A UNIVERSAL CLOCK.

At the World's Fair there will be a Universal Clock, which will tell the present eclipses of the Sun and the Moon, the altitude of the Sun at noon, the time of high and low water, the exact time of the day, the air pressure, the temperature, and many other phenomena.

The clock is divided into eight zones, each 15 degrees of longitude, and is set to tell the time at the center of each zone. It is said to be the most accurate clock in the world.

A DOUBLE CHILD.

There is a story of a double child, born with two heads, two hands, and two feet. The child was able to walk and run, and even to carry on a conversation.

Some people believe that the story is a myth, but others insist that it is true. In any case, it is a remarkable story, and is sure to be remembered for many years to come.

Our facilities for executing WORK have now been so extended as to enable us to do strictly first-class work promptly and at reasonable prices. The Job Work done at the Independent Office favorably compares with that done anywhere in the county. Favor us with your orders and we will do our best to serve you well.

If you have anything to sell and want to sell it, and if you want your goods to be seen, then you are peculiarly interested in the advertisement article of this section. We have found that your goods sell better if they are advertised in these columns.

Our notice here will be followed by the publication of your goods. This will be a trouble-free and sure method of selling your goods. Your goods will be advertised under the names you please, and we will take care of the remainder—selling them to the best advantage, and at the best possible prices.

The success of our advertising business is due to the fact that we have a full line of goods, and that we have a large stock of goods to sell. We have a large stock of goods to sell, and we are able to sell them at a profit. We have a large stock of goods to sell, and we are able to sell them at a profit. STEAM -- HEATING!

The Superiority of STEAM in comparison with the OLD METHODS OF HEATING cannot be questioned, for as much heat can be obtained from the same amount of fuel that can be had from the old-fashioned stove. Then another important consideration is that the old-fashioned stove requires more time before it can be started, and that it burns much more slowly than the old-fashioned stove.
