TOM'S MONEY.

Mrs. Laughton had found what she had been looking for all her life — a son. She had been looking for him all her life, and now that she had found him, she was determined not to have him go away. She wanted him to stay with her, to be a part of her family, to love him, to protect him. She had worked for this moment all her life, and now that he was here, she was not going to let him go.

And so she sat there in the veranda with one foot up in the air, her eyes fixed on the horizon, her thoughts turned inward. She was thinking about her son, about the future, about the days ahead. She was thinking about the challenges that lay ahead, about the obstacles that would surely come. But she was also thinking about her son, and about the joy that he brought into her life. She was thinking about how much he meant to her, and how much she loved him.

And then, out of nowhere, she felt a hand gently touch her arm. It was her husband, and he was saying, "What are you thinking about?"

She looked at him, and she saw the love in his eyes. She saw the love that he had for her, and for their son. And she knew that she was not alone in this, that she had his support, and that she had his love. She knew that they would face whatever challenges came their way, together.

And so she smiled, and she said, "I am thinking about my son, and about the future. And I am thinking about the love that we have for each other."

And then, she looked back out at the horizon, and she knew that she would face whatever came her way, because she had a family to protect, and a love to cherish.
WASHINGTON LETTER.

Boston, Oct. 30, 1891.

President Cleveland arrived in this city two days ago, and has since been very busy with his political friends and his business relations. He is expected to remain here until the close of the session of Congress, when he will return to Washington.

The President's health is good, and he is said to be in a cheerful mood.

The Republican Party is working hard to secure a majority in both houses of Congress, and the President is doing his best to help them.

The Democratic Party is working equally hard to prevent a Republican majority.

The country is waiting with interest to see what will happen.

ELECTION RETURNS.

The returns from all parts of the country are coming in, and it is believed that the Republicans will have a large majority in both houses of Congress.

The Democrats are working hard to prevent a Republican majority, and the country is waiting with interest to see what will happen.

The result of the election will be known in a few days.

THE PEOPLE'S TRUST.

The People's Trust Company, which was organized at Buffalo in 1862, has been dissolved.

The company was formed for the purpose of providing a safe and convenient place for the deposit of money, and of enabling the depositors to draw their money at any time.

The company was successful, and a large number of people deposited their money with it.

The company was dissolved on the 1st of November, 1891.

WILLIAM B. JONES.

William B. Jones, who was the second mayor of the city of New York, died on the 21st of September, 1891.

He was a prominent citizen of the city, and was well respected by all.

The cause of his death is not yet known.

THE CHLEY COUNTY FAIR.

The Chley County Fair, which was held at the town of Chley, on the 25th of September, 1891, was a great success.

The fair was well attended, and a large number of people visited it.

The exhibits were of the highest quality, and the prizes were well distributed.

The fair was closed on the 28th of September, 1891.

R. W. B.

FERTILIZERS.

Fertilizers are the key to successful farming.

There are many different kinds of fertilizers, and each one is suited to a particular kind of soil.

Phosphates are one of the most important kinds of fertilizers.

They are used to enrich the soil, and to improve the yield of crops.

The best way to use phosphates is to apply them to the soil in the fall, or early in the spring.

The amount of phosphates needed for each acre will vary, depending on the kind of soil and the kind of crop.

The following table gives the amount of phosphates needed for various kinds of crops:

<table>
<thead>
<tr>
<th>Crop</th>
<th>Phosphates Needed (pounds)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wheat</td>
<td>100</td>
</tr>
<tr>
<td>Corn</td>
<td>150</td>
</tr>
<tr>
<td>Cotton</td>
<td>200</td>
</tr>
</tbody>
</table>

RASHEE YOUNG GROPHS

To raise any crop to its utmost perfection, the farmer should understand its needs. The following are a few of the principles that govern the growth of plants:

1. Soil proper:
2. Water proper:
3. Light proper:
4. Temperature proper:
5. Air proper:

Our facilities for executing JOB WORK are such as to enable us to do strictly first-class work promptly and at reasonable prices.

The Job Work done at the Independent Office severally compares with that done anywhere in the county. Favor us with your orders and we will do our best to serve you well.

If you have anything to sell and want to sell it, and if you want your neighbors and the rest of mankind to know that you have something to sell and want to sell it, then you are in the business of ADVERTISE.

Weitzkenorn's Liberal Offer

A Grand Parlor Organ and a Fine Boy's Bicycle, 40% of the former and 40% of the latter, respectively, all paid for in advance.

STEAM : HEATING

The superiority of STEAM is compared with the OLD METHODS of HEATING Bryant to question, for twice as much heat can be obtained from the same amount of fuel by the use of STEAM heating. Bryant makes a powerful argument for the use of STEAM heating.
