A Matter of Policy

It seems to have become customary for the new editor to present, in the substance of the first editorial, the policy which the government, or school newspaper throughout his term as editor-in-chief. In conformity with this custom, we wish to discuss some subject of the WEEKLY policy to be manifested in the next-twenty odd issues.

We might point out, first of all, that it will be easy matter to succeed John Swinton. Having pulled the WEEKLY up by its bootstraps, John retires from this position perhaps not fully appreciated by the student body. This sometime-idol of ours once remarked that the average of college is no reasonable idea of the amount involved in putting out even one issue of the paper. He has suggested that we could profit from his mistakes and improve the WEEKLY in the several areas remaining weak.

The positions of associate editors for both the news and feature staffs will evolve into something new for the University. These associate editors, too, will have been filled. A mere glance at the positions below will reveal that there will be a vast increase in the number of people involved in the operation of the paper. This increase in the number of people involved will, in turn, lead to an increase in responsibility and work load.

In recent years the editors have, for one reason or another, assumed overwhelming burdens upon their own shoulders. This is a credit to our student body. These associate editors, with an eye on future advancement posting, are to be commended for the widening of their scope of responsibility and the amount of additional work involved.
