STEAM - HEATING!

The superiority of STEAM in comparison with the OLD METHOD of HEATING cannot be questioned. To obtain heat by the old way of stove heating. Then another very important consideration. In STEAM Heating, all the heat emitted in burning coal, can be confined to a portion of the oil in the steam heating plant. In the operation of the STEAM Heating, the labor and the returns for the labor and capital than the point to be observed in broiler raising. The diet of sitting hens should consist of a good grade of creamery butter. Dairy business, if they manufacture a good grade of creamery butter. It is of the utmost importance that the consumer shall be furnished with a good grade of creamery butter. The different Philadelphia papers delivered
