By GEORGE GEIST

This is the Year of the Sixers. It's been almost a decade since the Sixers have had a good team. It has been a decade since they have had a team that could make some optimism about the club's prospects. To players, to members of the media and fans all over the nation, the reason for optimism is obvious. The most contributing factor was the acquisition of superstar George McGinnis (The Two Million Dollar Man) from the ABA. George will automatically bring a new level from the rest of the team. McGinnis has been a part of the basketball scene for many years, and he has created a competitive team with a strong nucleus. He will be at the helm for at least another two years, though he has yet to rise out of the new player's division.

Now, the common belief around the league is that the addition of McGinnis will make the Sixers into a true title contender. The league is that the addition of McGinnis will make the Sixers into a true title contender. McGinnis has been a part of the basketball scene for many years, and he has created a competitive team with a strong nucleus. He will be at the helm for at least another two years, though he has yet to rise out of the new player's division.

Along with court talent, a professional basketball franchise must have a strong front office organization. With General Manager Pat Williams and Coach Chuck D'Ifare, the Sixers have the resources to make a strong team. Backed by the Sixers' financial strength, they have the ability to bring in the right people at the right time.

Darryl Dawkins, the eighteen-year-old high school star from Orlando, Florida, is another potential blockbuster. Nicknamed "The Kid" or "The Next Kareem Abdul-Jabbar," he has already made his mark in college basketball. His 7-foot, 250-pound center is fast becoming a dominant force in the league.

Billy Lott, the 1974-75 NCAA All-Star and the University of Virginia's leading scorer (21.9 ppg) - as well as the 1974-75 NCAA All-Star and the University of Virginia's leading scorer (21.9 ppg) - is another key player for the Sixers. He is a strong, versatile player who can handle the ball and shoot from the outside.

The Sixers have other key players in forward Tim King, center David Thompson, and guards Greg Griffith and Wally Hagan. Each player brings a different skill set to the team, making them a well-rounded group.

The Sixers' success will depend on how well they can mesh together as a team. If they can find a way to work together effectively, they could be a force to be reckoned with in the NBA this season.

The team has many other players who are ready to make an impact. Darrell Dawkins, the eighteen-year-old high school star from Orlando, Florida, is another potential blockbuster. Nicknamed "The Kid" or "The Next Kareem Abdul-Jabbar," he has already made his mark in college basketball. His 7-foot, 250-pound center is fast becoming a dominant force in the league.

THINKING MORE-THEME:

Is There More To Life?

By KEVIN LEBENSPERGER

It’s not unusual to feel that you’re accomplishing little or nothing of value during your time at college. Perhaps you feel as though you’re wasting your time on various work that is either not interesting or unless you’re using and relevant subjects, you’ve discovered yourself at this very moment at Ursinus College.

A sense of achievement and many rewarding experiences can be found by giving up a few hours of week to spend with mentally retarded people at Pennhurst. Mr. Robert Brant, a complete volunteer or want, are in dire need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. Because of the large number of all age, male, and female, are in need of friendship and affection. "Ursinus community" may or may not be labeled. Community can not exist if several students decide to carry the majority of the burden and others are some what alien. I’m afraid this has been a weakness in some of our past years. It is early in this year, and we must try to build on our original strength instead of allowing it to deteriorate.

The Weekly’s desire is to become an active, contributing part of the college, but at the same time serve only those who recognize its true objectives. Any college newspaper is a vehicle of communication, which enables people to express an opinion or learn about something which otherwise might be buried under the frantic pace of college routine. The Weekly would like to claim improvement this year. Hopefully, it will not stand in that respect.

THE URUSINUS WEEKLY

Published each week during the academic year by the students of Ursinus College, Collegeville, Pa. 19426. Seventy-fifth year of publication.

British History Specialist Joins Ursinus Faculty

By SHARON TABERTY

S. Ross Dougtiy, who graduated cum laude from Ursinus College in 1968, replaced Dr. Esther Cope as an assistant professor of History here. Mr. Dougtiy graduated in 1964 from Colleville-Trapp H. I. S. School and spent his junior college year at York College and his senior year at Cornell University in New York.

After completing his studies at Ursinus, he earned a master's degree in 1970 at Harvard University.

Mr. Dougtiy, prior to his return to Ursinus, was a teaching assistant at Harvard University for three years. His field of specialization is medieval history, and his doctoral dissertation is entitled "The War Office and the Volunteer Force, 1899-1908.

In addition to his teaching, he is the editor of Pennsylvania Monthly, a small college magazine. Mr. Dougtiy is also an associate editor of the American Historical Review, a professional journal devoted to the fields of history and politics.

Mr. D. has been most useful to the library in his capacity as an assistant professor of History. His extensive knowledge of medieval history and his ability to communicate his ideas effectively make him an invaluable asset to the library's collection.

Mr. D. is also a member of Beta Phi Mu, a national honor society for library science, and a member of Phi Beta Kappa, an honor society for undergraduate study.

Mr. D. is a native of Pennsylvania and has lived in the area since he was a child. He is married and has two children, ages four and seven.

Instructor Appointed To Biology Dept.

By LEONARD ULAN

Mary B. Fields, who recently completed her doctoral studies in botany at Miami University, Oxford, Ohio, was appointed instructor of biology at Ursinus College this summer.

She is teaching Genetics, Evolution, and Development, a course covering the major topics of modern biology. The course is designed to introduce students to the fundamental concepts of genetics, evolution, and development.

Ms. Fields received her bachelor's degree in biology from Otterbein College, Westerville, Ohio, and her master's degree in botany from Miami University. At Miami, she conducted experiments in botanical and genetic mutations at the sub-cellular level. Using continuous techniques of these experiments is restricted by Ursinus because unsupervised radiation handling is a health hazard. She does, however, plan to conduct similar plant studies.

Ms. Fields is a member of the American Association for the Advancement of Science, the Botanical Society of America, the Environmental Mutagen Society, Genetics Society of America, the Ohio Academy of Sciences, Sigma Zeta, Alpha Epsilon Delta, Sigma Xi and has been named to "Who's Who in American Colleges and Universities."

She enjoys the flexibility and variety of teaching and believes that the friendly, positive atmosphere is what attracted her to Ursinus. Along with small classes to allow for feedback and individualization, she feels the environment is a valuable addition to the academic experience.

Dr. Albert C. Allen conducted an interesting screening process for applicants seeking the position of assistant professor in botany. After a screening that included 16 candidates, the students were asked to write a personal statement concerning their professional accomplishment and past experiences. Ms. Fields was an overwhelming choice among the students.

We extend congratulations and a warm welcome to Mary B. Fields.

Dr. Robert Cogger and Dr. Joyce Henry

By C. POOTS

At the Fall 1972 meeting of International Environmental Science, Dr. Robert V. Cogger and Dr. Joyce Henry received the coveted Lindback Award. The award is given annually to the annual environmental scientist whose work is considered to be the highest honor in the field of environmental science. The award is named in honor of Dr. Bates B. Lindback, who was a former professor at the University of Wisconsin.

Dr. Cogger, Associate Professor of Environmental Science, is the chairman of the Environmental Education Department at Ursinus. He has been on the faculty since 1961 and has been a recipient of the Lindback Award for his outstanding contributions to the field of environmental science.

Dr. Joyce Henry, Assistant Professor of English, also came to Ursinus in 1973. For ten years she lived in Milwaukee, Wisconsin, where she was a television interviewer and manager of the Milwaukee Post-Dispatch for a period of time. Since she arrived at Ursinus, she has produced the college's dramatic presentations, most recently, "How to Succeed in Business Without Really Trying" two weekends in May. After writing her dissertation on the history of the Milwaukee Repertory Theater, she received a Ph.D. in the history of English.

Soccer Season Opens

By C. POOTS

During the recent tri-meets, Ursinus College men's soccer team had its first three overtime games in a row. The Bears defeated Perry County by a score of 1-0 on Tuesday, October 3, and tied Swarthmore College 0-0 on Sunday, October 8. The Bears then played Drexel University on Tuesday, October 11, and went on to win 3-2 in overtime.

During these three matches, the Bears displayed a mix of offensive and defensive strategies. On Tuesday, Ursinus was able to capitalize on its successful attacking play, which resulted in a lone goal from sophomore forward John Smith in the second half. The Bears' defense played a crucial role in holding Perry County to a nil score. On Sunday, the Bears were unable to find a breakthrough in their match against Swarthmore, despite controlling the possession and creating several scoring opportunities. The goalless draw was a testament to both teams' defensive prowess.

On Tuesday, Ursinus faced a determined Drexel team. The Bears started the game strongly with a goal from senior midfielder Alex Thompson in the first half, but Drexel fought back with a goal of its own shortly after to level the score. The Bears continued to press forward, and in the second half, sophomore defender Jack O'Brien netted the winning goal in the 78th minute. The Bears exhibited resilience and determination throughout the match, demonstrating their ability to overcome adversity.

The Bears look to continue their winning streak when they take on Ursinus College's women's soccer team on October 14 in a non-conference match. Ursinus women's soccer has been displaying strong performances in their recent games as well. The Bears' men's soccer team's success highlights the camaraderie and competitive spirit that characterize the team. With each match, Ursinus continues to build upon its achievements, setting the stage for an exciting season ahead.
By JOE SARACO

Unhappy with the results of strikes, forfeit, and cancellation emanating from National Football League circles, I've decided to fulfill my signature and present the teams of the NFC East.

However, by the time you read this, the following predictions may be either funny or false, depending on the outcome of the teams’ games this weekend.

The NFC East:

1. Philadelphia: QB Ron Jaworski (NFL MVP), RB Terrance Power (52, 1,700 yards), WR Mike Quick (40 catches, 665 yards), TE Keith Jackson (34 catches, 492 yards), RB Ron Brown (1,050 yards).

2. Dallas: QB Roger Staubach (NFL MVP), RB Tony Dorsett (1,000 yards), WR Daryl Johnston (51 catches, 715 yards), TE Tony Conner (26 catches, 280 yards), DL Charlie Young (52 tackles, 12 sacks).

3. Washington: QB Joe Theismann (10 TD passes, 1,300 yards), WR Art Monk (61 catches, 1,200 yards), RB John Riggins (1,800 yards), DL Tim Johnson (53 tackles, 21 sacks).

4. Atlanta: QB Tom Tunnicliffe (6-3-3 season), RB Earnest Byner (676 yards), WR Michael Haynes (71 catches, 700 yards), DL Tracy Woods (47 tackles, 10 sacks).

By GEORGE GEIST

Franklin and Marshall: Undoubtedly the best team in the conference, Franklin and Marshall have won 12 consecutive games, and they will be the team to beat for the southern M.A.C. title. Coach Bob Carr has done an excellent job of building a team that is capable of playing well in any game.

Witten - Runner-up in the division with a 7-1 record (6-1 overall), Coach William Manlove's Fennelles will again be a force to be reckoned with in the conference. With quarterback Greg Melton, the team is a top contender for the championship.

The Rams could win the NFC West with quarterback Joe Barlow leading the way. Barlow has been a consistent performer throughout the season and has led the Rams to a number of key victories.

The defense isn't bad with playmaker Leon Harris leading the way. Harris has been a key player in the Rams' success this season.

The Rams have some holes, but they aren't as bad as it seems. The offense of 1973 is a simple one: a balanced attack with a strong running game. But they aren't as consistent as they were last year.
