The Value of Laughter.

Laughter especially, distinguished

from the howl and growl that

articulated its tones like those of

a brute, is a thing of high moral

endearment. It can be heartily

expressed by a woman, or a

man, or a child, in a season of joy

or sorrow. It is a sweet and

invigorating influence, and is

considered a very wise, if not

cosmic, invention, and is a

benefit of untold value. It has

been proved that the beneficial

effects of laughter are very

substantial, and that they

operate essentially for the

benefit of the party who

proceeds to use it. It has been

The superiority of STEAM in comparison with the OLD METHODS OF HEATING cannot be questioned, for twice as much heat can be obtained from the same amount of fuel than can be had from the old way of stove heating. There is another very important consideration, that is the health and comfort. In the old method, the smoke is very hot. STeam Heating has come to stay. Do you wish to availing advantage?
