RE: Dowsing Rod Research

Attachments: 4

As an attachment I am forwarding a letter from the Head of the Sicherheitspolizei and the SD from 5/31/40 with a writing of Dr. Beyer from 4/3/40 with which is enclosed the paper "My Successes with Dowsing Rods".

As it was communicated in the memo from 2/17/40, that in the next few days a personal get-together between the Curator and Professor Wimmer would take place and that afterwards further communications would follow, but as this get-together has not yet come about due to the lack of a communication regarding it, I am not forwarding this file directly to Professor Wimmer, but rather ask for further action from there. The memo from the 2/13/40 or 2/17/40 I am also enclosing.
