A BEAUTIFUL WOMAN.

A NEW YORKER.

A DARK HORSE.

A TRUE LOVE STORY.

BY HANEY HANDEL"
The Reform Party is not being bossed to any great extent. Mr. Shuler will take a philosophic view of the question until a year or two. The Pennsylvania coal districts are more expensive than the Health Board of this city.

Every possible precaution is being taken to prevent the spread of the disease. In Paris there have been large-scale outbreaks of smallpox in the past. The current outbreak is being handled with the usual precautions, including the use of quarantine and isolation measures.

The Sanitary Commission has been established to control the spread of disease. In the case of Norristown, for two years, there have been outbreaks of smallpox. The commission has been thoroughly applied in the case, and if the outbreak continues, they will have to be asked to look into the matter.

The health officers of Philadelphia have been thoroughly trained in the management of smallpox outbreaks. In previous years, they have been able to control the disease effectively. In the current outbreak, they are following the established procedures and have been in close contact with the Sanitary Commission.

The large-scale outbreaks of smallpox in the past have demonstrated the importance of effective quarantine and isolation measures. In the current outbreak, the commission is following the established procedures and has been in close contact with the Sanitary Commission.

Agriculture and Science.

CHOPS in the SOUTH.

Spend reports of the patent condition of crops, receiving the whole South, to show that the pro-

pects in that section are very safe. Not only is the acreage of the cotton, corn and tobacco crops
larger than ever before, but the reports are unanimous in stating that they are of larger size and of
other small grains, excepting corn, will greatly exceed last year's crop ever before produced. It also shows that the crop of cotton will be made at a lower cost than ever before. It shrinks the agricultural demands of the South as much as 49,000,000 bales, against 22,000,000 bales in 1883, and 29,000,000 bales in 1882. Regarding corn, the reports from the whole South are of the most favorable character, showing that the crop will be the best for nine years; others best for twenty years, and many the best ever known.

It is brought by the United States Commissioner of Agriculture that the increased acreage is certain over last year, and the splendid yield which is now awarded, will give the rice crop much more than 30,000,000 bales this year, whereas in 1883, 20,000,000 bales. Of tobacco, a little uncertain, so much for the largest length, 15,000,000 bales, whereas it is likely that the crop will be 20,000,000 bales. Of tobacco, a little uncertain, so much for the largest length, 15,000,000 bales, whereas it is likely that the crop will be 20,000,000 bales.

RICE.

Steady demand will be made for the present crop of rice, and a splendid yield is certain. The
rice is of superior quality. The price is greatly reduced. Full setts from 15 to 20 cents per

per 1000 lbs. 18 lbs. to $1.75. Pure Lambs wool
Sheets, blankets, etc., at manufacturers' prices,
