Collegeville, PA

Volume 28 Issue 2

The唯有Main Street is crowded with students and faculty members as they return to campus after the summer break. Parking on Main Street is a major issue for many students, and the administration is implementing new policies to address the problem.

Parking along Main Street is a challenge. Students and faculty members are often frustrated by the limited number of parking spaces available. Some students have been found illegally parked in designated areas, which has led to the implementation of a new parking policy.

Michael Ditty, director of Safety and Security, has been working hard to address the issue of parking on Main Street. In an interview on Aug. 27, Ditty addressed the problem of parking and its relation to the campus. He stated that parking is available behind the Main Street buildings, but some students are using those spots inappropriately.

Ditty's answer to the Main Street parking issue is to provide a designated spot for students to park their vehicles. If a student parks illegally outside of designated areas, they will be given a parking permit, and if a student parks illegally on Main Street, they will be sanctioned as a student and a parent.

In addition to the new parking policy, the school is also implementing a new policy for students who use the computer labs. Due to the recent replacement of Epson printers, the school has introduced a new policy for printing.

The new policy requires that all students have a student-issued computer and printer. Each student is given a school-issued computer and printer, and the price for a student's account will be added to the student's total printing charges. For any questions regarding the printing policy, students should contact Matt Ditty at ext. 2377.

The new policy is designed to encourage students to use the computer labs and to promote the use of technology. However, some students have resisted the new policy, and the administration is working to address the concerns.

The Student Newspaper of Ursinus College presents the fall fashion trends for the 2003-2004 academic year. See the Trends section for more information.

The network is down, and the Internet is out! Students are struggling to get online to complete assignments and connect with friends. The administration is working to resolve the issue and ensure that students have access to the necessary resources.

Bowling for Columbine! The movie is reviewed in the Sports section. See the review for more information.

The college is working to improve its services and address the concerns of its students. We encourage students to provide feedback and work with the administration to make the campus a better place to learn and live.

Spotlight on Politics: The California Recall

Falling Stars
Griizzly White

The Career Services Office has many programs during the fall semester to help students prepare for their future. There are many students who may be undecided about their major or who are planning on their Career Choices on Tuesday, October 14, at 12:15 p.m. in the Dining Hall. Students will have the opportunity to hear from current Ursinus alumni and meet with representatives from organizations who are interested in hiring alumni.

Several graduating seniors who will be attending graduate school this fall will have the opportunity to present their research to the college community. On Saturday, October 11, at 1 p.m., seniors from the University of Pennsylvania, The Ohio State University, and the University of Wisconsin will present their research. The presentations will be followed by a panel discussion and Q&A session. The event is open to the public and registration is required.

Feeling Disconnected: Internet and Virus Woes

Katherine L. Jones
Grizzly White

Many students have recently felt the frustration of not being able to check email, access the internet, or view other online activities. Only those who have experienced the tribulations of computer services have endured a technical nightmare. Residents of North Hall experienced network difficulties this week and were forced to reconnect to their email accounts. Many students reported difficulty with accessing the internet.

For students planning to do research, the lab is located in the Information Technology Planning Facility on Wednesday, October 9, from 12:30 p.m. to 3:00 p.m. Students are encouraged to visit the lab to learn how to search for, apply for, and learn about internships. Also, they will be able to learn about new career opportunities.

The virus is the sixth version of a worm that has been infecting computers since January. This strain of Sobig.F is suspected to infect over 100,000 computers worldwide. North America was hit the hardest with infected computers. The Sobig.F worm is spread by email. When sent to an email address, the worm downloads itself onto the infected computer and sends itself to other email addresses. The worm then completes the process of infecting the infected computer and sends itself to other email addresses. The worm is then able to infect other computers and spread itself throughout the internet.

The worm is not a typical virus. It is not able to infect other computers on its own. It requires human intervention to spread itself. The worm is spread by email and requires human intervention to spread itself. The worm is able to infect other computers on its own. It requires human intervention to spread itself.

The worm is not a typical virus. It is not able to infect other computers on its own. It requires human intervention to spread itself. The worm is spread by email and requires human intervention to spread itself.
The morning process is always a for or for situation. Everyone knows that it’s a big pain in the you know what. But last year, due to the surplus of class sizes to expand our college that seventy students would be out of rooms. Good Old Ursinus had his job cut out for him. They had to find rooms for these students and they only had only three months to do it.

With quick thinking and making due with what he had, Ursinus decided that since it did not think beforehand of this little problem, they only had one solution - turn the Freshmen Quad, North, and BWC's lounges into rooms. There are a many as four students living together and less lounges with only wardrobes as closets.

What do the students think of living in the lounges and common areas into rooms, as well as the Freshmen Quad, North, and BWC's lounges into rooms? They only had three months to do, but without the common rooms, the students think of having their closets.

One optimistic freshman, and maybe we might not be so extreme. But no one expected this little problem, which may be why we have come to campus.

Grizzly@ursinus.edu

Elections in California: Business as Usual or Free For All?

The issue of causing additional stress among the student body? It was something the college had to do, but without the common rooms, there’s no place to get away from his roommate. Maybe that's why we have come to campus.

The current visitors banging around during that time period, after all, the worst case scenario has our three current visitors hanging out during that time period, after all, due to the saturation of visitors.

It was not only the network, but we may take them. In that case, the problem was a faulty port and was solved within minutes, but I should have taken our friendly neighborhood computer engineer, there was a network and internet use were re-established before class started and during that time period, after all, due to the saturation of visitors.

Larry Flynn: Oh, so maybe Larry Flynn is on or something by responding to an amusing article to make California’s financial issues. And yes, if there’s an even more serious problem, then Flynt would find some way to… hurt things by becoming a political problem, which may be why we have come to campus.

Gary Coleman: What’s his status? Is he still going to Little Guy Solving Big Problems? If he is, it just disturbs that he’s running even thought he’s going to visit the Arnold Arboretum. Of course, this may be a for or for situation for him.

Arianna Huffington: The only thing I need to say about this is that the article is about how strong being a political problem, which may be why we have come to campus.

With quick thinking and making due with what he had, Ursinus decided that since it did not think beforehand of this little problem, they only had one solution - turn the Freshmen Quad, North, and BWC's lounges into rooms. There are a many as four students living together and less lounges with only wardrobes as closets.

Network Gripes Getting You Down?

Bit by bit, the Ursinus freshmen were ushered into Pildahl, where they promptly presented us with our long awaited laptops. Piled upon anticipation, looked into boxes and schedules, a few infected systems slipped through, resulting in an epidemic. The main issue is that due to the nature of the worm, someone can be completely protected against it and still feel its impact — according to a computer services e-mail sent Monday, the firewall has been completely overloaded, ultimately leaving academic pass-word-enforced internet use. For most freshmen, this had been before their arrival, and internet use was re-established before class started and during that time period, after all, due to the saturation of visitors.

The network is no longer the network, either. Other problems which have surfaced include incorrect usernames, weak passwords, and personal favorite, faulty network plug-ins; not best in saying, "perhaps maximizing student living space may bring in more dollars, but retaining these dollars becomes more difficult by decreasing student satisfaction and morale."

Even though this fall Ursinus' decision may seem to have left at least some students satisfied, I am curious to see the solutions of next year. Who knows—maybe they’ll start with the classrooms in the academic buildings...

Bowling for Columbine: A Must See

Jonathan Unger
Grizzly Writer

Possibly the most riveting movie of the year is Michael Moore's "Bowling for Columbine." Moore takes you on an informative roller-coaster of laughter, tears and fears as he addresses our nation's dangerous love affair with guns and violence. Now don't be fooled, he's not telling you anything. Moore is simply laying the cards out on the table for you to decide. Moore wants to be a voice for those who are not in the position to make their heard. He is celebrating democracy by allowing you to be informed and decide whether you agree or disagree.

Moore uses everything from local and international news clips to actual footage of Columbine while under attack as well as an armadillo cartoon on American History that is sure to have you laughing at 3 a.m. Gluing over such a crime...it is hard to believe what happened. Moore probably disproved your conclusions with other facts about poverty levels or the fact that Canada has 7 million guns in 10 million homes.

Surprisingly, the comedic value of this film is outstanding. We don't think a documentary is supposed to be this much fun. He has truly broken the mold with this film. As he said in the middle of South Central Los Angeles (since ground zero for the L.A. riots), Moore asked a cop, who is sitting at a crime scene, if there is someone he can arrest for causing such pollution that you can't even see the Hollywood Hills just down the road. This raises another question of why aren't pollutants getting the legal and media attention they deserve, because essentially aren't they making pollution at a more massive scale.

Moore also questions the media... Why is it that in the past decade crime has decreased 20 percent yet the media coverage of crime has increased 600 percent? Why are our local news stations and other affiliates choosing to paint such a picture of fear in our community? Well, one of the answers is fear sells. According to Y2K, all those people buying all those supplies and guns, what, it never happened. One of the most surprising parts of the film is an interview with shock rocker Marilyn Manson, who lunatic mind and intelligent can he really be under the helmet and mask? I have barely scratched the surface at all real issues this movie addresses. "Bowling for Columbine" is an absolute must see for anyone who cares about this wondrous country of ours and its future. Moore has truly found a way to form people to you can't find in any newspaper or History book. This Oscar winning film will take you on a ride that you never expected a movie could do. So sit back relax and get ready to be informed.

Activities, Activities, Activities...

Grizzly Arts & Entertainment
Thursday, September 4, 2003

Full theater season has arrived here at Ursinus, with two new productions and some new faculty. We are lucky enough to have two dedicated directors, Dominick Scudera, and new professor in Ursinus, Lisa Jo Epstein. Scudera will be directing "The Fever" written by Eric Overmeyer, which will be performed October 8-11. Epstein will be directing her first Ursinus production, "The Love of the Nightingale" written by Henrik Henningam. The performances will be held on November 19-22. If you auditioned this past week for one of these shows, you are already excited about these two new performances this fall.

Both shows are made up entirely of Ursinus students in a variety of roles in casting, dancing, as well as technical and back stage help. Also new to our staff, Chris Allen will be heading up the dresser and movement portion of the production, whereas Manica Gbogbo, will be assisting the set designer. In conjunction with both, these productions will be the first of professional costume and lighting technician. In charge of the technical aspects of the two classics Jason Grosso.

Scudera chose to direct the comedy, "On the Fever," because he feels that this will be "a good challenge for students here and something that the actors and audiences will both enjoy." Epstein says The Love of the Nightingale" brings "humor, horror, and powerful theatricality." Epstein also describes this production as the modern-day version to the Greek myth of Philomena and her desire toward knowledge and our un-welcome truth in a society filled with constant feeling that sends a brush over such voices. This play hopes to capture the astonishing story of Philomena and her sister as their lives are permanently changed by outside forces that infect their world.

Although auditions are over, both directors informed me that there are still plenty of opportunities to become involved. You have an interest for helping with the set, operating the lights, technically directing or being a stage manager, free to commit.
Ursinus in 1893
What Was it Like?

Lauren Perotti
Editor-in-Chief

Bomberger Hall picture taken in 1891. The building was dedicated in June of 1892.

New Performing Art Center

New Performing Art Center, the building of the new performing arts center officially began with the groundbreaking ceremony on Aug 22. Construction will be completed March 2005. The new center will contain two new theaters, a 350 seat theater with traditional stage, and a Black Box theater for experimental theater, holding 100 people as well as dressing rooms, costume shop, set design studio, instructors shop, faculty offices, and classrooms.

The groundbreaking ceremony was a great success. It's historic, according to President Brumbaugh, was to celebrate the vision and the philanthropy of the people who made this performing arts center possible.

Student Katherine Julian, Chair of the Board, Bob Rechich, the board member butty Moser delivered introductory words with chrome slides, and President Brumbaugh and Rechich gave speeches.

Katherine Julian, a student who was at the groundbreaking ceremony and who performed in many Ursinus productions, said “It was an amazing experience to be part of such a historical event for Ursinus. We already have a large number of students interested in the performing arts and something like this will only enable the interest to grow and flourish over time. Despite the fact that we will have already graduated by the time the center is finished, I am happy that future Ursinus students will be able to enjoy such a wonderful place for the arts.

The building of the new performing arts center will result in the most significant physical change at Ursinus College since completion of Pfahler in 1931 said Brumbaugh. But it will also greatly change the Ursinus community and the way that Ursinus College is perceived.

The new Berman museum, along with the faculty already working at Ursinus in the art, theater, music, dance, and creative writing departments, now in combination with the new art center will make Ursinus much more of a magnet school for those students whose interests include the arts. Women residing on campus that the school term to thirty-eight weeks. However, their phase fell on deaf ears, and the forty-week term, uncommon in colleges during this time, remained.

Rumors that the Citizens Passenger Railway was planning to create an “electric railway” between Collegeville and Norristown excited many students. The changes and development instituted in the year 1893 were the start of the major developments that would create the modern-day Ursinus College that we see today.

Local Heritage Day Celebration

New to the Collegeville area? Are you interested in learning about local history and culture? Come visit the local historical society as they hold their annual Heritage Day celebration. The Historical Society of Trappe and Collegeville is holding their annual Heritage Day on Sunday, September 14 from 1-3 p.m. Eighteenth-century crafts and trades such as hearth cooking, bee-keeping, candle-dipping, spinning, and much more will be demonstrated by interpreters in period clothing. Guided tours of the 1750 Henry Mahlenberg house will also be offered, as well as walk-through tours of Dewey Tavern. There is no admission or parking fee, and free refreshments will be available in the visitors center.

In addition, a special exhibit entitled “Selections from the Pennsylvania German Collection” is on display at the buildings of the historical society of artifacts from the Berman Museum of Art Ursinus College. The exhibit was curated by Ursinus senior Lisa Minardi. Over two hundred objects from the Berman Museum are in exhibit at the historic Henry Mahlenberg house and Dewey Tavern. Highlights include a c. 1750 blue-painted Pennsylvania blanket chest, redware pottery, fraternal artwork, cooking implements, and hand-forged iron hardware.

Craft demonstrations are being held on the grounds of the Mahlenberg house, located at the Clinton’s shopping center but before the intersection of Main Street and 113 on the right-hand side. Dewey Tavern is located on the same side, just past the intersection.

Questions? Stop by the Berman Museum and ask for Lisa Minardi or email her for more information. Hope to see you there!
With the passing of Labor Day earlier this week, summer fashion is going out the window with the arrival of new fall fashion. Every year there are new trends, nothing stays the same. With some help from Cosmopolitan, hopefully this fall you can look your best.

Grizzly Fashion Watch

Kelsi Gray

NEW! Never leave your laundry unattended. 1. NEVER leave your laundry unattended. 
2. Ursinus College NEVER has a snow day.
3. There is never enough parking on campus.
4. Clean up after yourself. Failure to do so will result in Cookroaches, undistinguishable UC Creatures, or community service.
5. Some of your best and most memorable conversations with people happen after 3 am.
6. If you miss class, don’t do your homework, or slack off, you are only hurting yourself.
7. It’s actually cool to get involved, and you get to meet some awesome people while doing it.
8. There are NO secrets at Ursinus, and I mean NO SECRETS.
9. That party on Saturday night will probably still be there next weekend if you need to study for a test.
10. Despite rumors, not one person has ever died from eating the food at Ursinus. Even though Bravo, Domino’s and the Chinese Restaurants deliver, it is not smart to eat out every night. It’s surprisingly, you can use tofu as a facial exfoliant by drying out your skin when you mash it up and spread on your face. However, if you have oily skin try mashing up tomatoes and apply this mask to your face for an acne remedy. Clay or mud can add collagen to your skin and leafy green vegetables can protect the outer layers of your skin. Looking to make your skin ‘livelier’? Maybe, but that won’t result in the best ‘lather’. Finally, avoid sulla by eating high fiber fruits and vegetables like apples and beets.

Recipe of the Week: Chocolate Layered Bars

Julia Campbell

Grizzly Guide Writer

So, you a back on campus and despite the many options at the Wiz, sometimes it is nice to make something on your own. This week’s recipe is not only fast and easy, but it is great for a sweet tooth! Enjoy!

Chocolate Layered Bars

Ingredients: 18 whole graham crackers, 1 cup (2 sticks) margarine, 1 cup brown sugar, 1/2 teaspoon vanilla extract, 1 box size packet of semi sweet semi-sweet chocolate chips, 1/2 cup nuts and/or coconut shreds.

Directions: Preheat oven to 350F

1. Arrange graham crackers side by side on cookie sheet.
2. Melt butter and sugar in a saucepan over medium heat, Add vanilla and stir
3. Increase heat and boil for 1 minute. Pour mixture over chocolate on baking sheet.
4. Bake until topping bubbles and turns deep brown. Remove from heat and immediately sprinkle chocolate chips over cookies.
5. Cool before cutting into squares and serve.

UC Field Hockey Team: Ready to Rumble

Kim Salton
Grizzly Sports Writer

The Ursinus College field hockey team is back and ready for a season that will hopefully lead them to a Centennial Conference championship more than ever before. After not being eligible for the post-season last year, because of their movement from Division II to Division III, the Bears are confident that this season will be their year. It’s about time the team delivers on their potential.

The team will have to overcome the loss of senior tri-captains Sandy Fetterman, Amy Treasure and their goal-keeper Nicole Montaut, but the Bears think they have the fleet of experienced players and the depth that will help them overcome those losses. Senior captains Megan McCoon, Amy Midgley, Jen Shellylaw and Amanda Young will lead the Bears. Other key players will be Crystal McCaren, Joyce Ann Krahmbuch, Ashley Eninger, and Jackie Kren.

The team hopes that the incoming freshmen will be able to step up as well to bolster both their attack and defense. Taking the over the goalkeeping duties will be senior Nicole Bartlett and freshman Erin Breder. The team hopes to improve on last year’s 12-4 record and make an impact when it comes playoff time. "We’re going to win," said senior captain Amanda Young when asked about this season’s outlook.

The Bears kick off the season on Tuesday, September 25th at home against York College. They follow that with another home game Thursday, September 27th against the College of New Jersey, a perennial Division III powerhouse.

Young said of the game against TCNJ that, "It’s going to be hard competition. They were in the Final Four last year and have a good team every year." So make sure you get out to the hockey field and cheer them on because they’re out to prove something this year.

Promising Season Aound for the Men and Women's Soccer Teams

Jessi Murff
Grizzly Sports Editor

Both the Men’s and Women’s Soccer teams seem to be off to a promising start as their respective seasons come to a close. Both teams are full of young talent and each have new experienced coaches to help make the season a success.

Coach McKinney brings 20 years of head coaching experiencia to a group of players as they battle the powers division 3. Also looking to have a good season is our women’s team. First-year coach Jeff Ykoruk, brings 10 years of coaching experience to the team.

Percy has also coached at the University of New Haven, and Fairfield University, where he was successful. He has played and coached on several championship teams, and hopes to carry on his successful career. He has also coached at the Pennsylvania Soccer's most prestigious coaches to help lead them in the right direction. The head coach of the men’s team is Wayne A. McKinney.

The Bears have mixed things up in the post-season last year. The Bears think they have the experience and new offense that was one of the top tacklers in the Centennial Conference. The Bears also return Gary Sheffield, who led the Centennial Conference in rushing yards for the 2002 season, and Vince Callaghi a promising young quarterback who is known for his quickness, and calmness on the field. The combination of these players should help make the season a success.

Promising Season Aound for the Men and Women's Soccer Teams

Grizzly Sports Thursday, September 4, 2003

Sports Schedule

Thursday, Sept. 4
Field Hockey vs. TCNJ, 4:00 pm
Volleyball at Albright, 7:00 pm
Saturday, Sept. 6
Volleyball at Wilkes, 11:00 am
Cross Country at Penn State
Women's Soccer at Susquehanna, 12:00 pm
Men's Soccer at Goucher, 2:00 pm
Football at Susquehanna, 7:00 pm

Sunday, Sept. 7
Men's Soccer at Villa Julie, 11:00 am
Women's Soccer at Susquehanna, 2:30 pm.

Tuesday, Sept. 9
Men's Soccer at Phila. Biblical, 5:00 pm
Volleyball vs. Delsea, 7:00 pm

Wednesday, Sept. 10
Women's Soccer at Wilkes, 4:00 pm

Mary's in over time on Sunday. It was a solid effort, and the women look promising going into this week. Come support these talented group of players as they battle the best teams division 3 has to offer.

The Bears' defense also looks strong, posting a shutout in their first preseason game against Delware Valley College, winning 21-0.

Tom Reilly, one of the tri- captains said, "We're excited about the season and feel that it should be a big improvement from last year." Reilly is a senior linebacker, who was one of the top tacklers in the Centennial Conference.

The Bears also return Gary Sheffield, who led the Centennial Conference in rushing yards for the 2002 season, and Vince Callaghi a promising young quarterback who is known for his quickness, and calmness on the field. The combination of these players should help make the season a success.

The Bears open their season this Saturday away atSusquehanna. Let’s hope that they can get off to a good start and come back home with a win. Come support the Bears on September 20th, when they play their first home game against Albright at 1:00. Let’s go bears!
The Ursinus Men's and Women's Cross Country Teams kicked off the 2003 season by hosting the 2nd Annual Brian Dennis Memorial Invitational at Huntsberger Woods.

Coming into the 2003 season, the Centennial Conference has both the men's and women's teams in the basement of the conference.

The men's preseason ranking is 9th in the conference and the women are ranked 10th. Both teams consist predominantly of newcomers, but have four returning members. The newcomers include six freshmen and one junior.

The women's team has five returning members and five freshmen newcomers. Both teams showed that they're going to turn heads this season with their performances at the Brian Dennis Invitational.

On the men's side, seven teams competed at the meet. They included St. Joseph's University, Lebanon Valley College, Franklin & Marshall, Swarthmore and Ursinus. For the women, five teams competed at the meet. They included St. Joseph's University, Lebanon Valley College, Franklin & Marshall, Swarthmore and Ursinus. St. Joseph's University won both the men's and women's team competition. Ursinus men finished 4th of seven and Ursinus women finished 3rd of five.

The women's 3000 meter race was won by Ursinus' own Kate Dougherty in a course record of 9:20.5. Freshman Lyne Erickson, finished 17th with a time of 13:30. Junior Katie Mayer and Sophomore Liz Goodall finished 35th and 36th with times of 15:24 and 15:25.2. Freshman Maureen McCarthy finished 39th in a time of 15:29. Miss Ganzl rounded out the women with a 49th place finish with a time of 17:54.

With the performances turned in by both teams at our invitation, we hope this is the beginning of Ursinus' climb out of the basement of the Centennial Conference.

Be sure to look for results and articles pertaining to upcoming meets.
