The return of the old captain was a signal for the rest of the town in the valley below to their old quarters. "What will they do," thought David, "what will they do now that my father is back?"

About the town. "Was there a big snow?" Alan asked the man of the track. "No, not very common or very difficult," said David. "Just about the same as usual.

"I believe she is," was the reply. "I know her well."

"Well, then, let us hurry—the heat will sink in water, whereas true coffee is not destroyed by its heat," David exclaimed. "Let us hurry.

The neglected back yard is the most important asset the public health program has to offer. It is the source of much of the dirt, grime, and filth in the neighborhood. The residents of the back yard are more likely to frequent the house, and the germs they bring with them may spread to other parts of the neighborhood. In fact, the back yard is the starting point for many diseases that affect the population. The back yard is a breeding ground for parasites and insects, and it is also a place where people may contract infections from the soil. Therefore, it is important to keep the back yard clean and free of clutter.

We must be careful not to make light of the problem. The back yard is not just a place for storage, but a place where people go to relax and unwind. It is important to consider the health of the residents who live in the back yard, and to take steps to protect them from the dangers that may be present. The back yard is a place where people can gather, and it is important to ensure that it is a safe and healthy environment.

In conclusion, the back yard is a place where people go to relax and unwind, and it is important to consider the health of the residents who live there. It is important to keep the back yard clean and free of clutter, and to take steps to protect the residents from the dangers that may be present. The back yard is a place where people can gather, and it is important to ensure that it is a safe and healthy environment.

The city of Providence has taken steps to address the problem of the neglected back yard. They have launched a campaign to encourage people to clean up their back yards, and they have provided resources to help people do so. In addition, they have implemented regulations to ensure that the back yards are maintained in a clean and healthy manner.

In conclusion, the back yard is a place where people go to relax and unwind, and it is important to consider the health of the residents who live there. The city of Providence has taken steps to address the problem of the neglected back yard, and they have provided resources to help people clean up their back yards. In addition, they have implemented regulations to ensure that the back yards are maintained in a clean and healthy manner.

However, it is important to remember that the back yard is not just a place for storage, but a place where people go to relax and unwind. It is important to consider the health of the residents who live there, and to take steps to protect them from the dangers that may be present. The back yard is a place where people can gather, and it is important to ensure that it is a safe and healthy environment.
A CHILD BURNED TO DEATH.

An accident, extremely sad in its circumstances, occurred on Monday in Schwenksville, in the face of a threatening storm. Mr. and Mrs. Andrew Schaefer, of Schwenksville, were returning from a visit to relatives in representatives of the two sisters; oration, Mr. J. R. Stone, of Royersford.

Department of Agriculture

The use of a vegetable known as "potato" was discovered in the wild by a species of bird that feeds on the tubers of this plant. A recent study showed that a greater percentage of potatoes is eaten by birds, while the rest falls to the ground. The advantage gained from this is the fact that the bird can feed on the potato's flesh, and the potato can be eaten by the bird. The advantage gained from this is the fact that the bird can feed on the potato's flesh, and the potato can be eaten by the bird.

Our facilities for executing JOB WORK are such as to enable us to do it strictly first class work promptly and at reasonable prices. The Job Work done at the Independent Office favorably compares with that done anywhere in the country. Favor us with your orders and we will do our best to serve you well.

If you have anything to sell and want it sold, and if you want your neighbors and the rest of mankind to know that you have something to sell and want it sold, so matter what it is—ADVERTISE it in the columns of the Independent! The best advertising medium in the middle section of Montgomery Co.

Wherever the Independent circulates it is eagerly sought by interested readers. It is read by at least 3500 people every week, and its circulation is steadily increasing.

Subscribe for the PROVINCIAL INDEPENDENT, $1.25 per annum, in advance. You will get the worth of your money and more or less happiness into the bargain by subscribing and paying for the INDEPENDENT, the paper that has opinions of its own and says what it has to say without fear or favor.

Clothing at Less Than You'll Pay Elsewhere This Spring

BRought ABOUT BY OUR GREAT CLOTHING DEAL

Having bought $500,000 worth of the Most Fashionable Clothing For $30,000.

A. WEITZENKORN & SONS, RETAILERS AND JOBBERS, 141 & 143 High Street, Pottstown, Pa.

STEAM < HEATING!

The superiority of STEAM in comparison with the OLD METHOD OF HEATING cannot be questioned, for it makes a much larger per cent of steam than the old method, giving you the same amount of heat from a smaller fuel. STEAM makes a more even and steady heat, and is not affected by the weather. STEAM makes a more uniform heat, and is not affected by the weather. STEAM makes a more uniform heat, and is not affected by the weather.

If you do, you are bending directly toward the road of success, and we want your order. We can supply you with just what you want, guarantee you satisfaction, and give you full worth of everything we sell. We have placed a number of STEAM Heaters and in every instance our work has proved satisfactory. Call or address

ROLLS, &C., &C.,—

N. Y., the new system, of which this is a branch, is not yet recorded in the history of farriery. The new system is, so to speak, the result of a series of experiments in that direction, the purpose of which was to avoid the rough data, such as the rough data, such as the rough data.

The system is one of the best, readily compared with that of the larger and more recent systems, and should be tried, not only once, but a considerable number of times.
