Department of Applied Geology

To the

Mr. Curator

d.F.-&L.= Community

“The Ahnenerbe”

Mr. Curator!

In issue 5/7 of the Journal of Dowsing Rod Research, the chairman of the Association of Dowsing Rods shares:

“On behalf of the Association leadership and its scientific associates, all will be done to accelerate the clarification of the fundamental questions of our area of work and to develop the guidelines for future unimpaired dowsing rod activity in accordance with the appropriate authorities.”

Hereto it is reported in rumors that the entirety of dowsing rod research will be entrusted to a Research Institute, which will be led by the police in conjunction with the Wehrmacht.

Do you or the managing directors already know something about the aforementioned circumstances or can further details be found out from the relevant authorities?

Due to the importance of the matter in this moment of time, it seems to me that a verbal discussion is necessary; I ask that you allow me this opportunity as soon as possible.

Heil Hitler!

Jos. Wimmer

Professor

The Curator, Professor Dr. W. Wüst informed me regarding this matter on the telephone that he knows nothing about it. I ask therefore that Mr. Reichsgeschäftsführer please gather information on this matter and inform me of his findings. I would like to take the opportunity to reference my comments on the memorandum of the Association for Dowsing Rods and the report of the S.D. (v.30.10.40).

Heil Hitler!

Jos. Wimmer

Professor
