has made its history, its traditions, and its
achievements an inspiration to all who are interested.

Today some students are accepting their diplomas with
joy, some with the bitter feeling of four wasted years, some
with a nonchalance that belies their true attitude. Yet,
they all have in common the one fact that is true
every year that has graduated from Ursinus: their four
years here are over. Oh, they can come back on Alumni
Days to show off their families and their judgeships, but
never again will they be undergraduates. What they
have gotten out of Ursinus will be theirs for life. What
they have missed is lost to them forever.

It is to your advantage to live every minute of those four
years. It is to be alive, alert, in the middle of things. The seniors have
already made their mark. The juniors will be theirs for life. What they
will do is as important as the things written in their yearbook.

It is to your advantage to take every opportunity that
comes your way. It is to use everything that is available
to you. It is to use your time wisely. It is to use your
ability to the fullest. It is to use your talents and your
strengths to the fullest.

A pilot project for an integrated course in chemistry, physics and mathematics for first-year students majoring in the sciences will be given at Ursinus college during the next academic year, it was announced here today by Dr. Donald L. Helfferich, president of the college.

Conceived and planned by these young members of the faculty, the proposed course has had the approval of the heads of their departments, the Academic Council, and the faculty as a whole. The biology department, while not directly involved, has instilled the experiment and said that it would be "happy to recognize this course as a "model" for the entire college." 

The three professors, Evan S. Snyder, physics, Roger P. Slacik, chemistry, and Blanche B. Ruhlt, mathematics, will devote at least two months this summer to preparing the course plan and will then share in its presentation beginning with the fall term.

All are alumni of Ursinus College. Dr. Snyder did his graduate study at the University of Pennsylvania, Dr. Slacik at the Massachusetts Institute of Technology, and Miss Ruhl at the University of Pennsylvania.

Readiness of content and emphasis in response to changes in scientific development and the present requirements for graduate training was cited by the three as the primary reason for the integrated course they plan.

Other features of the experiment mentioned include: (1) an introduction to the use of the scientific method, (2) a study of the physical sciences in the freshman year rather than in two years under the prevailing system, (3) elimination of computerization, (4) a more analytical approach to physics and chemistry through the mathematical techniques associated, (5) emphasis on related mathematical principles, (6) a more unified presentation of the material, and (7) the economy of time by reducing what is now a 22-credit semester schedule to the 18-credit schedule of the proposed integrated course.

Previous experiments at other colleges have provided integrated courses in physics and chemistry or physics and biology, but the Ursinus experiment is believed to be the first attempt at an integrated approach to the three major fields.

Approximately 25 students will be admitted to the course, five each from among students planning to major in biology and pre-engineering as well as in the three fields directly involved. Those permitted to enroll will be selected so as to assure that the groups planning to major in biology, chemistry, and physics will be made up not only of young professors who have proven vocations in the fields but of a laboratory manual based on their own approach to the general content of the course.

In addition, emphasis will be placed on student participation in laboratory experiments.

Dr. Arthur F. Martin, who was awarded an Honorary Doctor of Science Degree at graduating ceremonies.

According to Pertoe.

Havertown, and Miss Anne Loraine Thorburn, daughter of the Rev. Thomas G. Thorburn, Sackettsford Road, Philadelphi

is a graduate of Ursinus College. She received her appointment to OTS through competition with other college graduates.

Howard's End . . .

She recognized what Henry James meant by "Henry James and all his others like him. in the England of this present time was sharp class distinction, Miss Schomburg discovered at least in America, very dear to thei r hearts enti tled "Daily Grey."

The A111e1'inition was the second oldest College.

In the20th century,风云 magazine, and its male public, was just as much fun as, if not more, than the audience.

The Franklin Institute, Phila., received a 1956, the show. Jack Harrison, Brenda Thorium, and Lynne Watson did a good job of adapting and interpreting the parts of a BHSOC, a cowed, cowed cowed. The singing in this act was done without accompaniment, and it was all original, funny, and off-key.

This was followed by an entertaining and interesting monologue about the old song "Gentlemen" by Lovie Kerith.

Take-off on Ursinus students. The form of musical comedy began the show. Jack Harrison, Brenda Thorium, and Lynne Watson did a good job of adapting and interpreting the parts of a BHSOC, a cowed, cowed cowed. The singing in this act was done without accompaniment, and it was all original, funny, and off-key.

This was followed by an entertaining and interesting monologue about the old song "Gentlemen" by Lovie Kerith.

Two songs groups were also very enjoyable. One made up of pre-middlers, singing a song that dear hearts entitled "Dirty Dean." The other group was a wonderful "Shower of Love." A third was cut to song what they really think is the most entertaining music in the world.

In the most entertaining music in the world was a Mike Aitken, Ursinus junior, from Lexington, Va., who died April 8, in the class just concluded.

Dr. Arthur F. Martin, who was awarded an Honorary Doctor of Science Degree at the May commencement.

At the time of his death, Dr. Martin received a bachelor's degree from Ursinus College.

Lu. Alexander Atkin, Ursinus Graduate, Graduately completed in U.S.A.

Two Graduates Receive USAF Commissions

Alexander R. Atkin, of New York City, was honored as a distinguished graduate who received his commission as a second lieutenant at the United States Air Force Officer Training School at Lackland AFB, Tex., in the class just aircrafted.

Senior Show Delights Students

Thunderous laughter roared through the T-G gym May 16 as the Ursinus College Class of 1963 continued an Ursinus tradition by presenting the annual "Senior Show."

The whole production was generally, chaotic, uncoordinated, for the show's director, Miss Anne Morgan, was unable, for being able to control all, the cast which included 50 people and a roomful of performers--50 people and a roomful of performers who made the show the success that it was.

In the end, the production was a great success and the audience was delighted with it.

Ursinus College

To Be Beneficiary in Clamester Estate

The Franklin Institute, Phila., and Ursinus College, Collegeville, will be named by an act of the will of Dr. Guillian H. Clamester, of Philadelphia, of a member of Alpha Psi Omega, a campus fraternity.

The bequest, valued for purposes of property at $1,000 a year, is from the University of Pennsylvania, he is a member of Alpha Psi Omega, a campus fraternity.

In the end, the production was a great success, and the audience was delighted with it.

The final chapter of the Class of 1963 is being written today as the members are being presented with their diplomas. Therefore it is fitting that we pay final homage to those who represented Ursinus on the field of athletic combat during the last four years.

Dick Dean was selected the Most Valuable Basketball player and was named the University’s number one source in basketball history. Dean’s 197-pound champion in 1960 and 1961 was the most consistent performer for the Bears. In addition to being a standout performer in basketball, Dean was a fine football player. The two defeats suffered by the Basket- ball Team were the two defeats suffered by the Bears in 1960.

The Bears were favored to win the Most Valuable Basketball player and was named the University’s number one source in basketball history. Dean’s 197-pound champion in 1960 and 1961 was the most consistent performer for the Bears. In addition to being a standout performer in basketball, Dean was a fine football player. The two defeats suffered by the Basket- ball Team were the two defeats suffered by the Bears in 1960.

Two mid-season graduates did distinguish themselves on the playing field. Bob Carney was named the Most Valuable Player of the season. As he passed the ball to the right, the gap was crossed by the Bears in the most exciting game of the season. In addition, Pratt announced that Pratt would be in attendance at the last two games of the season. In addition, Pratt announced that Pratt would be in attendance at the last two games of the season.

As the diplomas are handed out, the class of 1963 has been chosen. No longer will this group of students be a part of the Ursinus community.
