Schooling’s Week in Pennsylvania was held from October 17 to October 21. During this week, numerous meetings of state editors were held in conjunction with the school week. The meetings provide an opportunity for editors to gather together and discuss the needs and problems of education.

Ursinus was represented by two students who participated in the many functions of the school week. President Heffler attended a special meeting of college presidents while another student attended the meeting held in conjunction with the University of Pennsylvania on Oct. 16.

Between the morning and afternoon sessions on Oct. 21, President Oxford Harwell of the University of Pennsylvania delivered a luncheon for the one hundred college executives from New Jersey, Delaware, Maryland, West- Virginia, and Pennsylvania addressed the Robert Turnbull, a senior at Ursinus, as the next speaker of the day, Wednesday night, October 21. "The students of Philadelphia" was the title of his talk to the group of professionals. He discussed the student body and shared his experiences on a student council evacuation of the Commonwealth.

Fellowship Grants Set by Foundation

The National Science Foundation is offering 1,000 graduate fellowships each year to outstanding graduate scientists appointed by the University. The fellowships are administered by a newly created fellowship program that combines the activities of the Graduate School and the Foundation.

On October 17, 1959, the Senate, the legislative body of the University, announced that the Board of Trustees had selected the following individuals to receive the fellowships: Alvin D. Cohen, mathematics; Donald F. Stobart, chemistry; and Bertram R. Fischelis, physics.

The Senate also announced that the following three individuals were appointed in consultation with the founding members of the University: John A. McMillan, English; Donald R. Stobart, mathematics; and Bertram R. Fischelis, physics.

In addition to the 1,000 fellowships, 100 additional fellowships will be awarded to students in the last two years of study. These fellowships will be awarded on the basis of academic excellence and the potential for making a significant contribution to the field of science.

Presidents J. Allen Minnich, Mrs. Rose M. Stobart, and Michael J. Rosenbloom also sponsored weekend activities in conjunction with the University's annual dinner at the Philadelphia Hotel. The dinner was held in honor of the visiting scientists appointed by the Foundation.

The next meeting of the group will be held in the fall of 1960. The second seminar on "The History of Science in America" will be held on the third Wednesday of each month. Tickets for the seminar will be sold at the Ursinus Hotel, and the cost will be $2.50 per person.

The council, acting on the recommendation of the Board of Trustees, decided to recommend 14 temporary changes to the Board of Trustees. These changes were suggested by the president and will be presented to the Board of Trustees for approval.

Dr. Harlow Shapley Fabricates Universal Evolution at First Forum

What is outside everything? A question that has puzzled scientists for centuries. Dr. Harlow Shapley, a well-known astronomer, presented this question at the first forum of the year on Wednesday, October 27. Dr. Shapley, who is associated with the National Academy of Sciences, discussed the idea of a "universal evolution" of the universe. According to Dr. Shapley, all galaxies are part of a single "universal" system, and the evolution of galaxies is not independent of each other.

Dr. Shapley's talk was a comprehensive and engaging discussion that left the audience in awe. The University of Pennsylvania, under the leadership of Bob R. H. Mack, hosted the forum in Maclean Hall. The forum was open to all members of the university community.

The forum was well-attended, with over 100 people in attendance. The audience was captivated by Dr. Shapley's fascinating presentation, and many of them remained after the forum to continue the discussion.

The forum was organized by the University of Pennsylvania and sponsored by the Gordon and Betty Moore Foundation. The foundation's mission is to support scientific research that promotes understanding and appreciation of the natural world.

THE URNISUS WEEKLY

:: NEWPORT SWINGS

by John Swinton

The jazz festival in Newport, Rhode Island, although a financial triumph, was a little marred by the absence of a number of more usual jazz personalities. It is true, of course, that the festival was not a complete triumph in the sense that some of the finest musicians in the world were not present or did not stay the full week. But it was still a jazz festival and for the vast majority of people it was just that.

The Newport Festival, like all festivals, has its problems. There are always those who areatisfied with the results, but there are also those who are not. The problems of the festival are not new and are not likely to be solved by any means. But the festival is still an event that is worth attending, and it is one that should be enjoyed for what it is, not for what it could or should be.

There are a number of reasons why people might not enjoy the festival. The first is that it is held in a place where many people have never been before. The second is that the festival is often held in a place where there are no other events happening at the same time. The third is that the festival is often held in a place where there are no other fun things to do.

But these problems are not unique to the Newport Festival. They are problems that plague all festivals. The festival is not a perfect event, but it is still an event that is worth attending. It is worth attending because it is a jazz festival, and jazz is a great music.
Collegiate shoes are by far the best. They fit your foot like no other shoe. A wide variety of styles to choose from. Great selection of colors and sizes. Come in today and see our new spring line. Don't miss this opportunity to get the perfect shoe for you.

In addition to the music, there were also speeches made by members, and the president, Dr. Garret, presented a $50 prize to students who had the best attendance.

At the end of the meeting, the club voted to hold its next meeting in the same location on the following Tuesday at 7:30 p.m.

The French Club will hold its first meeting on Tuesday, October 27 at 7:30 p.m. at the home of Dr. Eugene Miller, of 501 N. 20th St. The meeting will be open to all students and members of the French Club.

The French Club is planning to travel to Paris on April 17, and members are encouraged to attend.
