Silver Ball Fever

By R. BRANT

Ever since I was a young boy
I played the silver ball;
From Bobo down to Brightly
I must have played them all.

Delete Brightly. Add Ursinus.
Driven like lemmings to the cliffs,
At my command my band
feeding the blinking monsters
of the silver ball.

The pinball machine, with its maze
of obstacles and targets, has come
to attract more students than do
Celtics, the evening activity, and
the well known speakers in a vari-
ety of fields relating to a liberal
education.

One can seek to explain this "ad-
ticipation" in terms of a psycholog-
ical motivation of an addiction to drugs.
The reasons for playing the ma-
cines are many. Though it cannot easily be found, since, like
any addictive, how much "pinball" actually want to be
cured?

Motivated by a desire for com-
petition, entertainment, emotional
release or relaxation, the pinball player responds in his respective
fashion to "The Call of the Ma-
cines".

Re-visits to the machines accom-
panying up upon whether the player is dropping or
beating the machine, or whether he is
dunting, and seeks revenge for losing. Eith-
erly, when the player has won or
lost the game, he seeks a new one.

The pinball machine is indeed a
machine and the player is a
machine; with his doctrine that "all
men are born equal".

With colorful lights flashing,
THE BAER

By CATHERY MccARTHY

All of us are familiar with the board of pinball and the
twinkling eyes which peer at us from the pages of the Weekly, the cover
of the Annual Urb
catalogue and our student identification cards. Although they may sound like a
description of Scandanavian pin-
bos, former students' names never did see fit to picture the machineries of the college corporate seal. Indeed, there was a man named Zacchario Bos, a Roman pin-
bus, a learned theologian and poet who, according to the old
records, was a consumable in the wallets and on
the mantels of Urb
students for many years. However, no matter how
everyday the face of the machines become around the campus, it has
had a fascinating history and one which should be told. And so this
year when this school was first estab-
lished by Dr. John H. A. Bombeger
was the first President of Urb
and he who suggested the details of the Ursinus. The inscrip-
tion on this first seal read: Urb
Academy, Super Fierum - 1849.

In the year 1888-1889, the Ur
and the free speech. For this reason, the cornerstone was cast, and for this reason, the cornerstone of this new seal was dedicated.

The 1929 edition of the Ursinus Catalogue might have been one of the most exciting times. A new seal which was complete the preceding year.

The Student Room of My-
librarian can be seen a skin of the new seal of Urb
as it was cast. The skin and the seal are a gift of Lloyd O. Yost, class of 1917. It is a very interesting advertisement project to go and take a look at this piece of Ursinus history and all the other fascinating articles in the archives as well.

In the year 1888-1889, the Ur
and the free speech. For this reason, the cornerstone was cast, and for this reason, the cornerstone of this new seal was dedicated.

The 1929 edition of the Ursinus Catalogue might have been one of the most exciting times. A new seal which was complete the preceding year.

The Student Room of My-
librarian can be seen a skin of the new seal of Urb
as it was cast. The skin and the seal are a gift of Lloyd O. Yost, class of 1917. It is a very interesting advertisement project to go and take a look at this piece of Ursinus history and all the other fascinating articles in the archives as well.
Urusinus has always encouraged a sense of community among its students, but this year's Song Fest showed another side of community—perhaps a tribal side. Each fraternity and sorority seemed to be a separate tribe, each having its own personality, dress, and style. Tea Sigma Gamma, dressed in T-shirts and "slippery joe" shorts, and of course wearing roller skates, sang "I Know Where I'm Going" and a rounding "I'd Rather Be Blue." The climax of their act was when these dandy dancers in the form of a chorus line had their legs high. This sure helped them roll away with first prize for novelties.

Alpha Phi Omega did a fine job singing the "Shaving Cream Song." There is Nothing Like a Dame," and the APO laced song. Of course their three female impersonators added the touch of humor that helped them win first prize for novelties.

Dressed as flappers, Phi Alpha Pi sang four cute ditties: "March 15, 1975, Thursday, March 20, 1975. Swabbers, Greasers, Rollerettes and Flappers Place in SONG FEST. "The New President Speaks." First of all, hello. As president of the newly-elected USGA, I want to thank you for your support and continued interest is needed. If the supply is to continue to be adequate and efficiently we will need the help of every student on and off campus. We are your representatives and as such we cannot do much without your support.

If you have something that you feel the campus should hear—bring it to a USGA meeting. These meetings are held every Tuesday at 6:45 p.m. in the Union conference room. When you go off campus to another school and something that could help this campus—bring it to the USGA. By the same token we will keep in touch with the student body. If something is brought before the USGA it will be in the minutes that are posted on the bulletin board. If success or failure with whatever it is will also be made public. If we make a mistake you'll know about it. People learn by mistakes and I hope that all of ours are profitable."

"Speaking of mistakes..." on the 21st of February there was a false alarm in the girl's quad. This old news but somehow its effects linger on. As a result of the alarm, there were no open dorms on that Friday again, old news and again its effects are lasting.

The fire alarm called out two fire departments. The women's quad is a big and potentially dangerous place. Just as dangerous is a speeding fireman on his way to the station. If the firetrucks are not roll out of the station and the woman having a potential jail sentence, depending upon the situation. Obviously a false alarm is no laughing matter.

The alarm system at Urusinus is a two-way communication system. We have something that you have never had before. In our system, the fire department is notified of any fire in the building or complex has a direct hook-up to the fire company's alarm system. Fragment mixes of this system could result in an error to a less efficient and more valuable system.

Another reminder—the open dorm policy as it now stands is an experiment. As was demonstrated on the 25th, the school does not want to open dorms a right of the student body.
**Flyer Consistency**

**By Joseph Saraco**

On April eighteenth, the "real" season started with the National Hockey League. That night, eight members of the 1973-74 Sunshine Conference champions were named to the National Hockey League All-American team. The eight-member team included Bobby Orr, Pat Lafontaine, and Grant McRae of the Boston Bruins; Rick Martin, Phil Esposito, and Terry O'Reilly of the Chicago Black Hawks; and Ralph Backstrom and Larry McGoogan of the Minnesota North Stars.

Unfortunately, the Flyers are also on the decline in the standings. After several seasons of being one of the top teams in the NHL, the Flyers have struggled in recent years. However, they are making a comeback and could potentially be a contender for the championship this year.

**Swimming Wrap-Up**

**By Bill Clement**

The women's swim team finished their season this year with a 9-1 record on February 27th, the day of the final competition. The team opened its season against BYU and took second place with a score of 123-98. Then the next day, the team lost a dual meet against Wat erloo and the University of Maryland.

The following week, the team again returned to the water with a back to back victory over Glasboro 69-41 on Thursday and Temple 72-68 on Friday. Both meets were decided by the Flyers, and they won both.

In the week leading up to the meet, Nancy Kerr and Terry Stetter were named to the All-American team. Terry Stetter also won the 100 yard butterfly, which solidified her status as one of the best swimmers in the conference.

The next day, the team traveled to Franklin and Marshall, with the Flyers winning 63-18. This brought the team's record to 9-2.

Monday found the team at Monmouth College for their fourth meet in five days.

The season is starting to wind down, and the Flyers have proven to be a strong and competitive team.
