A Room Bet. Bethehal.

I realized that it was time to get my head and I thought it would be the best time to start. I was feeling a little more nervous in her hair, but I couldn't help myself. I noticed "People talk about the hair, it's always..."

MAKING A SHOW.

Boston, Mass., Oct. 11.

My Uncle Thomas was still lacking. Why should he prefer the state of Indiana? He had made a match with my mother for an engagement. I have my own comfortable plans, but I think she should be made. I'm not sure she will go.

The free coinage bill, lately defeated in the House, as many of the republican members, in favor of Representative Bland, took occasion to declare, was a measure which had been brought forward in an effort to increase the exportation of silver from the United States. It was thought that the silver would be purchased in this country, and that, through foreign channels, it would find its way to the East and West Indies and South America, where it was needed. The bill was therefore a measure for the benefit of those who were interested in the New Orleans trade.

The bill was introduced by Representative Bland, a member of the House from Missouri, who is well known for his ability to carry on debates with great force and effect. He had been a member of the House for many years, and had gained a reputation for his ability to handle difficult questions with ease.

The bill was opposed by the democratic members of the House, who were opposed to the free coinage system. They believed that it would be a benefit to the silver mine owners, and that it would increase the exportation of silver from the United States. They were therefore opposed to the bill, and did all in their power to defeat it.

The free coinage system was a system by which the United States government would issue silver coin, and would use it for the purchase of goods. The system was introduced in the United States in 1891, and was intended to increase the exportation of silver from the United States. It was believed that the system would be a benefit to the silver mine owners, and that it would increase the exportation of silver from the United States.

The system was opposed by the democratic members of the House, who were opposed to the free coinage system. They believed that it would be a benefit to the silver mine owners, and that it would increase the exportation of silver from the United States. They were therefore opposed to the system, and did all in their power to defeat it.

The bill was finally defeated, and the free coinage system was not adopted. The democratic members of the House were therefore able to defeat the bill, and to prevent the adoption of the system.

The following was published in the West Chester College "College Student" under the following heading:

"The first place where we find the half shares of general labor, the editorial staff of the college."

The following is a description of the most important work now being done at the college.

1. **PLAINSIDE INDEPENDENT**
   
   To any address, **$1.25 per annum**, in advance.
   
   You get the worth of your money, more or less happiness into the bargain by subscribing for the PLAINSIDE INDEPENDENT - the paper that has opinions of its own and says what it has to say without fear or favor.

2. **BAUGH & SONS COMP'Y**, 100 W. MAIN ST., B .
   
   Nearly as good as butter. A good supply of the best of the home made butter. It is made in a network, it is taken in at the mouth of the cow, and is sold to the customer in the form of butter. It is also known as the "butter of a thousand hands."
