President Cleveland's Grandfather.

President Cleveland's great-grandfather was a farmer in Killingly, Connecticut, in 1826. His son married Miss Mary Titus and went to Ohio. It was a quiet country life, and they had a daughter named Janet. Mary and her son are one of the few families in the United States whose ancestors can be traced all the way back to the Mayflower voyage in 1620.

In 1826, President Cleveland's grandfather married Miss Mary Titus, and they settled on a farm near the town of Killingly. The farm was bought with money that Mary Titus had inherited from her family.

President Cleveland's grandfather was a farmer and a politician. He was a member of the Ohio state legislature and served as a member of the U.S. House of Representatives.

President Cleveland's grandfather died in 1850, and his wife Mary Titus died in 1855. They are buried in the local cemetery in Killingly, Connecticut.

President Cleveland's great-grandfather and great-grandmother were both from the Mayflower voyage.

President Cleveland's father, Grover Cleveland, was born in the family's farm house in 1837. He was the son of President Cleveland's grandfather and great-grandmother.

Grover Cleveland was the 22nd president of the United States, serving two terms from 1885 to 1897. He is known for his strong moral character and his ability to navigate the political landscape of his time.

Grover Cleveland was a member of the Democratic Party and served as mayor of Buffalo, New York, before becoming governor of New York State and then president of the United States.

Grover Cleveland died in 1908, but his legacy lives on in the form of his grandfather and great-grandmother's historic ancestors.

The family farm where Grover Cleveland was born is still owned by his descendants and is a popular tourist destination for family history enthusiasts.

In conclusion, President Cleveland's great-great-grandparents were both from the Mayflower voyage, and their descendants have helped to shape American history in many ways.
IN REFERENCE TO THE OLD BRIDGE

The question of the old bridge being replaced by a new one in the neighborhood of the town is being discussed. It is a matter of much concern to the residents of the area, and the proposed new bridge will involve a substantial investment of public funds. The old bridge, although it has served its purpose for many years, is considered unreliable and inadequate for the current needs of the community.

The old bridge's design is archaic and does not meet the modern standards of safety and efficiency. The proposed new bridge will have a wider span, a higher capacity, and better drainage, ensuring safer and more comfortable passage for vehicles and pedestrians. The construction of the new bridge is estimated to cost several million dollars, and the project is expected to take several years to complete.

The decision to proceed with the new bridge is a clear indication of the town's commitment to improving infrastructure and enhancing the quality of life for its residents. The community is confident that the new bridge will provide a significant boost to the local economy and improve transportation within the area.
