Bill Gerrity's Wife

WHERE SHE IS AND HOW SHE IS THE REPRO.

Who is that in Hurley, with the long face and the unkempt hair, who frequents the little church at the foot of the mountain? Bill Gerrity, the blacksmith, who has been for years the master of the little village in the hills. It is he who provides the cattle with shoes, and it is he who lifts them to their feet with a gentle pressure. But above all, it is he who, with his hammer and his anvil, shapes the iron into useful tools.

Bill, too, is a skilled craftsman, and his work is exact. He has a method of his own for keeping the hammer steady and the iron true to the strike. His shop is always tidy, and his tools are in their places. He has a way of talking to the iron that makes it understand his wishes and follow his commands. And when he is satisfied, he smiles, for he knows that his work has been done well.

But Bill is more than a blacksmith. He is a man with strong feelings, a man who feels deep passion for his work and for the life around him. He has a way of looking at the world that makes him see things in a different light. He is a man of principle, and he will not be moved.

His work is his life, and he will never leave it. He has no thought of retirement, no wish to rest. He will work as long as he can, for he knows that his life is tied to his hammer and his anvil. He will continue to shape the iron, to lift the cattle to their feet, to make the world a better place.

Bill Gerrity, the blacksmith, will always be there, a symbol of strength and endurance, a man of principle and discipline. His work will continue, his hammer will continue to strike the iron, and the world will continue to move forward.
PROVIDENCE INDEPENDENT.

COLLEGEVILLE, MINN. CO., PA.

H. E. SINNER, Editor and Publisher.

Thursday, February 14, 1895.

Among the many notable new inventions is a construction which was invented and patented by a man named John Brown.

Tyranny and Want.

The list, which is given with the day and night, shows that the loss of life or injury to passengers is far more serious than the cost of transportation itself.

The editor of the Providence Independent, Mr. Hancock, the hero of Gettysburg.

We are pleased to note that the movement for free coinage schemes is making better headway than ever before.

Secretary of State Blaine, the current favorite of the public, has made a great speech in favor of the bill, which met the views of those who believe in free coinage.

The subtreasury system is being called up in the House, and then there is the struggle for pensions. It is now certain that when an accident occurs in the service of the government, pensions will be given.

The bill, which contained the provision for the erection of eques-
trian statues of General Meade and Hancock, the heroes of Gettysburg, was voted down.

The movement becomes inflated beyond its real value.
