Protheatre Readies
"Marat/Sade" Premiere

By RICHARD FAIR

With the hustle and bustle of last minute preparation, Protheatre members ready themselves for Sunday evening, March 10, when they will present a dramatic performance of "Marat/Sade." "Marat/Sade," a historic look at the trial and ultimate execution of the Marquis de Sade, by Jean Paul Sartre, is directed by Dr. Gerhard L. Colbeck, professor of French.

Under the iron hand of director-designer-actor Rick Miller, the play has increasingly progressed in practices so that the drama will reach the peaks of performance this Sunday evening at 7:30. Staging the lighting for the various scenes is handled by Rich Clark and Dave Friedman. Musicians David Astheimer, Dan Nathanson, and David Gates perform the background music composed by Richard Philley.

Deni McLaughlin, cast in a leading role, competently executes a portrayal of revolutionary Jean-Marie. Mrs. Ehrlich, a protective mistress, Simone Evar, is characterized by Betsey McLaughlin. The play is a vehicle for the first year of Dr. Colbeck's city. Rich Dougherty gives a dramatic performance in his important role as the master of ceremonies, Marquis de Sade. The palpitations, neuroses, and melancholies of Marquis, Charlotte Corday, is played by Philip paddled Hoffmann; imperiousness former priest and sadistic murderer, Jean-Paul Marat, is Donald Depuret, Charlotte's sister, "brings a touch of high urbanity, pride, and a firm sense of 'saintliness'" and is portrayed by Dave Gates, the director of the clinic of Charleton, in charge of the various executions that lead up the play and is enacted by Jim Steiler. His wife and daughter are depicted by Janet Daum and Carol Wasserman.

Linda Mills, Paul Barc, Mark Asroom, and Bill Jones provide the background music, and the characters who throughout the duration of the play, perform in mime. Supporting members of the cast include Alice Fennell and Jane Siegel as nuns and Richard Denison as an asylum guard. The remainder of the cast carry out such important social themes." This select group is comprised of Joan Cecil, Beryl Oyler, Monty Oyler, Gerhart, Ann Schnick, June Snow, and Eliza Miller. nightmare, it's Richards, P. K, Klasky, G. Cucco, Vincent Gattone, Mike Green, and Randy Schultsman.

Mrs. Dorothy A. Towers Dies;
Longtime Paisley Resident Head

By PRISCILLA M. AMIND

Dorothy Towers, the much loved housemother of Paisley Hall, died of a stroke on Sunday, March 10, 1972, at 12:15 a.m. and passed on later that morning. Services were held on March 12, at 10:00 a.m. in the Presence of student and resident of Pottstown and had two sons, both of whom are marred. Mrs. Towers is the daughter of Gerhard L. Colbeck, an attorney in New Jersey. Her five grandchildren of whom she was very fond. If one stopped in to visit Mrs. Towers, she would speak of their latest achievements with such a proud gleam in her eye and a smile on her mother's faces. She has loved to visit them and shared her home on Tuesdays or for a vacation.

Mrs. Towers was devoted to her housemother. For four years she was the resident head at Chamar Hall, and in 1967 she came to the University. She was a second mother to those who knew her well, and she always had a willing ear and good advice for those who sought it. She was always so thoughtful, doing little things that seemed to make all the difference in dorm living. During her illness, she would check in with those who wanted to feel that she could do anything to make them feel at home. At Christmas times she worked hard to bake dozens of her delicious cookies for the Paisley Hall party.

But Mrs. Towers was quiet and modest about everything. She was reluctant to enter anyone's room for fear of disturbing them, even when they urged her to stop and talk. Yet she would always look forward to the times when girls would stop in at her apartment for a visit. One would see Mrs. Towers walking quietly about the dorm, going about her duties. When she was at the desk with her sign-out cards, one would always find her with a book in hand. She was an avid reader, and often said that she would be lost without something to read as she sat on duty during the day and evening. She loved music as well, and although she could not go to the concert sometimes, she was always anxious to hear from the students about them. She often listened to concerts and operas on the radio in her apartment.

One cannot say enough nice things about Mrs. Towers. She was a generous, kind, and interested person, and one could not help love her as one had to know her. We shall miss the sense of security that she gave to us, but we must remember, too, that we will always be here in cherished memories.

I. R. C. Welcomes 120 Students
To M. U. N. C. On U. C. Campus

By BILL HAFER

On Saturday, March 4, about 120 students from Montclair High School participated in the second annual Urisinus College Model United Nations Conference. The conference included four main committees, each representing different aspects of the world. The resolutions discussed in each committee were held on the plenary session of the General Assembly. The only resolution which passed the General Assembly was the resolution to allow students from Wilson High School who were representing Jordan.

The high school students discussed resolutions on many of the issues that were facing the United Nations today. These resolutions were discussed in four committees. One resolution from each committee was discussed in the plenary session of the General Assembly. The only resolution which passed the General Assembly was the resolution to allow students from Wilson High School who were representing Jordan.

OPEN DORMS: Post Facto

"We want open dorms! We can take care of ourselves! If you want us to behave like adults, you have to treat us like adults! That's the only way you can expect us to behave like adults! College is supposed to prepare us for real life—this isn't it!"

Recently it was announced that President Pettit has approved the weekly open dorms in the men's dorms at the request of the Ursinus Student Government Association. The announcement was met with a grudging attitude on the part of the great majority of the student body, who felt that this was a token gesture of appeasement for the new G.A.

The open dorms are being given a chance to prove that we are new students on campus. The fact that a dorm is open should add to everyone's comfort, the care.

In reality, that is neither here nor there. The point is the policy to continue, we must prove ourselves capable of handling such a situation, for the burden of proof certainly lies nowhere but on us.

The rights of others must always be taken into consideration, and all too often they are totally ignored. Open dorms are certainly important and extremely worthwhile; we have spoken in favor of an open dorm policy for some time. But today is not all there is. We must look forward to tomorrow.

Open dorms are now still a novelty. It is only natural to be excited when something new happens, but after a while, the novelty wears off. What comes next? Perhaps, only perhaps, it is daily open dorms, and then, perhaps, Ursinus may join the ranks of colleges which have given sanction to twenty-four-hour-a-day open dorms. It is now that the consequences of lack of consideration for others, especially during open dorms, can truly be seen. Can you picture studying for the final exam or paper or sleeping over some of the noise that has been heard during recent open dorms? It would be impossible, at best.

The presence of men in women's dorms or of women in men's dorms in and not should not be a signal for general rowdiness of the inhabitants or of the visitors. Visiting a friend of the opposite sex is fine; it is helpful to have rooms available for parties or chata where a group of friends of both sexes can get together comfortably. (The reception rooms are fine for reception, but for informal gatherings, they're a bit formal.) The last thing we want to see done would be open dorms to be eliminated. But open dorms must go together with closed dorms, low record players and radios, and quiet voices; the privacy of every resident of any dormitory must be respected.

In the recent past, Ursinus College has made numerous concessions to its students. It is senseless to list them here; we are all familiar with them. Now is the time for the student body of Ursinus College to prove that we can handle adult privileges calmly, rationally, and intelligently; we must show that we can accept adult responsibilities as well as adult privileges. We ask that you put up with us, and we got them. Now let's show that we deserved them.
SPOTLIGHT:

Dean Geoffrey Dolman

By ROBERT SWAHR

Geoffrey Dolman, the Dean of Admissions, has been an instructor at Ursinus since the fall of 1949. During these years, he has taught courses in Public Speaking and Ad- 
vanced Composition. He has served under three college presidents: Norman E. McClure, Donald L. Heffelfrich and William S. Potter. But, as he notes, "There are other people on campus who have seen four presidents."

Before coming to Ursinus, he served as assistant Dean of Ad- 
missions at the University of Vermont, Syria, Woo, and as the head administrator of the Saint Helen extension school of William and Mary College. He held these two posts from the time of his discharge from the Second 
Armed Division-General Pre- 
ter's Division—after World War 
Two until he came to Ursinus.

Dean Dolman chose Ursinus be- 
cause he was raised in a small col- 
lege town—Swamerton—and he liked the life in this type of town. But, he says that he did not neces- 
sarily want to go to Swamerton. Also, he wanted to be close to Uni- 
versity College to do graduate work there and he wanted to be close to his family.

He comes from a family of teach- 
ers and theater people. His grand- 
mother and his great-grandparents made a career of teaching. His father, his grandfather, had an aca- 
ademic interest in the theater and he wrote a number of books on the sub- 
ject. Dean Dolman completed one 
manuscript, "The Art of Reading 
Aloud", which his father was un- 
able to finish. His publication be- 
fors, therefore, have no title.

Dean Dolman considers teaching "a very pleasant and rewarding life— 
students tend to rejuvenate col- 
lege people." While teaching at Ursinus and interviewing pres- 
ident candidates, the most noticeable change to him has been in the stu- 
dents. He says, "They are more relaxed and less formal. This change in life style reflects changes everywhere. But, underneath

DEAN GEORGEF DOLMAN

hair and blue jeans is pretty much the same kind of individual. The students I know and like well like just as much as the students I know and liked well twenty 
years ago.

But, he says that the increasing 
numbers of his position as Dean of Admissions prevent him from get- 
ing to know as many students as he did twenty years ago. Also, he must make many trips to other schools. He says, regretfully, "I don't get to know as many students as I did twenty years ago."

Dean Dolman is more than con- 
tent with his career choice. He 
says, "One of the nicest things a 
about teaching is that it is not a 
chop-kingg-existence. In the fall I may work sixty hours a week. But, at other times when I have an 
easy week I have no guilt feelings."

One of his greatest satisfactions is seeing former students become successful. He admits that his sal- 
ary is modest but, he says that he is not that concerned about it. He believes that students who have achieved more financial suc- 
scess than he. He said, "This de- 

tails me. I feel that something done here has rubbed off."

LITTLE MAN ON CAMPUS

MRS. JEANETTA BICKING

By LESEA SPACER

After attending York Junior Col- 
lege, Mrs. Bicking first came to Ursinus as a student. Among her classmates was the here- 
ior year was organic chemistry. 
First year was organic chemistry. Mrs. Pettit was her instructor. At this time, President Pettit wasn't even 
just an instructor in chemistry; Dr. Sturgis was head of the Chemistry Department and taught physical chemistry. In her

HOMESTEADS: HERE'S HIGGINS:

President Pettit

By GEOFFREY HIGGINS

The President's suite is located on the second floor of the Adminis- 
tration Building. It consists of the secretaries' desk and waiting 
area, a conference room, and a private office. President Pettit's 
interest in the students and their colonial history is reflected in the 
trimming of the suite. A repro- 

cative model of a seafaring vessel rests on a bookcase next to his 
chair. Larger views and views of ships and sea scenes line shelves from sail to sail, and sails are performing their 
dry tasks. As one observes, there is more an art than an art revealed. As one speaks with the President, 
details of himself and his job are revealed.

At first glance, it seems that the President of a college has an easy 
job where he chair on the job 
writes a few memos, and leaves 
campus for stretches of time, for unknown reasons. The job is more complicated than that. His pri- 

cacy obligation concerns the general 
operation of the school. He 
must be alert to the functions of the entire college. Time must be spent with department chairmen and students. New fund sources 
must be obtained to continue the high standards of teaching and 
and keep the student's cost at a 
minimum. Ways of reducing 
the debt of construction and 
stronger 
ship programs are essential.

Art Tips are a significant new development in painting tools. Now oil and acrylic artists can paint with precision directly from a tube of paint to create a new generation of new effects.

Each tip is molded from a special plastic that has very low hydraulic surface tension so that paint flows smoothly and easily through an 8 millimeter orifice. The artist controls the amount of paint, and surface texture including thickness it is applied, by varying pressure and speed at which the tube is drawn across the painting surface. For rapid work on a variety of surfaces including conventional canvases and art boards and craft objects such as candles, rocks, and driftwood, these tips are ideal.

Art Tips are manufactured in three sizes to fit #16, #20, and #28 tube openings. Assortment of 10 (four #16, four #20, and two #28) available at $8.25, postpaid from DAK SALIS, 1062 West Main Street, Ashland, Ohio 44805. Satisfaction guaranteed.

TRIVIA

The deadliest poison in the world is produced by bacteria that cause botulism, a disease contracted from eating improperly canned foods, reports Dr. Isaac Asimov. The bacterium is Clostridium botulinum. It needs no oxygen to survive, and can flourish in improperly processed vacuum-packed foods. "Less than an ounce of the spice, if properly distributed, would be enough to kill every human being on earth," claims Dr. Asimov.

DREAMS can play an important role in creative thinking. Beethoven, Gliere, Voltaire and Monet are a few of the famous people who created masterpieces, at least in part, from ideas they had in dreams. Psychologists believe this happens because at least one of the necessary stages of creative thinking—preparation, incubation, illumination and verification—occurs during sleep.

LIMITING your baby's vision to a few inches, as it is in a covered buggy or crib, may lay the groundwork for later eye problems. Dr. George Jessor, a Chicago ophthalmologist, reports that restricting a child's field of vision causes the eyes to adapt to the short view, elongating the eyeball, which causes myopia. Dr. Jessor suggests installing mirrors, positioning television at a good distance, and providing proper lighting.

A 2,600-year-old Hebrew inscription found in a Tennessee grave may mean that Semites, not Columbus, discovered America. Dr. Cyrus Gordon of Brandeis University has translated the inscription on the stone found at Flat Creek, Tennessee, as "for the land of Judah, the year 17." Dr. Gordon believes this and other archaeological evidence of links between the New and Old Worlds support the theory of Atlantic diffusion, in which waves of immigrants from the Near East are believed to have sailed across the Atlantic in prehistoric times.

**QUESTION:** Are there any plans for improving on-campus telephone service for student use?

**ANSWER:** The question of on-campus telephone service for students is complex. The Student-Faculty-Administration Relations Committee (SFARC) discovered this. SFARC dealt with one aspect or another of the question at four different monthly meetings. Minutes of these meetings were posted on bulletin boards. I suggest that a student interested in the details obtain copies of the various SFARC meeting minutes from Chairman Jane Siegel or me.

Very briefly, the College's telephone facilities lack the capacity to take care of a comprehensive on-campus communication system. It would be unconceivable, in light of higher priorities for expenditures, to install such a system.

New Gymnasium to Open in Fall; Enhances, Enriches U.C. Campus

By JAY WALTER

The final word as to the completion of the new gymnasium is that the building will be in full use by the opening of the 72 Fall Semester. The cornerstone laying ceremonies have not, as yet, been confirmed for any one specific date. There has been no decision as to what the building shall be named.

The completion of the new gymnasium will require the destruction of the old "New Gym." The building might possibly be torn down before the end of the term; however, this is doubtful. An agreement between the contractor stated that the old gym will not be torn down until the new gym is, though incomplete, at least habitable.

The Thompson-Gay Gym will remain intact. The building will be used for intramurals, free play, and theatrical productions by the Physical Education Department. The building will be rented over a forty-year period.

The new facility will include in its main section three full-size basketball courts. One of these courts will be all-purpose, rendering service as a volleyball, badminton, or tennis court. The other two courts will entertain our home basketball teams. A third court will be of aquatics and other physical education courses. Also included on the main level will be a wrestling room, completely padded on floor and walls, and two regulation squash courts also to be used for handball.

The second level includes two classrooms, offices for the entire Physical Education Department, and a dance studio which may be divided into a third classroom. The plans for the lower level include team rooms for both men and women. These rooms will accommodate visiting competitors.

The all-men's locker room will house up to 500 athletes at one time. Two complete training rooms have been provided, as has medical examining facilities.

The best of movable athletic equipment will supplement these more permanent facilities. Some of these items include new racks of dumb- and bar-bells, an ultra sound diathermy, an ultra sonic generator and stimulator, possibly a closed-circuit television system, and "Spartacus"—the latest in sports conditioning equipment.

Other plans allow for eight all-weather tennis courts, a new base-ball diamond, a new football practice field, and a new soccer field; the latter two will be illuminated for night play. A new100-metre track field will soon be in the making. There is also a possibility that shuffleboard courses, which would be used for ice skating in the winter months, will be constructed.

The plans are most impressive. These new facilities will not only enhance the physical features of Ursinus, but will also greatly enrich our scholastic endeavors in the Physical Education Department.

"THE MINISTRY OF HEALING"

U. C. Takes Part
In Walkathon

On Saturday, March 4, thirty-eight Ursinus students participated in the Walkathon sponsored by the Philadelphia Chapter of the Muscular Dystrophy Associations of America. Sponsored on this campus by the APO service fraternity, the Walkathon was organized by Pete Coleman, Rick Roughton and Rich Dixon. Twenty of those participating are not members of APO. Each student was sponsored by a member or an organization of the College community who agreed to pay $100 if the student walked 10 miles walked. The project cleared $614.50 for MDA. Other participating schools in the area are Villanova, Drexel, and Penn.

Muscular Dystrophy is a neuromuscular disease which is both progressively crippling and incurable, MDAA supports some 100 research projects throughout the world, the Institute for Muscular Disease, which directs its research to all neuromuscular diseases, a national network of clinics, and those services essential to both patients and their families. Its chief victims are young children. Contributions to the MDA, Inc., 1750 Broadway, New York, New York 10019.
KILT KLA'S COMMENT:

Swimmers, Snellbelles Off to Regionals

By RUTHANN CONNELL

Last week was a winning week for the Badminton Boydies as they registered two victories. First Chester Hill met their fate as our

ladies took the match 9-3. Cindy Lee and Kathy Young defeated their opponents in the first and third singles while the double team of Nancy S. Sinjergi
tied for the title. Then on Friday, 3-2 played by Beth Anders with 11 big points. The final score read Princeton 66 - Ursinus 54. Cindy Burg, the J.V. triumphed over the team but we were treated to a meal la Temple, Brickell, Glassboro, Heyn Maw, and Georgian Court
colleges.

In fact, only two times this season have the water-birds Brunn- ettes been minus one: by Princeton University and Monmouth College.
It's not a bad showing, really, considering the Ursinus water women haven't a pool to call their own. The only water near the Col-
legeville campus is the Perkiomen Creek, a rather miserable place for winter training. So coach Van Horn earns his ladies the YMCA in nearby Phenwick, where they clear the mud out of the pool and work through their maneuvers. That picture at least will change next year when the new Ursinus field is constructed.

And most of Ursinus's brightest swimming stars will return for the next season. Captain Troy Schwenker, a senior from Ft. Washington (Pa.) and All-American in Field Hockey, is joined by senior co-captain Harriet Reyl, both seniors.

The team went for practice and pool to call their best swimming events. Two freshman students who have many future seasons to help the team by swimming in events.

With all that talent and a pool to call his own, coach Van Horn is getting in shape; he's looking for an even bigger season next year.
