Helicopter Comes To U.C.: Nightlights Installed

It sounded like a hundred power mowers warming up for a Great Lawn Race, but actually one of the main students put his newly built and shipped helicopter up in the air. The helicopter was built by one of the members of the Skydive Club, who had recently returned from a trip to Europe.

The helicopter was flown by a student who had recently returned from a trip to Europe. The flight was a success, and the student was able to maneuver the helicopter through the air with ease.

Rumors

Many years ago, a group of wise men were discussing the nature of words. Their final conclusion was that words were like arrows, for once they were sent out, their damage is so manifest that their effects are with us, even though the original rumors are long forgotten.

revenges ever devised, especially since tale-bearing is one of the most effective tools we have. The details in a rumor are understood, heard, or remembered by many, whereas the original rumors are perhaps one of the most effective since tales have the ability to duplicate the true nature of the rumor. For believing in a rumor, we must have faith in it. The rumor is a "spicy" and spicy news is the spice of life. We realize that rumors are perhaps one of the most effective tools of communication. They are the foundation of much of today's world as can this short article prove. "Spicy" news is the spice of life.

The Urisin Weekly

The Urisin Weekly is a weekly newspaper published by the students of Ursinus College, Collegeville, Pa. 19426.

FOCUS:

"Rumors isn't really the helper you need to raise your nursery school with a surplus of care."

Everything in the world is a rumor of something else. The victim, he starts it, but I would never get off the ground if nobody would take it up. The Council, they'd be different but I'm ashamedly proud of having been a member of this rumourous, or so I like to think of such a person. The Urisin Weekly is one of the most tedious and tiresome read in the world. The Council, they'd be different but I'm ashamedly proud of having been a member of this rumourous, or so I like to think of such a person.

Why

For the first two years here, Eileen lived in an off-campus dormitory, which seemed far away from the rest of the Quad. The Quad is two dormitories, primarily the Festivals of Arts which she chaired less separate social lives. Our taste in most things is similar enough for us to get along, yet we differ enough to make life interesting.

For the first two years here, Eileen lived in an off-campus dormitory, which seemed far away from the rest of the Quad. The Quad is two dormitories, primarily the Festivals of Arts which she chaired as the one producing "spicy" news is the spice of life.

By LESA SPACER

Starting in October 1970, Sunday Seminar provides Sunday dinner and a variety of talks with extra church activities, which range from discussions to kite flying. The program's basic purpose is to reach the student who was turned off by the organized church service. Reasons for this may include an uncomfortable feeling about church or a disconnection of it.

Sunday Meetings

Sunday Seminar is a non-denominational group of approximately thirty students, who meet every Sunday evening. The get-togethers begin with Sunday dinner. At this time the students get a chance to relax and to stay longer than the usual fifteen minutes required to eat an Ursinus meal. Following dinner the members plan themselves on the floor to sing spiritual choruses and folk songs. Often these are accompanied by guitars.

Varied Program

A group discussion, a talk given by a guest speaker, or a program of slides and tapes may be included in the weekly get-together. Rather than theology, ethics and everyday issues are usually dealt with. In addition to the usual gathering, there has also been a weekend at Ocean City, attended a spiritual retreat with Moravian students at Kirkridge Center located near Bangor, gone camping, and spent week-ends at various farms. The weekly activities are based on instinct and experience; it is geared to the interests and needs of the group and therefore, it is variable or non-rigid in structure.

Thanksgiving Ecumenical Service

Spiritual growth at Ursinus will be stimulated by the Thanksgiving Ecumenical Service to be held on Nov. 21, at 8:00 p.m., in Bomberger Chapel. Part of the Catholic, Jewish, and Protestant liturgies will be represented. A Christmas service will be held on December 12.

Bomberger's Private Chapel

In the future Sunday Seminar will expand to include more discussion groups. Private rooms (You say chapel) is included in Bomberger's' plans. At this time the students get a chance to eat an unusual meal. Following with Moravian students at Kirkridge will be represented. A Christmas celebration of the season will be open to anyone as a place to think or pray.

THE KITCHEN CYNIC

"The Science of Setback"

By JANE SIEGEL

The exact diameter of the credibility gap, at its widest point, is directly proportional to the square of the degree to which the right hand realizes what the left hand is doing. Contingently, the ability to correctly predict the rational effect of any given theoretical proposition is inversely proportional to the number of second-hand sources of information involved. It, then, necessarily follows that modulation of the frequency of pre-meditated outbursts is directly dependent upon the amount of real, delegated authority.

Thusly, we have established the scientific models which are pre-requisites to the rational discourse that is supposed to result in the pooling of minds. Something, however, is askew since discourse here is about as successful as the tower of Babel. Let us explore the difficulty by using our new tool facility, which isn't a full, as a functional proof of the validity of modern number one. To begin with, is so happened that in the one hand was all the money; that made it the right one. On the other hand just happened to be all the people who know anything about building, maintaining (including drainage) and running on, a track. They got left for the second hypothesis the by-product of the above. It is only a matter of time before the left hand realization of the silly out-of-the-ordinary cooperative process whereby the inhabitants have an interest in its maintenance because they had a vested interest in its origin. Explanations cannot be avoided by threats.

Therefore, according to the third principle, the direful mixing of the relevant rules with intelligent subjects, considering the by-product of both, can only yield an explosive precipitate. It is only a matter of time before the left hand realization of the silly cooperative process whereby the inhabitants have an interest in its maintenance because they had a vested interest in its origin. Explanations cannot be avoided by threats.

But an answer does exist. For a start, the right hand needs to attach itself to the left one in a configuration vaguely resembling a handshake. Then a solution, ratiocination of the by-product of the above. It is only a matter of time before the left hand realization of the silly cooperative process whereby the inhabitants have an interest in its maintenance because they had a vested interest in its origin. Explanations cannot be avoided by threats.

Letter

Dear Editor,

I think that the column "The Critic's Choice" was written by a person who had taste. It is disgusting to cut down a man like Dr. Heileman. Why? Physics I was the worst course you've ever taken. I have never had a Prof. like Dr. Heileman. Maybe if you had taken a few more courses you would really have listened you would feel the same way about the lectures, but maybe you didn't realize that when you had the course.

Mr. Richard P. Richter
Answer: The contractor has informed us he estimated the cost of the work. The work is on the assumption a good job would prevail during the early fall. Because of extended periods of heavy rain, he was thrown off schedule. Since black top cannot be installed when frost is in the ground, we have had a little delay. The man has completed building the contractor has assured us he will make every effort to complete the lot as soon as possible. In any event, he joins the administration in asking the campus community for its understanding and patience during the construction period.

Bears Close Season With 4-4 Record

By DON McAVNEY

The Ursinus College football team closed out its 1971 season with a 21-9 victory over Haverford College at Patterson Field on November 14. Although the Bears had their problems early in the season, they jelled after their upset victory over Muhlenberg and won four of their last five games to finish with a 4-4 record. The credit for their final win must rest with the defensive line. Haverford may have one of the finest passing combinations in Dave Parham and Doug Nichols that the Bears have seen all season. Parham, however, was pressured constantly into hurried his passes, and was forced out of the pocket on numerous occasions by the hard rush of Ursinus. Greg Powell, Rich Rockwell, Gary Greenberg, and Art Handacre, who annulled the defensive line, were the key to the Bears' victory on Saturday.

Ursinus Scores First

The Bear offense put their first score on the board early in the first quarter. With the early momentum, Ursinus moved 71 yards in seven plays. John Sabatino capped the drive with a 37-yard run. Sabatino broke several tackles, and lunged into the end zone after being hit hard on the five. The P.A.T. was good and Ursinus led 7-0. The Fords, however, came right back to notch their only touchdown of the afternoon. Ted Williams intercepted a Laramee pass late in the first period. Six plays later Parham hit Doug Nichols on a pattern pattern to make the score Td Ursinus.

Capitalizing on a short punt which gave the Bears excellent field position, quarterback Don Larson moved the team in for their second six points. John Stewart plunged over from the two-yard line to give Ursinus a 14-6 lead at the half.

Ursinus took the second half kickoff, but could not move. After a bad punt Haverford put the ball in play inside the Bear 40. The defense, however, rallied to halt the drive at the 35 yard line. The Fords were forced to settle for a 35 yard field goal to cut the gap to 14-9.

Fumbles and interceptions continued to plague the Ursinus offense throughout the second half. The defensive unit did an outstanding job in containing the Fords, and consistently turned the ball over to the offense. The final Ursinus Td came on a yard plunge by Doug Nichols. All in all, Ursinus moved 49 yard passing strike from Larson, but the game out of reach and iced the Bears of a .500 season.

Paul Franzen (55) and Gary Greenberg (75) converge on a Haverford ball-carrier to stop him for a two-yard gain early in the season.

M.A.C. All-Conference team. Last year's top scorer will again return in the form of 5' 9" Tom Sturgen who averaged 17 points a game. He will share backcourt duties with 6' 3" Mike Weston, who was second to Sturgen in assists. Rudy McCormick is a distant third with 11 points per game. The biggest battle for a starting berth shapes up at the other forward spot between last season's starter, 6' 4" Mike Weston and 6' 6" Bob George. Klocke both are capable of complementing Schaal and Cattel with the rebounding power that the Bears sorely missed last season. Weston also averaged 10 points a game.

The other reason for the feeling the team cannot miss improving on their 5-15 record is the strength of the Bear bench. Heading the reserve power will be frequent starters, 5' 11" Bob Long, who can fill both the guard and forward spots. 6' 4" Bill Downey and 5' 11" Jack Messenger, number one and two scorers for assistant coach Bob Hansework's "Baby Bears," bring their stats to the varsity and should play essential roles in the team's success. Three upclassmen complete the Bear roster and will see plenty of action: Roger (Superman) Blind, Jim Loveny, and Bob Vietri.

All these factors should add up to a team that will pass the varsity role in the 1972 season. This reporter will include his predictions for the coming weeks at the end of each column and if I am accurate, the Bears will be at the playoffs in March.

Kilt Klad's Comment: Snellbelles Undefeated

By RUTHANN CONNELL

A victory over Trenton State last Tuesday capped an excellent season for our Varsity Hockey Team. So far in the season, the team was 2-1, as the team encountered only minor injuries to our forwards and defensemen, straight from the ice, and Jersey officials. Due to these factors, the Bearcats did not appear as their usual over-whelming selves, but they did win and the victory tipped off a 7-0 season. Our offense line scored an impressive 27 goals while our defense held the opposing teams to only 2 goals during the schedule. The Junior Varsity fought to a scoreless tie against Trenton State. They played well and should have won, but their starting goalie, Dan Bebe, and Miss Boyd's team wound up their season with a 4-1-1 record.

Some highlights of the season included: "Lefty" Chesty, Sally (Boomer) Anderson using her head, the Glasshopper goal on, the Gettyburg J.V. game, spice wa- ters, Ann Paul's penalty bullet, Hett's conscience at Geral- apple cider, the J.V.'s winning the Rams, Jersey officials, dress up as Goodness, the Bloom-Boomer affair, and the preliminary All-Col- lege North Tournament (not your heart out E-Burg!).

The Sectional and National Tourna- ments are two events worth to be held concerning the hockey circuit this season, and it appears that Ursinus may well show up fa-

versibly in these categories. Hang in there, you Bears!

With the end of the hockey sea- son we move on to the winter sports landscape. Already the Ursinus cats have taken to the water as our swim team began practice this past week. The Water Wizards will be led by co-captains Trudy Schwenk- ler and Harriet Reynolds and coached by Mr. Van Horn.

Those favoring the Badminton Set will soon set up the nets and commence practicing under the competent coaching of Miss Adele Boyd. The Birdie Belting Bear- cats hope to regain the undefeated image that they lost last year.

Practice begins next week for the B-Ball facet of winter sports. Miss Stoll should have plenty of freshmen and upperclassmen to look at when selecting a hopefully strong team. Robin Cash will be captaining the Bundling Bears this season. Good luck to all the winter sports teams.

Bears Drop 4: 1 Game To Go

By MICHAEL REDMOND

The past two weeks were not good news for the Bears. The fruits lie mainly with the Team. The Bears have allowed themselves to slip away from cut and therefore are very prone to injury. Soccer is made for the fit, when a team is no longer fit it shows up in their playing; no longer do the passes reach their intended receiver, no longer is the player able to beat his opponent to the ball, no longer can a team dominate the play. I've been on the team for four years, and each year I've seen the same thing happen. As the season gets under way the team works hard, but then it shrinks off, members stop coming to prac- tice because of "laba," "more mus- cles," or "too much work." Those who do work hard suffer at the ex- pense of a few. A team consists of eleven players; if one of these players is in a critical position is injured, misses a game, or goes off, the team is hurt.

On November 3, Havercord came to Patterson Field. Field condi- tions were very poor; the ground was soggy wet and quickly turned into mud. Ball control was all but impossible. Havercord was lucky, they scored in the first quar- ter even though Ursinus dominated the play that period. The rest of the game saw the Bears doing very little. Havercord wins, 1-0. Luck seemed to be against us; there were many close goals for both teams. Considering the poor weath- er, the spectators came in force.

November 6, La Salle came to Ursinus and beat the Bears 5-1. Danny Spencer scored for Ursinus off a pass from Paul Knottler. Danny is still hampered by that knee injury he received in the Muh- linger game.

The day the Bears went to Moravian proved to be a bad day for the Bears in more than one way. First off there was a mix-up over which uniforms to take, which helped to make the Bears late for the game. The weather was very cold and Moravian was up for the game. One minute and 19 seconds into the game the Moravian scored. The Bears fought back and tied the score at 9:14 in the same period. (Steve Kiesczkowski made a beautiful hit into the goal.) At 17:56 a Bear touched the ball with his hand in the penalty area. Moravian scored. In the second quarter Moravian scored two more. The second half found the Bears press- ing Moravian but fast losing its strength. The final score was 6-9. Back in the locker room the Bears discovered that their wallets had been emptied during the game. (The room and the building were locked.) All in all, it was a bad day. The only bright spot was the presence of six Ursinus co-eds.

The last game to report was a runway. Lafayette on November 13 (their field) put the Bears to rout. During this game the Bears lost five players to injuries. The last few minutes of the game almost saw the Bears play with only ten players, but one of the injured managed to get off the bench. The final score was 7-6.

Our last game is this Saturday (November 20) against Franklin and Marshall. How the Bears will do depends on how bad their injuries are. Let's give all the Bears our support in this last game by coming out and seeing it. They need it.
