Name Contest For New Student Faculty Lounge
By DAVE FRIEDENBERG
A new student-faculty lounge will open soon, sponsored by the freshman class. Modelled after the old "Izzy" Lounge which was located in Freeland Hall, the student-faculty lounge will be a place for students and faculty members to meet and talk with a supply of doughnuts and coffee. It will be located in the scenic basement of Bomberger Hall. There will be no charge for the doughnuts and coffee, however, donations are welcome. Stop in anytime between 8:45 a.m. and 5:00 p.m. to look for the grand opening coming soon.

Lizzie received a whole box of baked goods for her entry into the box found in the Parents Lounge, Winter 2019. This prize should arouse an amount of competition considering the alternative of injecting "manna from Izzy." Entries should include your proposed name for the lounge, your name, and room number. Deposited entries will be notified, Thursday, December 2.

Four prominent opera singers will be soloists for the 34th annual Messiah performance on December 9, according to an announcement by Richard Budenstein, group, conductor, and professor of music. They are Karen Altman, soprano; Batyah Godfrey, contralto; Dan Marek, tenor; and David Clatworthy, baritone.

Karen Altman, a native of McDonald, Pa., is a member of the Metropolitan Opera Studio, and has sung Messiah performances in Philadelphia and Carnegie Halls. During the 1976-77 season she was heard in New York's Lincoln Center "Brahms' Requiem and the Mozart Requiem. The recent operatic engagements include Central City Opera's La Boheme, and Wichita, Opera's Barber of Seville. In September 1976, Miss Altman made her debut at the Chautauqua Opera as Pamina in Mozart's Magic Flute. Additional engagements include the role of Freia in Das Rheingold with Georg Solti and the Chicago Symphony, and Chicago and New York.

Miss Godfrey has performed nearly three years with the Metropolitan Opera Association. Her recent performances of the Messiah with the Philharmonic Orchestra at both the Saratoga Festival and in Philadelphia. Among many awards and scholarships, Miss Godfrey was the first winner of the Metropolitan's Lorena Roth scholarship. She has sung under the batons of Leonard Bernstein, Eugene Ormandy, and even Agnes de Chazan. She received a scholarship for five years at the University of Washington, where she also earned her B.S. degree. She was born in Portland, Oregon.

KAREN ALTMAN, SOPRANO
Maine, to parents of Russian background.

Mr. Marek, a descendant of tsarist and pioner in the Oklahoma Territory, is the grandson of Uphala College, East Orange, N. J. He holds a degree of Master of Music from Manhattan School of Music. In 1963 he won the Lederman Award and was engaged by the Metropolitan Opera Studio, and appeared in more than 100 concerts with the Golden Curtain Quartet. He was featured tenor at the Radio City Music Hall and appeared in the Magic Flute at the World's Fair. He made his Metropolitan Opera debut in 1965, and has since sung 15 principal roles with the company. He has appeared with opera companies including the American National, Baltimore, Chautauqua, Chautauqua, Central City and Southern California. Mr. Clatworthy is a leading baritone. He was born in the New York City Opera, where he joined his roster in 1962. He has sung a variety of roles in the Marriage of Figaro, La Boheme, La Traviata, Prince Igor, Der Pfaifer, The Consul, Midsummer Night's Dream, and Don Rodrigo. He also appeared in operatic recent performances in San Francisco, Houston, Fort Worth, Mobile, the Central City Festival, and the Chautauqua Festival. Mr. Clatworthy has appeared on the major television networks in productions including Bach's St. Matthew Passion. His recordings include the Minkus Symphony on 8, Thom's Feast of Love and Prokofiev's Lt. Kije. He was discovered while attending the University of Arizona on a baseball scholarship, by Richard Bovelli, former Metropolitan Opera baritone. He has sung at Juilliard School of Music and holds an M.A. from Columbia.

BATYAH GODFREY, CONTRALTO

DAN MAREK, TENOR

DAVID CLATWORTHY, BARITONE

Education Office Offers New Plan
By JANE SIEGEL
Starting the second semester this year, sophomores and juniors who plan to teach will have an opportunity to gain experience in the Puttstown and Pottsville Valley School Districts. This new departure for future teachers is being developed by the Department of Education, in cooperation with these two school districts. It will allow students to gain additional on-the-job training before entering their senior year of student teaching.

This expanded program was originally suggested by the State Review Committee that visited Valley last spring. Pottsville Vocational Junior High will provide work experience in the fields of English, mathematics, social studies, and science. The high school has in addition, the opportunity to conduct physical education. The other participating school districts, Pottstown, has opened every aspect of its curriculum to interested future teachers.

David Clatworthy has been appointed by the Education Office to run the program. He will meet with students interested in teaching, to explain the program and answer questions.
Rumors

Many years ago, a group of wise men were discussing the nature of words. Their final conclusion was that words were like arrows, for once they were sent out, their damage was done, and could not be repaired.

Such is the way of rumors, for the damage done by rumors is not apparent until their effects are with us, even though the original rumors are long forgotten. Of course, we realize that rumors are perhaps one of the most effective revenges ever devised, especially since tale-bearing is the proud profession of so many. We have often wondered why it is, in a generation of love, so much hate is generated. People who object to war and violence on grounds of morality seem to find nothing wrong with spreading filth as far as they can.

“Guess what I heard about so-and-so?”

Nothing in the English language can command such intense attention in so many of today’s words as can this short phrase. The viciousness of those among us who gossip (so fact”) with further proof, which usually comes from the top of his tale-bearer says is lies, who will believe him? After all, if everything the tale-bearer wants to be called a liar. And we aren’t too sure if we could start it, but we wouldn’t get off the ground if nobody would put it... But aren’t we unfair? It is only the rumors that people will so readily accept filth about others. Or are we? Whatever it is, rumor often satisfies this need. It is sad that rumor often satisfies this need.

It was on the first day of school that rumor spread like wildfire. The Council, they’d be different but I’m not sure if I would have done it. The Council, they’d be different but I’m not sure if I would have done it. The Council, they’d be different but I’m not sure if I would have done it. The Council, they’d be different but I’m not sure if I would have done it. The Council, they’d be different but I’m not sure if I would have done it. The Council, they’d be different but I’m not sure if I would have done it. The Council, they’d be different but I’m not sure if I would have done it. The Council, they’d be different but I’m not sure if I would have done it.

It doesn’t matter if the rumor is true, or if it is a lie. It is the spread of the rumor that is the problem. It is the spread of the rumor that is the problem. It is the spread of the rumor that is the problem. It is the spread of the rumor that is the problem. It is the spread of the rumor that is the problem. It is the spread of the rumor that is the problem. It is the spread of the rumor that is the problem. It is the spread of the rumor that is the problem.

The vice principal of so many. We have often wondered why it is, in a generation of love, so much hate is generated. People who object to war and violence on grounds of morality seem to find nothing wrong with spreading filth as far as they can.
THE KITCHEN CYNC
"The Science of Setback"

By JANE SIEGEL

The exact diameter of the credibility gap, at its widest point, is directly proportional to the square of the degree to which the right hand realizes what the left hand is doing. Contingently, the ability to correctly predict the rational effect of any given theoretical proposition is inversely proportional to the number of second-hand sources of information involved. It then, necessarily follows that modulation of the frequency of pre-mediated outbursts is directly dependent upon the amount of real, delegated authority.

Thusly, we have established the scientific model which are pre-requisites to the rational discourse that is supposed to result in the healing of minds. Something, however, is askew since discourse here is about as successful as the tower of Babel. Let us explore the difficulty by using our new trick facility, which isn't, as a functional proof of the validity of modern concepts.

One of the problems is that, in the one hand, all the people who happened to be all the people who happened to be all the people who happened to be all the people who happened to be all the people who happened to be...and in the other hand, the cracks, the gaps will ultimately reach its limit and an uncontrolled chain reaction occurs. It is these modifications that out-dated formulas can neither control nor contain.

But an answer does exist. For a start, the right hand needs to attach itself to the left one in a configuration vaguely resembling a handshake. Then a solution, rather than a prediction, will emerge. Representative must represent, direct communication is the 'best thing to be there.' And, finally, some authority must be given to the hand which is doing the work.

The kitchen's a busy place...
Bears Close Season With 4-4 Record

By DON McAVIN

The Ursinus College football team closed out its 1971 season with a 21-9 victory over Haverford College at Patterson Field on Saturday, November 14. Although the Bears had their problems early in the season, they jelled after their upset victory over Muhlenberg and won four of their last five games to finish with a 4-4 record. The credit for their final win must rest with the defensive line. Haverford may have one of the best passing combinations in Dave Parham and Doug Nichols that the Bears have seen all season. Parham, however, was pressured constantly into hurried his passes, and was forced out of the pocket on numerous occasions by the hard rush of Ursinus. Greg Poullin, Rich Rockwell, Gary Greenberg, and Art Hanbeck, who anchored the defensive line, were the key to the Bears victory on Saturday.

Ursinus Scores First

The Bear offense put their first score on the board early in the first quarter. With the early momentum Ursinus moved 71 yards in seven plays. John Sabatino capped the drive with a 37 yard run. Sabatino broke several tackles, and lunged into the end zone after being hit hard on the five. The P.A.T. was good and Ursinus led 7-0. The Fords, however, came right back to notch their only touchdown of the afternoon. Ted Williams intercepted a Larsem pass late in the first period. Six plays later Parham hit Doug Nichols on a pass pattern to make the score 7-6 Ursinus.

Capitalize on a short punt which gave the Bears excellent field position, quarterback Don Larson moved the team in for their second score. John Stewart plunged over from the two-yard line to give Ursinus a 14-6 lead at the half.

Ursinus took the second half kickoff, but could not move. After a bad punt Haverford put the ball in play inside the Bear 40. The Ursinus defense, however, rallied to halt the drive at the 25 yard line. The Fords were forced to settle for a 35 yard field goal to cut the gap to 14-9.

Fumbles and interceptions continued to plague the Ursinus offense throughout the second half. The defensive unit did an outstanding job in containing the Fords, and consistently turned the ball over to the offense. The final Ursinus TD came on a one yard plunge by Mike Albin. Haverford, with a 40 yard passing strike from Larsem to Montgomery, put the game out of reach and inured the Bears of a .500 season.

Paul Franzen (55) and Gary Greenberg (75) converge on a Haverford ball-carrier to stop him for a two-yard gain early in the first quarter.

The necessity of such a union.

FACULTY PORTRAIT

(Continued from Page 4, Col. 2)

FACULTY PORTRAIT

The necessity of such a union.

Attributing all life and worldly achievements to the sacrifice of the men of generations past, Fyodorov postulated as the moral imperative of all men first the achievement of immortality, and ultimately, the resurrection of the dead. This resurrection will be effected when men, created by God to have unlimited dominion over the entire universe, achieve the technological skill necessary to reconstitute, the human race; before this is actually done, the universe must be subjected to human dominion, and utopia must be established on earth.

To reconstitute the men of generations past, scientists must rely not only upon scientific data, but also upon the reports of men of generations subsequent to those to be reconstituted, who intimately knew the dead. From these reports, the scientists will be able to reconstruct not only an individual's body, but also his personality. Fyodorov did not relegated man to the status of a machine; reconstruction must entail the reconstitution of the whole man, which Fyodorov was confident, is entirely within man's capacity.

Fyodorov, aware of the temporal nature of the solar system of which the earth is a part, maintained that unless man achieved both dominion and resurrection, for which he was created, and resurrection of the dead, all moral imperative, the human race would become extinct when this solar system ends.

Fyodorov's philosophy, in the light of the rapid and extensive advances of man's knowledge, is essentially no longer a light of the future, but a light of the present; he anticipated with the spirit of the enlightenment, eschatology with regard to Marx's evaluation of the moral nature of man, the necessity of action, and man's capacity.

M.A.C. All-Conference team. Last year's top scorer will again return in the form of 5'11" Tom Starzec who averaged 15 points a game. He will share backcourt duties with 6'2" guard Mike Handwerk. This line was second to Sturgis in assists and hit 61 points per game. The biggest battle for a starting berth shapes up at the forward position between last season's starter, 6'4" Mike Weston and 6'6" Freshman George Kiko. Both are capable of complimenting Schal and Catell with the rebounding power that the Bears sorely missed last season. Weston also averaged 10 points a game.

The other reason for the feeling the team cannot miss improving on their 5-11 record is the strength of the Bear bench. Heading the reserve power will be frequent starters, 5'11" Bob Long, who can fill both the guard and forward spots. 6'6" Bill Donaway and 5'11" Jack Messenger, number one and two scorers for assistant coach Bob Handwerk's "Baby Bears," bring their stats to the varsity and should play essential roles in the team's success. Three underclassmen complete the Bear roster and will see plenty of action: Roger "Superman" Blind, Jim Lovsey, and Bob Vitek.

All these factors should add up to a 7 or 8 win team, and promising year. This reporter will include his predictions for the coming weeks at the end of each column and if I am accurate, the Bears will be at the play-offs in March.

Kilt Klads’ Comment:

Snellbelles Undefeated

By RUTHANN CONNELL

A victory over Trenton State last Tuesday capped an excellent season for our Ursinus Hockey Team. The score was 2-1, as the team encountered two of the toughest opponents on their home ice, Kennerley and Jerry officials. Due to these factors, the Bearcats did not appear as usual overwhelming selves, but they did win and the victory topped off a 7-0 season. Overall the Beefcats scored an impressive 27 goals while our defense held the opposition to only 5 goals during the schedule. The Junior Varsity fought to a scoreless tie against Trenton State. They played well and should have scored more. The Sophomore Bearcats, Miss Sally (Boomer) Anderson using her head, the Glasshollow goal, the Gettysburg J.V., game space, Ann Paul’s penalty bullet, Betty’s conscience at Gettysburg, apple cider, the J.V.’s woe, the Rats, Jerry officials, Dick Goodnow, the Bloom-Boomer affair, and the preliminary All-College North Tournament (not your heart out E-Burg!).

The Sectional and National Tournament is now to be held concerning the hockey circuit this season, and it appears that Ursinus may well show up favorably in these categories. Hang in there, you Bears!

With the end of the hockey season we move on to winter sportscapes. Already the Ursinus ski has taken to the water as our swim team began practice this past week. The Water Wizards will be led by co-captains Trudy Schwenkler and Harriet Reynolds and coached by Mr. Van Horn.

Those favoring the Badminton Set will soon set up the nets and commence practicing under the able coaching of Miss Adele Boyd. The Birdie Belting Bearcats hope to regain the undefeated image that they lost last year.

Practice begins next week for the B-ball facet of winter sports. Miss Stoll should have plenty of freshmen and upperclassmen to look at when selecting a hopefully strong team. Robin Cash will be captaining the Benning Reins this season. Good luck to all the winter sports teams!

Bears Drop 4: 1 Game To Go

By MICHAEL REDMOND

The past two weeks were not good news for the Bears. The fault lies mainly with the Team. The Bears have allowed themselves to be out of shape and therefore are very prone to injury. Soccer is made for the fit, when a team is not the fitter it shows up in its playing; no longer do the passers reach their intended receiver, no longer is the player able to beat his opponent to the ball, no longer can a team dominate the play. I’ve been on the team for four years, and each year I’ve seen the same thing happen. As the season gets under way the team works hard, but then it slackens off, members stop coming to practice because of “laba,” “sore muscles,” or “too much work.” Those who do work hard suffer at the expense of a few. A team consists of eleven players; if one of the players is in a critical position is injured, misses a game, or goes off, the team is hurt.

On November 3, Haverford came to Patterson Field. Field conditions were very poor; the ground was sopping wet and quickly turned into mud. Ball control was almost impossible. Haverford was lucky, they scored in the first quarter even though Ursinus dominated the play that period. The rest of the game saw the Bears doing very little. Haverford won, 1-0. Luck seemed to be against us; there were many close goals for both teams. Considering the poor weather, the spectators came in force.

November 6, La Salle came to Ursinus and beat the Bears 5-1. Danny Spencer scored for Ursinus off a pass from Paul Knottler. Danny is still hampered by that knee injury he received in the Muhlenberg game.

The day the Bears went to Moravian proved to be a bad day for the Bears in more than one way. First off there was a mix-up over which uniforms to take, which helped to make the Bears late for the game. The weather was very cold and Moravian was up for the game. One minute and 19 seconds into the game saw Moravian score. The Bears fought back and tied the score at 9:14 in the same period. (Steve Kieskowski made a beautiful hit into the goal.) At 17:56 a Bear touched the ball with his hand in the penalty zone. Moravian scored. In the second quarter Morrisavian scored two more. The second half found the Bears press- ing Moravian but fast losing its strength. The final score was 6-9. Back in the locker room the Bears discovered that their wallets had been emptied during the game. (The room and the building were locked.) All in all, it was a bad day. The only bright spot was the presence of six Ursinus co-eds.

The last game to report was a runaway. Lafayette on November 13 (their field) put the Bears to rout. During this game the Bears lost five players to injuries. The last few minutes of the game almost saw the Bears play with only ten players, but one of the injured managed to get off the bench. The final score was 7-6.

Our last game is this Saturday (November 20) against Franklin and Marshall. How the Bears will do depends on how bad their injuries are. Let’s give all the Bears our support in this last game by coming out and seeing it. They need it.
