A Time for Thought

There occurs, in the course of a school year, episodes that are distasteful to the College and to the student alike. These are annual affairs with regularity, matter how well the inevitable consequences of the actions are publicized. This semester has been no exception, and, as a result, there is no longer a member of our college community.

URSINUS: like any PERMANENT institution, has rules that must be followed otherwise there could be no organization. Each student knows, before entering the College, that there are certain rules to be obeyed—especially when that rule is imposed upon the school by the state, and these cannot be ignored either by the College or the individual. If they are, the consequences must be faced.

As students we should not attempt to evade the rules that are made for the good of the group. They (the rules) have a purpose which, upon HONEST reflection, should be apparent to each of us. Furthermore, it is our duty as these cannot be ignored either by the College or the individual. And, in this matter, the laws of the State of Pennsylvania was a factor that could not be ignored by the College.

It is the individual's responsibility to discern what is right and wrong. However, if he can't, or doesn't see, the action must then be made for him by others, for a successful community of peoples cannot function properly if it is not

A constant criticism of administrative procedure seems to be a tradition, and, to an extent, a healthy action. However, criticism should not be a haphazard denunciation to be a tradition, and, to an extent, a healthy action.

First and Last Try

Once upon a time there was a circus and in that circus there was a little trapeze girl. Now this little girl had just joined the circus and every day she practiced on her low trapeze and longed for the day when she would climb to the high trapeze and be recognized. It didn't sound to the exit and left her alone. They had done away with the little girl, the girl knew the girl knew she was, she had to prove herself. She was, she had to prove herself. Why.
